President of the International Association of Genocide, the largest and most important body in the study of genocide, Melanie O'Brien:

>"Applying the legal definitions of genocide as found in the Genocide Convention and the Rome Statute of the International Criminal Court, I would determine that what is happening in Gaza constitutes genocide."

>Since early October 2023, Israeli leaders have made statements about destroying Gaza and starving its population - clear expressions of intent. Importantly, even if self-defence is invoked, that does not justify genocide. We also see intent through patterns of conduct, including indiscriminate bombings, mass casualties, the destruction of healthcare and essential infrastructure, and the denial of humanitarian aid, all of which can fall under crimes listed under the Genocide Convention."

>"The deliberate denial of water, food, medicine, shelter, and healthcare – all essential for life – points to genocidal intent. People are dying not only from bombings but also from starvation, malnutrition and untreated illnesses, particularly in overcrowded areas where disease spreads rapidly. Genocide is a process, not a single event."

i go to asu and am an online student. i am currently taking a class on terrorism, war, and justice — i thought it would be nice to have a more in depth understanding to help connect back to our current situation in israel. for the newest discussion post, one of the sources is listed as “gaza genocide” by the journal of genocide research (verdeja, e. 2025) this is a source we are required to read and incorporate into our discussion post about how globalization impacts the use of terrorism by states. the entire journal is 24 pages long, and it says that “even the most inflexible definitions of genocide label israel’s actions as genocidal”.
it gives me a pit in my stomach, i feel guilty and culpable. i get more and more anxious the farther israel plummets in the perception of the public. i know that it is apart of our entire existence, i just feel so isolated from the non-jewish world. it feels as if everyone hates us and everyone collectively deems it a genocide. i don’t think it is, but i also

No video footage exists of Hamas filming rapes on October 7, despite claims. Israeli police collected over 1,500 testimonies, but none include autopsy reports confirming rape—official records show no forensic evidence like DNA or medical exams to support this. The UN's March 2025 report instead highlights Israel's use of sexual violence as a war strategy against Palestinians.

Witkoff said to tell hostage families Israel is pointlessly extending Gaza war, US is urging a deal

Today, 9:17 pm

Steve Witkoff, White House special envoy, speaks during a TV interview outside the White House, March 19, 2025, in Washington. (AP/Mark Schiefelbein)

US Special Envoy to the Middle East Steve Witkoff recently told families of Gaza hostages that he disagrees with Israel's approach to the war in Gaza, and believes reaching a new ceasefire and hostage release deal is the correct next step to take, Channel 12 reports.

According to the report, Witkoff told the families that the US "wants to return the hostages, but Israel is not ready to end the war."

"Israel is prolonging the war, even though we do not see where further progress can be made," said Witkoff, the report adds, citing sources who attended the meeting.

"Still, there is currently a window of opportunity that we hope Israel and all the mediators will take advantage of. We are putting pressure on all the mediators and doing everything to return the hostages," he reportedly said.

Channel 12 cites the families saying they've not heard this kind of criticism from Witkoff of Israeli government policy in the past.

The TV report also quotes unnamed senior Israeli officials warning: "If there are no agreements by the end of [President Donald] Trump's visit to the Middle East, Israel will launch a ground operation and it will take several weeks until the next 'exit point'. We won't agree to quickly halt, once we have begun the intensified operation. Hamas will not determine the timeline."

Echoing Witkoff's reported remarks, however, the officials agree that there is currently "a window of opportunity," and state that the mediators have an obligation to make this clear to Hamas, according to Channel 12.

The report says Israel is open to various proposals — including what it says Israel is calling a "Witkoff proposal-minus" — but that if Hamas continues its refusal to agree to a deal there is "no alternative" to an intensified

Report: Shin Bet tried to recruit clans from Gaza City to fight Hamas, but they refused and their homes were attacked

According to a report in the Saudi newspaper Asharq Al-Awsat, Shin Bet agents tried unsuccessfully to recruit senior members of two clans in Gaza City. The report also stated that Israel attacked the clans' homes after they refused to cooperate.

Shin Bet agents tried unsuccessfully to recruit dignitaries from the Bakr and Dur'mush clans from Gaza City to support the Israeli effor to divide Gaza into several parts controlled by clan tribes or armed groups. According to the report, the clans' homes were attacked after they refused to cooperate. This was reported last night (Saturday) in the Saudi-owned newspaper Asharq Al-Awsat, according to security officials and sources on the ground in Gaza City.

According to the report, those clans were offered Israeli support in exchange for fighting against Hamas, in addition to providing free security information to Israel and assistance in implementing its political goals. This was supposed to prevent the subsequent withdrawal of Israeli forces and the establishment of a future Palestinian government to govern the Strip.

According to the same sources, after those clans refused to cooperate with the Shin Bet, Israel carried out a series of attacks on occupied and evacuated homes belonging to members of those clans and tribes. It was claimed, among other things, that 30 members of the Dormush clan were killed in an Israeli attack in the Sabra neighborhood in southern Gaza City, and that 20 members of the clan are still trapped under the rubble. It was also claimed that early this morning, Israel bombed a house belonging to the Bakr clan in the south of the a-Shati refugee camp in Gaza City, which led to six deaths and 11 injuries among the members of the clan.

Israel has tried in the past to strengthen elements in the Gaza Strip, including the possibility of arming them, but the moves were unsuccessful because Hamas assassinated the elements. An Israeli source at the time defined the move as "a Shin Bet plot."

Even during the first months of the war, Israel discussed the possibility of arming Gazan clans as part of the plan to establish "humanitarian bubbles" in Gaza, as a sort of governmental alternative to Hamas promoted by then-Defense Minister Yoav Galant. In June 2012, the British Telegraph reported, citing an informed Israeli intelligence source, that an Israeli attempt had been made to encourage the Dormush clan to take over the leadership from Hamas. However, the terrorist organization entered the clan's compound, beheaded its leader, and the next day all the clans jointly declared support for the terrorist organization.

Senior lawmakers and ministers in Prime Minister Benjamin Netanyahu's Likud party launched a push on Wednesday urging the premier to annex the West Bank before the end of the Knesset's summer session on July 27, claiming that he must ride the "historic achievements" of the war against Iran.

In a letter signed by 15 Likud ministers currently in government as well as Knesset Speaker Amir Ohana, the lawmakers wrote that "after the State of Israel's historic achievements in the face of Iran's axis of evil and its sympathizers, the task must be completed and the existential threat from within must be eliminated, to prevent another massacre in the heart of the country."

The politicians added that "the strategic partnership, backing and support of the US and President Donald Trump have made it a propitious time to move forward with it now, and ensure Israel's security for generations."

A new plan to settle Gaza with Israelis was presented in the Knesset today. It includes the following elements:

* 1.2 million Jews will relocate to Gaza.
* All Palestinians will be expelled.
* 300,000 housing units will be built
* High-tech, agriculture, and education centers will be built.

This was never about defeating Hamas or getting back the hostages. It was always about the destruction of the Palestinian people to establish greater Israel.

⚡🇮🇱BREAKING: Israeli PM Netanyahu:

"A Palestinian state will not be established. The response to the recent attempt to impose a terror state in the heart of our land will be given after my return from the US"

"I have a clear message to those leaders who recognize a Palestinian state after the terrible massacre on October 7th: you are giving a huge reward to terror.

And I have another message for you:
It will not happen. A Palestinian state will not be established west of the Jordan River.

For years I have prevented the establishment of this terror state despite enormous pressures both from within and from outside.
We did this with determination, and we did it with political wisdom.

Moreover, we have doubled Jewish settlement in Judea and Samaria — and we will continue on this path.

The response to the recent attempt to impose a terror state in the heart of our land will be given after my return from the United States. Wait."

“You cannot understand what is happening in Gaza if you forget that since the discovery of natural gas and oil in the Mediterranean, and according to international laws and rules, all coastal countries are entitled to royalties on the gas and oil extracted from the seabed. Offshore from Gaza, there’s a deposit; the calculation relative to the profitability of that deposit for Gaza, relative to the number of miles of beaches, amounts to $3 billion per year. So you understand right away the appeal of chasing the Palestinians out of Gaza to claim this area.”

The one-year anniversary of the October 7 is upon us — and Israel, its media puppets, and bought-and-paid-for politicians are still spewing shameless lies to justify a horrific genocide.

So, let's tear apart the web of lies they've sold about October 7 once and for all. 🧵 1/

2/ 40 Beheaded Babies

On October 10 reporter Nicole Zedeck of i24 News, a pro-Israeli news channel, claimed that she saw 40 babies with their heads cut off. This claim spread quickly, fueled by major media outlets, Israeli officials, and even President Biden.

Except, no such thing happened according to numerous legacy publications, including CNN (which retracted their initial report), +972 Magazine, Le Monde, Business Insider (which cited Israeli officials retracting the claim), and Haaretz.

But the lie continues to be regurgitated to this day, most notably by Kamala Harris in her debate last month against Donald Trump.

3/ Mass Rape

Following the October 7 attack, Israel and its media allies pushed a narrative of mass rape by Hamas as a deliberate strategy. Major outlets like BBC and The New York Times amplified these unverified claims, all sourced from Israeli authorities.

Despite Israel's efforts, evidence for these claims has fallen apart, with families and witnesses denying the reports. Even the UN has called the sources unreliable.

This false narrative continues to be weaponized today to paint Hamas as monsters while deflecting from Israel's ongoing violence against Palestinians.

Eli Beer, President of United Hatzala, claimed that Hamas placed a baby in an oven during the Oct. 7 attacks. This shocking story was repeated in major media outlets, including CNN, Fox, and the Daily Wire.

However, Israeli journalists later found no evidence to support the claim, and it was not until several months later that Beer admitted he hadn't witnessed it himself. Haaretz later acknowledged the story as untrue.

But it's worth noting, it was the Israelis who reportedly threw a Palestinian boy in an oven during the Nakba of 1948.

5/ Family of 4 Tortured Around Dining Table

On October 31, Secretary of State Antony Blinken shared a gruesome story during a Senate hearing, claiming that a family of four, including two young children, were tortured and mutilated by Hamas attackers, with details like gouged eyes, amputated limbs, and terrorists sitting down to eat at the family's table. This shocking account was repeated across major media outlets, further fueling outrage.

However, the story was later debunked by multiple sources, including Israeli journalists and victim data, which found no evidence of a family matching this description.

But nonetheless, the horrifying shocking but untrue accounts had already spread widely, shaping public perception and justifying continued U.S. military support for Israel, despite the lack of evidence behind the narrative.

The Blinken Story Does Not Match Victim Data

Melayev specifically puts this scene in Kfar Azza, which is highly unlikely since **the youngest person killed in Kfar Azza was 14.** Indeed, there are no Kibbutzes where a father, mother, son, and daughter family were killed.

At Kibbutz Be'eri, two 12-year-old twins (a boy and a girl) were killed in addition to their great aunt and grandfather. However, their grandfather was killed separately in another home and the twins were killed with their great-aunt when the IDF fired a tank shell into their home to end a standoff with militants holding them hostage.

There is one family that matches the family and ages and that is the **Kapshetar family:**

Ethan Kapshetar (5M)
Aline Kapshetar(8F)
Dina Kapshetar (34F)
Evgeni Kapshetar (36M)

This family meets the description of two parents, a daughter, and son, of around 6 and 8 years old. And all four were indeed tragically killed on October 7. However, while the details are sparse, what we know for sure is that **this family was killed in their car,** driving back from a camping trip on the morning of Oct 7, **not in a Kibbutz.** Given they were camping, it is also unlikely they would have had a meal prepared on the table of their home. We also know that it took 10 days to identify Aline who was originally thought missing, and Yossi Landau told his account of the family of four only 5 days after Oct 7.

6/ Babies Hung on Clotheslines

On November 28, Israeli journalist Ishay Coen posted an interview claiming that Hamas hung dead babies on clotheslines during the October 7 attack. The claim, made by Lt. Col. Yaron Buskila, spread widely on Israeli social media but was later debunked. Coen eventually deleted the post, admitting the story may not have been accurate.

Haaretz confirmed that death toll numbers from the National Insurance Institute of Israel showed no evidence of babies being hung on clotheslines.

7/ Hamas Put Babies in Cages

In the days following the October 7 attacks, a video showing children in cages was widely shared on social media, with captions falsely claiming they were Israeli hostages held by Hamas.

8/ Pregnant Woman Forced to Give Birth in Captivity

In November, Sara Netanyahu sent a letter to First Lady Jill Biden claiming that a pregnant Israeli woman, allegedly a Thai national named Nutthawaree Munkan, had been held captive by Hamas and gave birth while in captivity.

The story was later debunked by Haaretz. According to the report, Munkan's friends, family, and employer denied that she was pregnant, and Israeli defense officials confirmed there was no evidence of a pregnant woman being abducted. When Munkan was released, she appeared on video, showing no signs of pregnancy or having given birth. Despite this, the claim had already spread widely online, including coverage by The Daily Mail and Visegrad 24, before being proven false.

Dear Jill,

I am writing to you not only as Bibi's wife but first and foremost as a mother to you as first lady and a mother.

For over a month now, 32 children have been held kidnapped in Gaza, heavily torn from their parents and their homes. These children are surely suffering from untold trauma, not only by being kidnapped, but having witnessed the brutal murder of their parents and siblings on that horrific October 7th.

One of the kidnapped women was pregnant. She gave birth to her baby in Hamas captivity. You can only imagine, as I do, what must be going through that young mother's mind as she is being held with her newborn by these murderers.

Hamas also abducted a ten-month-old. A baby. He became kidnapped even before he learned how to walk or talk.

We must speak out on behalf of these children. We must call for the immediate release of them and all those being held. We must demand the Red Cross visit them immediately. They have yet to do so.

This nightmare that began over a month ago must end.

These children need our help.

yours,

With love,

Sara

The woman who allegedly gave birth to a baby while held hostage by Hamas has purportedly been named and pictured by Israeli sources.

Nutthawaree Munkan, 35, is among the 240 hostages, including 25 Thai migrant workers, held in Gaza since Hamas' shocking incursion into Israel on October 7.

Hamas Committed Documented Atrocities. But a Few False Stories Feed the Deniers

The extensive evidence of crimes against humanity committed by Hamas terrorists on October 7 should not be contaminated by unverified stories disseminated by Israeli search and rescue groups, army officers and even Sara Netanyahu

Another doubtful claim was made by the prime minister's wife, Sara Netanyahu, in a letter to U.S. First Lady Jill Biden. Sara Netanyahu wrote that one of the women was in her ninth month of pregnancy when she was abducted into Gaza, where she gave birth. People on social media published a photo of the hostage, Nutthawaree Munkan, a Thai citizen.

In a magazine interview, her friends, employer and families denied that she was pregnant. Munkan was released over a week ago; she was not pregnant and had not given birth. The army currently has no information about an abducted pregnant woman, and defense officials consider the story an unsubstantiated rumor. The Prime Minister's Office did not respond.

9/ Hamas Beheaded Unborn Baby

Claims that Hamas militants killed a pregnant woman, cut open her stomach, and beheaded her baby were widely circulated by Israeli officials, media, and social platforms. The story, initially shared by Yossi Landau from ZAKA, was echoed by others, including Eli Beer and the IDF.

However, it was later debunked by Haaretz and fact-checkers, who found no evidence supporting the incident.

Eli Beer, the head of prominent Israeli EMS organization United Hatzalah, claims he was an eyewitness to the incident described by Landau. In a speech at the Republican Jewish Convention on Nov 5, Beer alleged that the Hamas fighters first stabbed the baby, then shot her, and then shot her other children who were present (see 4:38-5:32):
I saw in my own eyes a woman who was pregnant, four months pregnant. She was in a little village, a little kibbutz. They came into her house. In front of her kids they opened up her stomach. She was pregnant. They opened up her stomach, took out the baby and stabbed the little tiny baby in front of her. And then shot her in front of her family and then they killed the rest of the kids.

But no children 6 or 7 or near those ages were killed on Be'eri. House 426 is in the Ashelim neighborhood, which largely houses kibbutz veterans – older people. House 426 is also a two-family house where elderly families lived; Rafi Mordo was murdered and his neighbor, Simcha Shani, was wounded.
Shani and her husband did not mention a pregnant woman or a family with young children who were guests in their house. A clip was posted on social media describing the murder of a pregnant woman, but the website Fake Reporter and other sources say the video was not filmed in Israel.
The kibbutz adds that "the story of the pregnant woman reported by Zaka is not relevant to Be'eri." The police say the case is not known to them, and a pathology source at the Shura army base told Haaretz that he was unaware of the case.

10/ This is just the tip of the iceberg of lies spewed by Israel, our AIPAC-owned politicians, and the mainstream media puppets loyal to the Zionist regime.

The manipulation of facts and spreading of disinformation has been a key tactic of Israeli hasbara since its founding in 1948 — and today, it is a key tactic in Israel's ongoing campaign to justify its genocidal actions in Gaza and now Lebanon.

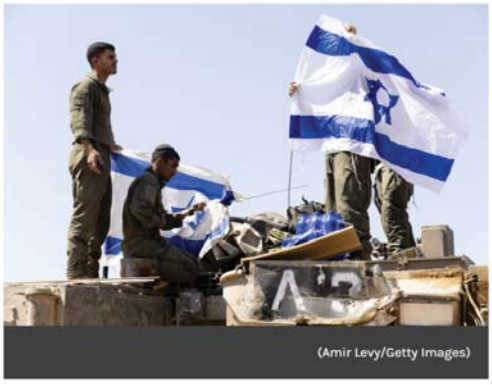
Exclusive: Israel To Resume War in Gaza and ‘Eradicate Hamas,’ Cutting Off Aid and Bombarding Strip with Troops



(Amir Levy/Getty Images)

Andrew Tobin
February 27, 2025

TEL AVIV—Israeli decision-makers plan to resume the Gaza war in four to six weeks with overwhelming force, sending in tens of thousands of troops to conquer the entire strip in a single coordinated offensive against Hamas.

Incoming military chief of staff Eyal Zamir has, at the direction of Prime Minister Benjamin Netanyahu and defense minister Israel Katz, started developing the plan, according to several current and former Israeli officials with knowledge of high-level discussions. Under the plan, Israel will deploy more troops to Gaza than it has to this point in the war—over 50,000—before relocating the civilian population to humanitarian zones and waging a ruthless ground campaign against Palestinian terrorists across the rest of the strip.

Why was this thread locked for over an hour until someone in the DT complained about it?

Anyways, here's what Elad Barashi, producer at Channel 14 (Israel's main right-wing news source) has to say, in case you want to know what the Israeli right is thinking about the conflict:

> "I want to give a huge thank you to the Uvda team and to Ilana Dayan. (Even though I despise her and her opinions.) Tonight, I feel full of appreciation for her. I watched the Uvda episode about Eli Sharabi, who returned from Hamas captivity, and I simply screamed inside—thank you, Ilana, for not letting us 'cool down' towards the Nazis in Gaza.
>
> And I ask—who is the man who doesn't want to see Gaza burned to the ground by the IDF's fire? Who is the man who defends and has mercy on these Nazis? Who is the fool who says there are 'innocents' in Gaza? Who is the despicable scoundrel who wants to let them flee to Arab countries or Europe freely?
>
> Gaza is death. The 2.6 million terrorists in Gaza deserve death!! They deserve death!! They deserve death!
>
> Men, women, and children—by any means necessary, we must simply carry out a Shoah [Holocaust] against them—yes, read that again—H-O-L-O-C-A-U-S-T!
>
> In my view—gas chambers. Train cars. And other cruel methods of death for these Nazis.
>
> Without fear, without weakness—just crush. Eliminate. Slaughter. Flatten. Dismantle. Smash. Shatter.
>
> Without conscience or pity—children and parents, women and girls—all of them are marked for a cruel and harsh death.
>
> And to those who will read this post and start responding with nonsense and drivel—just refresh your weak memories with the torture Amit Susanna endured. With the beatings Eli Sharabi took. With the executions of Hersh and Ori. With Ariel and Kfir being slaughtered. And many more horror stories our captives are going through right now.
>
> Who is the brave man who will decide to bring a total Holocaust to Gaza, so that rivers of blood will flow from it, so that rotting Gazan corpses pile up in mounds and are then burned?
>
> And that an Israeli flag will be raised from every window in Gaza. That Yarden Bibas, Elia Cohen, Eli Sharabi, Liri Elbag will walk proudly through the streets of Gaza with their chests puffed out and truly believe in the phrase 'Never Again.'

What happens when an Israeli doctor says: "I think that even everyone sitting around this table doesn't want a suffering child to be unable to receive painkillers or minimal medical treatment" during an Israeli parliament session.

Excerpt from a story by Haaretz

Israel's Knesset held a first-of-its-kind discussion on the humanitarian crisis in the Gaza Strip. During a meeting last Thursday, Dr. Sharon Shaul from an Israeli-based organization that provides humanitarian aid around the world made a seemingly trivial remark: "I think that even everyone sitting around this table doesn't want a suffering child to be unable to receive painkillers or minimal medical treatment."

Israeli lawmaker Amit Halevi (Likud) angrily interrupted her: "I'm not sure you're speaking for us when you say we want to treat every child and every woman. I hope you don't stand behind that statement either. When fighting a group like this, the distinctions that exist in a normal world don't exist."

Shaul didn't back down: "I hope that you too don't want a 4-year-old whose arm has been amputated to go without painkillers. I hope you have that empathy too." Lawmaker Limor Son Har-Melech (Religious Zionism) couldn't hold back: "The only treatment needed here is for you," she said, pointing at Shaul. Another participant remarked: "You are the sickest doctor I've ever seen."
The discussion was convened by MK Moshe Tur-Paz (Yesh Atid) as part of a subcommittee of the Foreign Affairs and Defense Committee dealing with public diplomacy and foreign relations. The issue at hand was not hunger in and of itself, but the diplomatic and public relations damage it might cause.

Contrary to Dr. Shaul's hope, many around the table indeed thought that the starvation and torment of Gazan children is not only legitimate but even desirable.

Shifra Tzur Aryeh, who identified herself as a resident of the Gaza envelope, scolded the MKs for even holding the discussion. "Who are you pitying?" she shouted, repeating the false claim about the "disembowelment" of pregnant women during the October 7 attack as a reason why Gazans don't deserve sympathy.

"I don't think anyone in this room imagines that in 15 years we'll look back and say, 'It was great that we starved them – what a smart strategy,'" said Ron Yamin from the Political Headquarters of the Left-Wing Organizations Coalition.

Son Har-Melech once again couldn't restrain herself: "No one is starving anyone – stop echoing Hamas lies!"

82% of Israelis Support Ethnic Cleansing in Gaza, Poll Finds

The poll also revealed that 93% of Israelis believe the biblical command to "erase Amalek" still applies today.

Occupied Palestine (Quds News Network)- A new poll has revealed alarming support among Israeli Jews for the ethnic cleansing in Gaza. The survey, published Thursday in Haaretz, shows that 82% of Jewish Israelis back the idea of expelling native Palestinians from the strip.

The poll was conducted in March by one of the researchers on behalf of Penn State University. It surveyed 1,005 Jewish respondents across Israel.

When asked if the Israeli army should act like the biblical Israelites under Joshua in Jericho—killing all inhabitants of a conquered city—47% agreed.

More than 65% of respondents believe in a modern-day incarnation of Amalek, a biblical enemy of the Jews. Of those, 93% believe the biblical command to "erase Amalek" still applies today.

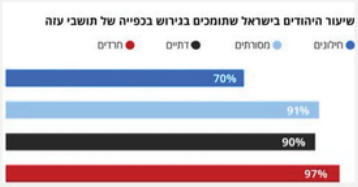
Support for forced expulsions has spiked. 82% support expelling all Palestinians from Gaza. Over half—56%—also back expelling Native Palestinians who are citizens of Israel. In 2003, support for these views was lower at 45% and 31%, respectively.

Secular Israelis also favor radical measures. Among them, 69% support expelling Gaza's population, and 31% support mimicking the biblical destruction of Jericho.

History Speaks @History_Speaks · 23h

Horrifying: A new poll of Israeli Jews conducted by Penn State U reveals overwhelming (82%) support for ethnic cleansing of Gazans, & solid-majority (56%) support for ethnic cleansing of Israeli Arabs. Nearly half (47%) support killing all Gazans in cities captured by IDF.

To the question, "Do you support the claim that the IDF, in conquering an enemy city, should act in a manner similar to the way the Israelites did when they conquered Jericho under the leadership of Joshua, i.e., to kill all its inhabitants?" 47% of all respondents answered in the affirmative. Sixty-five percent of those surveyed answered that there is a current incarnation of Amalek, and of these, 93% responded that the mitzva to erase the memory of Amalek is also relevant to that contemporary Amalek.



It seems that Ginzburg and other ultra-Orthodox rabbis can be particularly proud of the change that has taken place in the Jewish population: 82% of those surveyed expressed support for the forced deportation of residents of the Gaza Strip, and 56% supported the forced deportation of Arab citizens of Israel. In a 2003 survey, the positive answers to

Poll: Overwhelming majority of Jewish Israelis share genocidal belief there are 'no innocent people in Gaza'

A poll from the Hebrew University in Jerusalem in early June provided a chilling statistic: An overwhelming majority of Jewish Israelis agree with the idea of there being "no innocents in Gaza."

64% of Israelis agree with this statement, almost two out of three. But it is actually considerably higher among Jewish Israelis, because that number is heavily weighted by Palestinians with Israeli citizenship. Palestinians make up about 20% of the Israeli population and 92% of them oppose the statement, so that leaves Jewish Israelis with overwhelming support.[1]

The poll also measured the percentage of Israelis who "highly agreed" with the sentiment across the political spectrum:

- 87% of supporters of the current government
- 73% of right-wingers who didn't vote for coalition (like Avigdor Lieberman voters etc.)
- 63% of centrist voters
- Even 30% of "left" voters

This obvious support for patently genocidal calls against Palestinians calls for pause. But it is also important to recognize this support did not start yesterday, nor on October 7, 2023.

Israel changes account of Gaza medic killings after video showed deadly attack

Watch: The Palestinian Red Crescent said this video was found on the phone of a paramedic who was killed

Israel's army has admitted its soldiers made mistakes over the killing of 15 emergency workers in southern Gaza on 23 March.

The convoy of Palestinian Red Crescent Society (PRCS) ambulances, a UN car and a fire truck from Gaza's Civil Defence came under fire near Rafah.

Israel originally claimed troops opened fire because the convoy approached "suspiciously" in darkness without headlights or flashing lights. It said movement of the vehicles had not been previously co-ordinated or agreed with the army.

Mobile phone footage, filmed by one of the paramedics who was killed, showed the vehicles did have lights on as they answered a call to help wounded people.

The Israel Defense Forces (IDF) insists at least six of the medics were linked to Hamas - but has so far provided no evidence. It admits they were unarmed

This is one of the most sick, twisted, depraved massacres yet. Israel fired tank shells into a crowd of starving people waiting for food, killing over 50. They're not even denying it.
CAIRO/GAZA, June 17 (Reuters) - Israeli tanks fired into a crowd trying to get aid from trucks in Gaza on Tuesday, killing at least 59 people, according to medics, in one of the bloodiest incidents yet in mounting violence as desperate residents struggle for food.
Video shared on social media showed around a dozen mangled bodies lying in a street in Khan Younis in the southern Gaza Strip. The Israeli military, at war with Hamas-led Palestinian militants in Gaza since October 2023, acknowledged firing in the area and said it was looking into the incident.
Witnesses interviewed by Reuters said Israeli tanks had launched at least two shells at a crowd of thousands who had gathered on the main eastern road through Khan Younis in the hope of obtaining food from aid trucks that use the route.
"All of a sudden, they let us move forward and made everyone gather, and then shells started falling, tank shells," said Alaa, an eyewitness, interviewed by Reuters at Nasser Hospital, where wounded victims lay sprawled on the floor and in corridors due to the lack of space.
"No one is looking at these people with mercy. The people are dying, they are being torn apart, to get food for their children. Look at these people, all these people are torn to get flour to feed their children."
Palestinian medics said at least 59 people were killed and 221 wounded in the incident, at least 20 of them in critical condition. Casualties were being rushed into the hospital in civilian cars, rickshaws and donkey carts. It was the worst death toll in a single day since aid resumed in Gaza in May.
In a statement, the Israel Defense Forces said: "Earlier today, a gathering was identified adjacent to an aid distribution truck that got stuck in the area of Khan Younis, and in proximity to IDF troops operating in the area.
"The IDF is aware of reports regarding a number of injured individuals from IDF fire following the crowd's approach. The details of the incident are under review. The IDF regrets any harm to uninvolved individuals and operates to minimise harm as much as possible to them while maintaining the safety of our troops."

Israel is secretly poisoning the starving civilians of Gaza by hiding the deadly drug oxycodone in flour sacks.
In the late 1800s, blankets from smallpox patients were distributed to Native Americans in order to spread the disease, killing a number countless people.
In 2025, flour containing oxycodone was distributed to the Palestinians hungry from Gaza with the aim of killing countless people

BEERSHEBA, Israel (AP) — American contractors guarding aid distribution sites in Gaza are using live ammunition and stun grenades as hungry Palestinians scramble for food, according to accounts and videos obtained by The Associated Press.

Two U.S. contractors, speaking to the AP on condition of anonymity because they were revealing their employers' internal operations, said they were coming forward because they were disturbed by what they considered dangerous and irresponsible practices. They said the security staff hired were often unqualified, unvetted, heavily armed and seemed to have an open license to do whatever they wished.

They said their colleagues regularly lobbed stun grenades and pepper spray in the direction of the Palestinians. One contractor said bullets were fired in all directions — in the air, into the ground and at times toward the Palestinians, recalling at least one instance where he thought someone had been hit.

"There are innocent people being hurt. Badly. Needlessly," the contractor said.

He said American staff on the sites monitor those coming to seek food and document anyone considered "suspicious." He said they share such information with the Israeli military.

Videos provided by one of the contractors and taken at the sites show hundreds of Palestinians crowded between metal gates, jostling for aid amid the sound of bullets, stun grenades and the sting of pepper spray. Other videos include conversation between English-speaking men discussing how to disperse crowds and encouraging each other after bursts of gunfire.

Bombshell reporting from Israeli Channel 11. The IDF has destroyed 1,000 trucks worth of aid and buried it rather than provide it to Palestinians. This occurred two months ago, resulting in the current hunger crisis in Gaza. The same source says that the IDF is about to destroy more aid.

Israel strikes a Gaza hospital killing at least 20 people including 5 journalists

The Hind Rajab Foundation
@HindRFoundation

The IDF claims the Nasser Hospital massacre was caused by a "Tank shell." This is false. Our researchers have analysed the footage and confirmed it shows a guided missile fired on a direct trajectory from the northwest — consistent with precision systems such as Spike NLOS .

These missiles are man-in-the-loop: the operator sees or designates the target before impact.
The IDF therefore knew they were striking medics, civil defense crews, and journalists. This was a deliberate double-tap war crime, not an accident.

Researchers at the #HindRajabFoundation are finalising a detailed technical report on this attack, which will be included in a forthcoming legal filing against those responsible.

He notes that it appears highly indicative that there have been organ harvesting occurring. He has said that the bodies show clearly surgically removed lungs, hearts, kidneys, and livers, done in a professional, surgical way using specialized tools with zero damage to surrounding tissues. All of these bodies also belonged to Palestinians who had been imprisoned, and imprisoned while they were alive, which is one of the hallmarks of organ harvesting. Top Hamas official announces end to Gaza war

The organization has received “guarantees” from the US that the hostilities will not continue, Khalil al-Hayya has said

BREAKING NEWS

The Gaza war is over, a senior Hamas official, Khalil al-Hayya, has said, adding that the peace plan put forth by US President Donald Trump would mark the start of a *“permanent ceasefire.”*

The militant group received some *“guarantees”* from Washington and other mediators that the hostilities would not continue, he told Gaza residents in a televised address on Thursday.

According to al-Hayya, the Gaza-based Palestinian militant group *“dealt responsibly with the American president’s plan”* and submitted a response aimed at preventing further bloodshed. He did not elaborate on the nature of the response but said that the deal, which was reached in Sharm el-Sheikh, Egypt, includes providing the Palestinian enclave with humanitarian aid, opening the Rafah border crossing, and exchanging prisoners.

“Everyone confirmed that the war has completely ended,” the official said, vowing to work with all national and Islamic forces to complete the next steps envisioned by the agreement.

GAZA TRUCE BEGINS

Israel and Hamas have agreed to the first phase of a U.S.-brokered peace plan — the most significant breakthrough since the war began in 2023.

The deal includes a ceasefire, hostage–prisoner exchange, Israeli troop pullback, and surge of humanitarian aid into Gaza.

What's Been Agreed

- **Ceasefire:** Immediate halt to combat across Gaza once Israel's cabinet approves.
- **Hostage Release:** Hamas to free ~20 surviving hostages (Israel tbelieves ~48 remain, 20 alive).
- **Prisoner Exchange:** Israel to release up to 1,700 Palestinian prisoners, including ~250 serving life terms.
- **Israeli Withdrawal:** IDF to pull back to an "agreed line" inside Gaza during the first 72 hours.
- **Aid Access:** Humanitarian corridors open under UN and Red Crescent supervision.

How It Works

- **Mediators: Qatar, Egypt, Türkiye, and the U.S.** will coordinate and monitor implementation.
- **Lists exchanged:** Hamas provided hostage names; Israel finalizing prisoner list. **Security guarantees in place to prevent clashes during transfers.**
- Trump administration monitoring progress under its **"20-point peace plan."**

Unresolved Issues

- **Final maps of Israeli** withdrawal lines.
- **Who governs Gaza post-ceasefire** (PA, Arab-backed, or technocratic authority).
- Verification and enforcement of **future phases.**

Timeline

Oct 9:
Israeli cabinet convenes for approval the deal's official trigger.

Oct 10–13:
72-hour window for hostage releases and troop pullback.

Oct 13:
Expected address by U.S. President Trump and mediator oversight visit. Aid convoys roll into Gaza as ceasefire holds.

Future phases will address disarmament, governance, and reconstruction.

BANNON: This falls squarely on Lindsey Graham and the Tel Aviv Levin Israel-first crowd. Their blind loyalty to Netanyahu backfired. Trump just united the Gulf states and Qatar to fund a proto-Palestinian state in Gaza, blocked Israeli expansion in Judea-Samaria, and may even bring Iran into the Abraham Accords. The Greater Israel project is dead. This was a masterstroke. Trump's own Nixon-in-China moment.

Cmv: Israel's actions are going to destroy one of the best eras ever for jews

Delta(s) from OP

So starting this off, I'm Jewish and PLEASE PLEASE PLEASE change my view. Basically, I think that Netanyahus/Israels actions in the war (such as willfully ignoring international law and the Geneva convention, wanton destruction of civillian areas, and genocide) are contributing to a massive rise in antisemitism. And I don't mean antizionism or saying Israel is committing genocide, I mean hatred of Jews as a whole. I think that this is making Jews far less safe worldwide. Additionally, it is slowly costing Israel allies. When it runs out of allies and support from Europe and the US, Israel is going to be crushed. Even if that doesn't happen, Jews are far less safe in other countries then they were before, and Netanyahu is fine with this as it encourages jews to move to Israel and gives him legitimacy as the 'protector' of jews, never mind that he's stirring up the rage. The days where jews could live mostly unharrased in a large portion of the globe (basically everywhere but MENA) are ending, and they weren't that long to begin with.

On the sidelines of the UN General Assembly, The Hague Group – co-chaired by South Africa and Colombia – announced that 34 governments have agreed to a joint action plan to halt the Gaza genocide.

Their statement declares Israel's actions a genocide, condemns its defiance of the ICJ and UN, and commits to coordinated enforcement: halting arms transfers, blocking shipments, ending procurement from Israeli firms, cutting energy exports, and pursuing accountability in courts worldwide.

"The people of Palestine cannot wait," said ministers Ronald Lamola 🇿🇦 and Rosa Villavicencio 🇨🇴, vowing the Hague Group "will not rest" until international law is enforced.

Chair's Statement: The Hague Group
High-level Meeting to Halt the Gaza Genocide — New York, 26 September 2025

One year ago, the United Nations General Assembly adopted Resolution A/RES/ES-10/24, demanding that the State of Israel comply with the International Court of Justice's Advisory Opinion of July 2024, giving the State of Israel twelve months to cease without delay its "unlawful presence in the Occupied Palestinian Territory."

That deadline has now passed. Israel has defied the General Assembly, ignored the Court, and intensified its crimes. The Independent International Commission of Inquiry on the Occupied Palestinian Territory, including East Jerusalem, and Israel has now concluded that Israel's actions constitute a genocide. In the face of this grave reality, the international community must commit — not to rhetoric, but to action.

That is why The Hague Group was first established in January — to rally against complicity and end impunity — by collectively enforcing international law. Over the past year, states across the world have enforced concrete measures through national legislation and executive policies: halting arms transfers, blocking weapons shipments, suspending procurement from Israeli firms, ceasing energy exports and ensuring accountability through national and international courts.

Today, on the sidelines of the 80th UN General Assembly, The Hague Group convened more than thirty governments to consolidate these measures into a coordinated global strategy to halt the Gaza genocide. We affirm:

- That accountability as a principle cannot be forsaken
- That Israel cannot be permitted to continue its crimes with impunity;
- That every state has obligations to prevent genocide and implement international law;
- That coordinated enforcement — through our courts, ports, contracts, factories, and financial systems — an unavoidable path to justice for the people of Palestine.

Such coordination strengthens the global response to Israel's ongoing crimes, setting a model for all states to immediately fulfil their legal obligations, and creating robust mechanisms for accountability at the national, regional, and international levels.

Colombia and South Africa, as co-chairs of The Hague Group, reaffirm our shared commitment to this mission. We stand together, not only for Palestine, but for the integrity of international law itself. The choice before every government is clear: complicity or compliance.

History will judge us not by the speeches we delivered, but by the actions we took. Together, we call on all states to join us in cutting ties of complicity across arms, finance, and energy — and in ensuring that justice is not delayed, but delivered.

The people of Palestine cannot wait — and The Hague Group will not rest until it has rallied the world to defend the international laws that protect them.

The UK 'israel' lobby has pressured my government and medical board into referring me to a tribunal hearing to try and suspend me for opposing genocide. This is Britain. We are occupied.

Hi. My name is Rahmeh. I am a part-Palestinian British NHS doctor. I am facing the suspension of my medical licence. This is not the result of any professional failure, but the outcome of a coordinated lobbying campaign against me because of my public stance against the genocide in Gaza being carried out with my tax pounds.

I march—having attended over 300 protests in the last 23 months—advocate and educate online, and have taken direct action.

For this, the 'israel' lobby has:
-defamed me in the papers
-complained to my medical board (@gmcuk)—resulting in a nine-month investigation that I won
- held my career back by two years
- had my Instagram suspended
- threatened my family and friends,

and complained to the GMC again. Dissatisfied that I continue to advocate, they pressured the British government and the GMC to refer me directly to an Interim Orders Tribunal (IOT) (@the_mpts) to try to suspend me and revoke my medical license, bypassing the normal investigative process by claiming it is 'in the public interest'.

Their goal is to force me into silence by taking my career and income.

I have lost more than 50 friends in Gaza. My friends have had 20 to 100 members of their families murdered by the IOF.

Our careers are not worth more than Palestinian lives. 'israel' bombed a hospital twice, live on air, murdering journalists and medics—this very week. My friend, a medical student, was thrown across the hospital by the blast but thankfully survived. The IOF have slaughtered over 1,900 Palestinian medics.

The UK 'israel' lobby is trying to suspend me because I am against its genocidal entity and the jewish supremacy (zionism) that empowers this lobby to do this to me and my fellow Brits. My British Health Secretary, @wesstreeting—who has taken £70,000 from the lobby—regularly meets with them but refuses to meet British healthcare workers. He even blocked me on Instagram after I tagged him in a post asking for a meeting to address these attacks.

If they suspend me, it will be to shield 'israel' at the expense of the British public. I'm not the first and I won't be the last doctor they have done this to.

We must free Britain from the corrupt influence of the 'israel' lobby, which undermines our freedom, our democracy, our sovereignty, and our humanity.

We will not stop. We will fight. We will win.

There is a special place in hell, and a bloodstained chapter in the history books, for the doctors, firefighters, and journalists who chose silence on Gaza. That chapter is titled. While they bled out on hospital floors, screamed from beneath the rubble, burned until their lungs could no longer carry oxygen, and held up the decapitated bodies of their children for the world to see — we turned away. We chose cowardice. We abandoned integrity. We lost our humanity.

According to her, these global power players are indulging in excess, convinced the world is nearing its end.

The Cooling World

There are ominous signs that the earth's weather patterns have begun to change dramatically and that these changes may portend a drastic decline in food production—with serious political implications for just about every nation on earth. The drop in food output could begin quite soon, perhaps only ten years from now. The regions destined to feel its impact are the great wheat-producing lands of Canada and the U.S.S.R. in the north, along with a number of marginally self-sufficient tropical areas—parts of India, Pakistan, Bangladesh, Indochina and Indonesia—where the growing season is dependent upon the rains brought by the monsoon.

The evidence in support of these predictions has now begun to accumulate so massively that meteorologists are hard-pressed to keep up with it. In England, farmers have seen their growing season decline by about two weeks since 1950, with a resultant over-all loss in grain production estimated at up to 100,000 tons annually. During the same time, the average temperature around the equator has risen by a fraction of a degree—a fraction that in some areas can mean drought and desolation. Last April, in the most devastating outbreak of tornadoes ever recorded, 148 twisters killed more than 300 people and caused half a billion dollars' worth of damage in thirteen U.S. states.

Trend: To scientists, these seemingly disparate incidents represent the advance signs of fundamental changes in the world's weather. The central fact is that after three quarters of a century of extraordinarily mild conditions, the earth's climate seems to be cooling down. Meteorologists disagree about the cause and extent of the cooling trend, as well as over its specific impact on local weather conditions. But they are almost unanimous in the view that the trend will reduce agricultural productivity for the rest of the century. If the climatic change is as profound as some of the pessimists fear, the resulting famines could be catastrophic. "A major climatic change would force economic and social adjustments on a worldwide scale," warns a recent report by the National Academy of Sciences, "because the global patterns of food production and population that have evolved are implicitly dependent on the climate of the present century."

A survey completed last year by Dr. Murray Mitchell of the National Oceanic and Atmospheric Administration reveals a drop of half a degree in average ground temperatures in the Northern Hemisphere between 1945 and 1968. According to George Kukla of Columbia University, satellite photos indicated a sudden, large increase in Northern Hemisphere snow cover in the winter of 1971-72. And a study released last month by two NOAA scientists notes that the amount of sunshine reaching the ground in the continental U.S. diminished by 1.3 per cent between 1964 and 1972.

To the layman, the relatively small changes in temperature and sunshine can be highly misleading. Reid Bryson of the University of Wisconsin points out that the earth's average temperature during the great Ice Ages was only about 7 degrees lower than during its warmest eras—and that the present decline has taken the planet about a sixth of the way toward the Ice Age average. Others regard the cooling as a reversion to the "little ice age" conditions that brought bitter winters to much of Europe and northern America between 1600 and 1900—years when the Thames used to freeze so solidly that Londoners roasted oxen on the ice and when iceboats sailed the Hudson River almost as far south as New York City.

Just what causes the onset of major and minor ice ages remains a mystery. "Our knowledge of the mechanisms of climatic change is at least as fragmentary as our data," concedes the National Academy of Sciences report. "Not only are the basic scientific questions largely unanswered, but in many cases we do not yet know enough to pose the key questions."

Extremes: Meteorologists think that they can forecast the short-term results of the return to the norm of the last century. They begin by noting the slight drop in over-all temperature that produces large numbers of pressure centers in the upper atmosphere. These break up the smooth flow of westerly winds over temperate areas. The stagnant air produced in this way causes an increase in extremes of local weather such as droughts, floods, extended dry spells, long freezes, delayed monsoons and even local temperature increases—all of which have a direct impact on food supplies.

"The world's food-producing system," warns Dr. James D. McQuigg of NOAA's Center for Climatic and Environmental Assessment, "is much more sensitive to the weather variable than it was even five years ago." Furthermore, the growth of world population and creation of new national boundaries make it impossible for starving peoples to migrate from their devastated fields, as they did during past famines.

Climatologists are pessimistic that political leaders will take any positive action to compensate for the climatic change, or even to allay its effects. They concede that some of the more spectacular solutions proposed, such as melting the arctic ice cap by covering it with black soot or diverting arctic rivers, might create problems far greater than those they solve. But the scientists see few signs that government leaders anywhere are even prepared to take the simple measures of stockpiling food or of introducing the variables of climatic uncertainty into economic projections of future food supplies. The longer the planners delay, the more difficult will they find it to cope with climatic change once the results become grim reality.

Evaluating 38 years of coral coverage trends on the Great Barrier Reef: insights into resilience and temperature correlation

Alberto Boretti

24 Jul 2025

Abstract

This study investigates the relationship between global warming and coral reef health, focusing on the Great Barrier Reef (GBR). Contrary to claims of widespread decline due to warming-induced bleaching, long-term data from the Australian Institute of Marine Science (AIMS) reveal that coral cover is at its highest since monitoring began in 1985. Using satellite air temperature data as a robust proxy for ocean warming, the analysis identifies no consistent correlation between rising temperatures and reduced coral cover. Coral bleaching is reframed as an adaptive response, with most corals demonstrating rapid recovery. These findings challenge prevailing narratives of coral fragility, emphasising the GBR's resilience and adaptive capacity in the face of climate change. The study advocates for balanced scientific discussions that incorporate both threats and recovery dynamics in coral ecosystems.

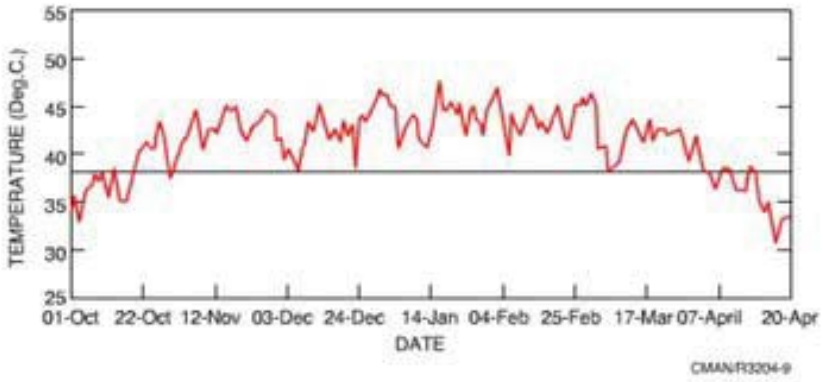
Marble Bar heatwave, 1923-24

The world record for the longest sequence of days above 100°Fahrenheit (or 37.8° on the Celsius scale) is held by Marble Bar in the inland Pilbara district of Western Australia. The temperature, measured under standard exposure conditions, reached or exceeded the century mark every day from 31 October 1923 to 7 April 1924, a total of 160 days.

Temperatures above 100°F are common in Marble Bar and indeed throughout a wide area of northwestern Australia. On average, Marble Bar experiences about 154 such days each year. The town is far enough inland that, during the summer months, the only mechanisms likely to prevent the air from reaching such a temperature involve a southward excursion of humid air associated with the monsoon trough, or heavy cloud, and/or rain, in the immediate area. This may sometimes be associated with a tropical cyclone or a monsoon low. In the record year of 1923-24 the monsoon trough stayed well north, and the season was notable for its lack of cyclone activity. (In fact, the entire Australian continent was untouched by tropical cyclones throughout the season, a rare event in the 20th Century). The rainfall recorded at Marble Bar during the record 160 days was just 79 mm, most of it in two heavy, short-lived storms that developed after the heat of the day. Only a further 12 mm of rain fell before the following December. Severe drought prevailed across the Western Australian tropics, and stock losses were heavy. With no rain to speak of, and minimal cloud, there was nothing to relieve day after day of extreme heat.



"Day by day maximum temperatures at Marble Bar over the period 31 October 1923 to 7 April 1924. At the peak of the heatwave - between late December and late February - many days approached or exceeded 45°C".

The House of Representatives impeached President Donald Trump on December 18, 2019, after a White House whistleblower went public with evidence that Trump abused his powers by withholding military aid to Ukraine in order to dig up dirt on his rival, Joe Biden.

In the complaint, the whistleblower claimed to have heard from White House staff that Trump had, on a phone call, directed Ukrainian President Volodymyr Zelensky to work with his personal attorney, Rudy Giuliani, to investigate Joe Biden and Hunter Biden.

The whistleblower who triggered the impeachment was a CIA analyst who was first brought into the White House by the Obama administration.

Reporting by Drop Site News last year revealed that the CIA analyst relied on reporting by a supposedly independent investigative news organization called the Organized Crime and Corruption Reporting Project (OCCRP), which appears to have effectively operated as an arm of the United States Agency for International Development (USAID),

we were asked to take guns bought from retailers in the US and hand them off to the cartel/send them south of the border. we were supposed to create violence. this was to justify that US civ guns cause this in order to ban them. the gunwalking scandal was just a cover story.

Ms. Anne Thrope @exalted_cyclops · 7h
@EricHolder and @BarackObama were the ones that pushed this on the ATF and our SAICs pursued it enthusiastically. they are guilty of causing civil war south of our border. without them there wouldn't be the violence you see today. what you're told is a lie.

Back in 2006 the American CIA developed this Osama Bin Laden toy which was suppose to be given to children in Pakistan and many other places.

The toy used to look normal for a time until the upper layer came off and the red face with the black striations and a green eye were seen like a demon.

The goal of the short-lived project was simple: spook children and their parents, causing them to turn away from the actual bin Laden. It was Psychological warfare.

The code name for the Bin laden dolls were “Devil eyes”. It was a undisclosed project.

There’s a dispute over how many of the figurines, if any, were ultimately delivered though.

FBI Whistleblower Claims: Epstein Files Being Deleted Amid Transparency Push

Last updated 20 minutes ago

A whistleblower has claimed that the FBI is deleting files related to Jeffrey Epstein, sparking discussions among Republican politicians and the public about transparency and accountability. Amidst these claims, House Republicans have formed a task force, led by Rep. Anna Paulina Luna, aimed at declassifying federal secrets concerning high-profile cases like Epstein and JFK's assassination. The urgency for releasing these documents has been echoed by several politicians, with calls for unredacted information to be made public.

Diary of plot to kill JFK called fake

Notes say Dallas officer had assassination role

HOUSTON — A diary claiming a Dallas police officer shot President John Kennedy was unveiled on Thursday, but a leading assassination theorist immediately labeled it a hoax.

The diary included notations in which late Dallas police officer Roscoe White supposedly confessed to participating in a CIA plot to kill Kennedy, who was shot to death in Dallas on Nov. 22, 1963.

"They want me to kill the president. God help me. They say he's a threat to the United States," a line in the document said.

Private investigator Joe West showed copied pages from the diary at a news conference. He said he knew, but could not disclose, the location of the actual document.

West said that White's widow, Geneva White Galle, found the diary recently in the garage of her Midland, Texas, home.

She allowed him to make copies because she was dying and "wants to use the few days she has left to let the truth be known," he said.

But former CIA agent John Stockwell, who has written extensively on the possibility that Kennedy was killed by a government-led conspiracy, said at the same news conference that the diary appeared to be a fraud.

"I believe when analysis is done, it will show this document is a fabrication — and one that's fairly easy to expose," said Stockwell, who was allowed to view the actual document this week. He refused to speculate on who might have perpetrated the alleged fraud.

He said the document refers to the Watergate break-in committed by the Nixon re-election campaign almost a year before it happened. It also appeared to have been written with a type of felt tip pen that was not available during part of the time — from 1956 to 1971 — that White supposedly wrote.

White died in a fire in 1971.

West, who has investigated the Kennedy assassination for two years, said he could not guarantee the accuracy of the diary.

The document also talks about White's involvement with alleged Kennedy assassin Lee Harvey Oswald — whom he had known in the Marines — Oswald murderer Jack Ruby and a Mafia gunman who supposedly also took part in the assassination.

The writer also claims to have killed Ruby and others.

The unveiling of the "diary" followed a press conference in Dallas last month in which White's son, Ricky White, 29, said his father's diary disclosed that he and another unnamed gunman — not Oswald — had shot Kennedy.

The son said the diary mysteriously disappeared after a visit to his home by the FBI two years ago.

West said he did not know if the document given to him by White's widow was the same the son claimed to have read.

The CIA and the FBI have said White's story was not true.

The Warren Commission, the panel headed by Chief Justice Earl Warren set up to investigate the assassination, concluded Kennedy was killed by Oswald acting alone.

4CHAN HACKED, MOSSAD EXPOSED: THE DIGITAL HONEYPOT THAT CREATED Q-ANON AND POISONED THE AMERICAN RIGHT

By Gordon Duff | April 2025

The biggest revelation? That "Q" was born in Tel Aviv, not Langley.

The entire mythology of "Q," the idea of secret military patriots inside the U.S. government working to expose the Deep State and "save the children," was in fact a psychological pacification program, designed to keep the American right docile, disorganized, and permanently waiting. Trust the plan. Stay passive. Just post memes.

Behind the curtain were Israeli and U.S. operatives, writing Q drops, promoting them on 4Chan, and then later migrating the narratives to YouTube, Reddit, Truth Social, and beyond. The goal: derail real resistance movements and replace them with hopium-addled fantasy narratives.

They succeeded. Until now.

Buried inside the leak were the smoking guns:

- Admin and moderator emails tied to .edu and .gov addresses.
- Israeli IP ranges responsible for more than 50% of all /pol/ posts—a staggering figure for a country comprising just 0.12% of the world's population.
- Geolocation data proving that 4Chan's vaunted anonymity was a lie—users were aggressively browser-fingerprinted, logged, profiled, and in some cases, targeted.

The DOGE discoveries are not just about "wasted" taxpayer funds. The real story, the 5 alarm fire, is that USAID was literally funding an entirely hand crafted pseudo-reality. Not just in America but all over the world.

You were robbed to fund global psychological operations.

-Buying off media outlets
-Pushing advertiser Boycotts against X and Rumble as they attempted to decrease censorship
(AKA narrative control)
-Pushing war propaganda
-Funding opposition groups in foreign lands to foment revolutions
-Funding lawfare against the former president of the united states and his supporters
(I could go on for an hour)

People get caught up on the "$100K to study cocaines' impact on chihuahua" stories. That is not the headline here.

The headline here is:

Sen. Marshall Leads Effort Demanding USAID Ceases EcoHealth Alliance Funding

(Washington, D.C., September 14, 2022) – Today U.S. Senator Roger Marshall, M.D. led a group of Senators on a letter to Samantha Power, Administrator for the U.S. Agency for International Development (USAID), demanding that her agency suspend its taxpayer-funded financial awards to EcoHealth

The Taliban’s Successful Opium Ban is Bad for Afghans and the World

The ban is not a counter-narcotics victory and will have negative economic and humanitarian consequences, potentially leading to a refugee crisis.

The Taliban have done it again: implementing a nearly complete ban against cultivation of opium poppy — Afghanistan’s most important agricultural product — repeating their similarly successful 2000-2001 prohibition on the crop. But the temptation to view the current ban in an overly positive light — as an important global counter-narcotics victory — must be avoided. This is particularly true given the state of Afghanistan’s economy and the country’s humanitarian situation. Indeed, the ban imposes huge economic and humanitarian costs on Afghans and it is likely to further stimulate an outflow of refugees. It may even result in internal challenges for the Taliban itself. And, in the long run, it will not have lasting counter-narcotics benefits within Afghanistan or globally.

NEWS: Venezuela announced on Sept. 17 the seizure of 3,700 kilograms of cocaine and the arrest of five people in what Interior Minister Diosdado Cabello called a “false flag” operation aimed at framing Venezuela for drug trafficking and justifying foreign aggression. Among those captured was Levi Enrique López, who Cabello said was an American DEA agent and trafficker.

López reportedly is from El Morro de Puerto Santo in Sucre state, a region long tied to Caribbean drug routes, and has family ties to a man jailed for drug trafficking in 2022. Authorities said the boat carrying the cocaine originated in Colombia and was connected to the group “Los Orientales.” Caracas framed the bust as proof of its commitment to combat narcotics and pushed back against U.S. accusations that senior Venezuelan officials run a “narco-terrorist state.”

> Bill Cooper predicted 9/11 in detail before Alex Jones did

William cooper was later assassinated by the govt due to knowing too much and not keeping quiet & kept getting louder and telling more people. Which harms the false flag that CIA-Mossad did in September of that year, on The twon towers & Pentagon.

Luckily for the pentagon, they had just remodeled rhe EXACT spot that the plane hit into the side. I a maneuver that commercial pilots of decades couldn't replicate in simulators, until a year of training that maneuver. Yet a guy who couldn't apeak english, couldn't fly a tiny cessna. Whose flight instructor said that he must have paid someone to take his test because he was such a terrible pilot. Was magically able to do a complex, insanely skilled flight path, hovering directly over the ground at 700mph, hitting windshields of cars as it got in the general area. Hitting the wxact area that was remodeled right before 9/11 to be bombe/missile proofed (no other spot of pentagon was ever renovated for that)

He could have done a super easy path, flying feom the top and siving straight into the rodd of rhe pentagon. But that would have caused massive thousanda of death & damaged tona of rhe pentagon and what rhwy were working on. So instead he took the impossible path, to hit the accounting dept, which was working on the trillions of dollars that CIA "lost", ehich they mention3d on 9/10/2001 and never mentioned again.

Also mentioned on 9/10/2001 was the US Army SAMS report that was released that day. Saying Mossad is know for fratricide & was a 500lb elephant in the room. Known for attacking USA/allies & being able to effectively mask and blame it on Muslims. This is in some MSM articles posted online 9/10/2001, which somehow still hasn't yet been scrubbed (but the full SAMS report is scrubbed from the interwebz)

Two days ago I was contacted by a high-ranking employee of the French Government. After determining this person's position and proximity to the French couple, I have deemed the information they gave me to be credible enough to share publicly in the event that something happens.
In short, this person claims that the Macrons have executed upon and paid for my assassination. Yes, you read that correctly. More specifically, that the green light was given to a small team in National Gendamarie Intervention Group. I am told there is one Israeli that is on this assasination squad and the plans were formalized.
Again, this person provided concrete proof that they are well placed within the French government apparatus.
Further to this point, this person claims that Charlie Kirk's assassin trained with the French legion 13th brigade with multi-state involvement.
Journalist Xavier Poussard's life is also at risk. This is deadly serious. The head of state of France apparently wants us both dead and has authorized professional units to carry this out.
I ask that every person RETWEET and share this.
I do not know who in the American government can be trusted, since this source claims our leaders are aware. But I have more specific information which is definitively verifiable, should they care to reach out to me.
To the brave official in France who did this because they were so moved by the evil of Charlie's public execution to risk their own life— May God bless you. Truly.
Let all be revealed.

>Be the EU, mid 1990s
>Gasoline cars produce too much CO2 emissions
>Begin forcing people to buy diesel cars due to lower CO2 emissions
>Force manufacturers to make their flagship cars all diesel
>Force manufacturers to adhere to unrealistic fuel consumption standards

Sounds like a great idea! With the best of intentions!

>FFW 2015
>Upwards of 60% of all cars sold are diesel
>EPA finds out that diesel cars produce more particulate pollution
>EPA finds out that diesel cars consume more fuel than advertised
>VW group is caught in a scandal costing them $32bn

>FFW to today
>Most models no longer come with diesels unless they are for taxis
>Diesel cars still exist on the roads, however, increasing pollution in cities
>Cities ban diesel cars
>Price of used diesel cars go down
>All diesel cars are sold to people who live in rural areas where they are likely to drive more, thus increasing pollution

TL;DR: A 30 year effort to reduce pollution by the EU resulted in more pollution.

Is there anything they have done successfully?

Fun Fact:

San Francisco has spent $20 billion fighting homelessness since 2020.

They have ~8,300 homeless today.

That budget is $2.4 MILLION per homeless person.

Taxes have never been about helping the poor.

125 years ago, you didn't have to ask permission from the government to:

Collect rain water · Go fishing · Own property · Start a business
Renovate your home · Build a home · Use a transportation vehicle
Get married · Hunt · Own a weapon · Sell a product · Protest
Grow food on your property · Set up a lemonade stand · Sell food

You can do virtually nothing without being extorted by government and obtaining their permission first.
If you still think you're free, you're deluding yourself.

🎯 I've said it again, I'll say it again. Taxpayer-funded NGOs function as a parallel government.

Even worse, many sitting members of Congress are directly involved in them. They see themselves as the real government, prioritizing debates with other bureaucrats on the global stage over serving the people they represent.

This is why critical issues like healthcare, education, and help for Helene victims are consistently neglected.

Biden Administration Lost Track of Billions in Seized Crypto

Published 5 hours ago on February 22, 2025

The U.S. Marshals Service (USMS) cannot confirm how much bitcoin it holds. It is also struggling with serious organizational issues. The agency has attempted to address these problems through procurement, but the process has dragged on for years.

The USMS is responsible for managing assets seized during criminal investigations, including real estate, cash, jewelry, antiques, and vehicles. It is also tasked with handling cryptocurrencies—such as the billions of dollars worth of bitcoin (BTC) the FBI seized from the darknet marketplace Silk Road in 2013.

$40 Billion is enough to cure world hunger if you take it from billionaires, and completely inconsequential if you take it from the federal budget.

I claim all the time that 2020/2022 democide and injecting people with slow-killing gene therapies was done because elites are panically scared of full depletion of non-renewables, and they try to replace humans with AI and so far everything goes in this direction. Hey Grok, what would be optimal global population size taking into account current consumption patterns and non-renewable resource (such as silver) depletion? Answer short

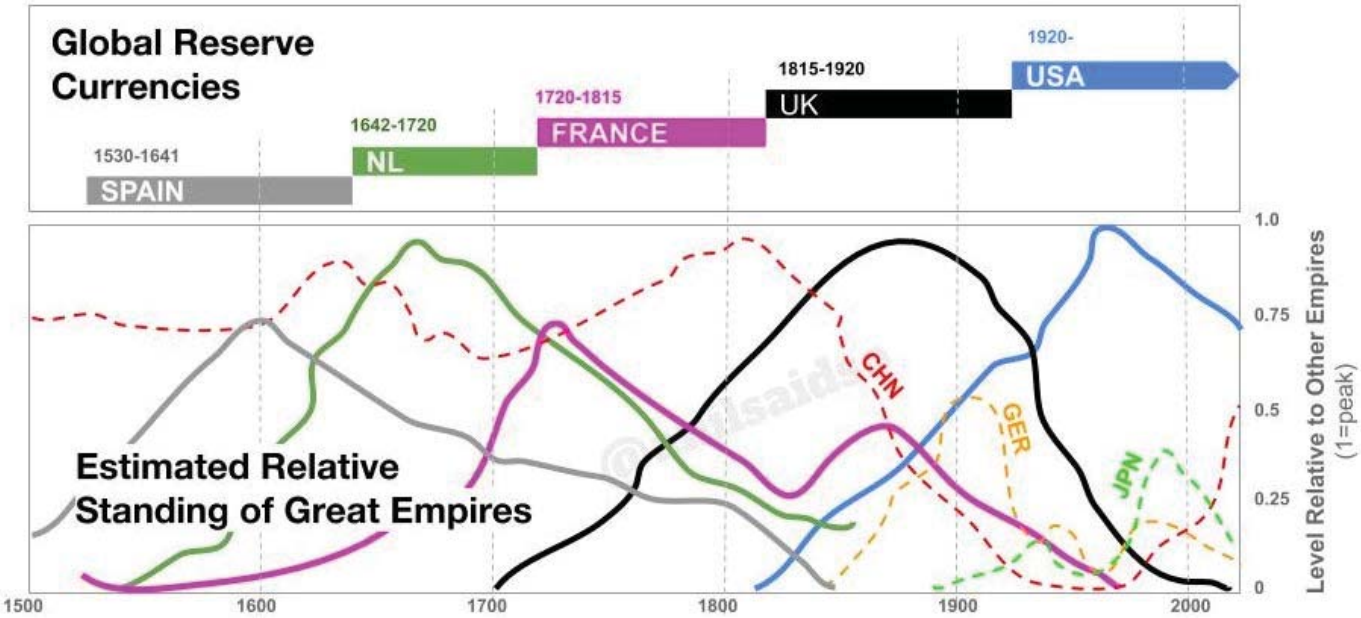
Estimates of Earth's **optimal sustainable human population** vary widely depending on assumptions about consumption levels, technology, and resource management.

With **current global consumption patterns** (requiring ~1.75 Earths per Global Footprint Network data), we are already in ecological overshoot, depleting renewables and non-renewables. Many studies suggest a truly sustainable level (no depletion) would be **1-3 billion people** at average current lifestyles, or **around 2 billion** if everyone lived like a middle-class Westerner.

Non-renewable resources like **silver** (critical for electronics/solar) face peak production ~2030s and potential depletion pressures by 2050 from green tech demand, reinforcing that current patterns are unsustainable beyond current ~8 billion without major



“The real problem is not the high taxes themselves, but the fact that they are not even really funding the government. So who’s financing the government? The government is financed by Treasury Bonds. And who buys the Treasury Bonds? Mostly the Fed. And how does the Fed buy them? By printing money! But what backing does the Fed have for that money being printed? The Treasury Bonds themselves! So, basically, you finance the government by printing money out of thin air. Someone could ask: if the government can unlimited amounts of money, why would they need taxes for? The answer is simple but it’s very shocking. The real problem is that you pay high taxes only to uphold the illusion that you are funding the government, which you are not.!

“The only one who can generate wealth in this country and in the rest of the world is the entrepreneur, not the politician. The politician either doesn’t know how to generate wealth or he doesn’t have the right incentives to do so. And when he wants to do it, the only thing he generates is corruption.”

My idea:
-Give vaccines to pregnant women
-Encourage prescription drug use in general by systematically suppressing methods and modalities which lead to identifying and correcting core problems. Encourage prescription use in general, but particularly during pregnancy.
-Induce birth with pitocin
-Clamp the umbilical cord before the completion of placental transfusion, the quicker you clamp, the better.
-Do not let the mother hold the child, take it away immediately.
-Inject vitamin K to increase blood viscosity. Dope the vitamin K with aluminum nanoparticles.
-Inject as many vaccines as possible right after birth with contents perhaps even the manufacture himself can only speculate at. Include magneto protein gene viruses.
-Circumcise the males. Females too really, why not.
-Wash the eyes out with silver nitrate.
-Wash the child roughly and under cold water.
-Put the child in incubators with high intensity magnetic fields, with a suitable excuse.
-Make sure if pitocin fails to prevent breastmilk production, something else will.
-Make the infant formula toxic and with the bare minimum in usable nutrients. Add heavy metals and base it on s oy, you need to finish destroying the gut flora with glyphosate as well.
-Poison the food supply as much as possible.
-Brominate the flour instead of using iodine.

-Fluoridate and chlorimate the water supply. Make sure to periodically spike the fluorine content to strip the mineralization of any lead pipes and deliver periodic, but otherwise undetectable, spikes of lead.
-Irradiate them with microwaves. Make them enjoy it. Get them addicted, make it a way of life.
-Give cone beam CTs and xrays to children at every possible instance.
-Whittle clans and extended families down to the nuclear family, then destroy that as well leaving children as effectively property of the state.
-Tax extensively, waste most of it. Prop up driven and power hungry, but incompetent members of communities. Reward them so they're wealthy enough to dominate town meetings. Schedule meetings accordingly.
-Brainwash with the media.
-Tamper with hormones and rework the legal system to encourage divorce.
-Control the weather at the cost of raining toxic chemicals on the population. Sicken and dumb them down as desired. Use ground based radar installations to irradiate these nanometals you've put in the upper atmosphere, diverting moisture accordingly. And more....

West Yorkshire Police encourages black and Asian candidates to apply early to become police constables before jobs opened up to others

One of the UK's biggest police forces has temporarily blocked applications from white British candidates in an attempt to boost diversity, The Telegraph can disclose.

West Yorkshire Police (WYP) is currently preventing white British candidates from applying for jobs as recruits to its police constable entry programmes. However, "under-represented" groups can lodge their applications early.

The process has raised concerns that white British candidates are being unfairly treated, amounting to a form of positive discrimination that could be potentially unlawful.

WYP has said the policy is to ensure that "diverse communities" are represented by the officers serving them. But former officers have accused it of effectively running a "hidden" recruitment policy that targets certain groups.

One whistleblower claimed black and far east Asian candidates were considered particularly under-represented and given a "gold" ranking, followed by those of south-east Asian origin who were in the silver tier. "White others", including candidates from Irish and eastern European backgrounds, were bronze.

The whistleblower, who was heavily involved in sifting job applications for recruits, said he raised concerns over the policy with bosses but was warned not to interfere.

In a report to senior officers, seen by The Telegraph, he said: "This feeds into a general theme where the pipeline for anyone white British is strangled, whilst anyone not white British is ushered through onto the next available stage."

Oswald Mosley warned of the threat to Britain as early as the 1930s, long before mass immigration. In the 50s he tried to stop the decline but was crushed by the state and betrayed by his own people.

Now major cities are foreign, the state serves outsiders, and 100,000 plus British girls were raped and tortured, a horror still ongoing. Nothing Mosley did even comes close to what your 'people' have done to this country.

This is insane. Canada imported 36.5% of it's population in the last 10 years.

And that's just what they tracked. They didn't provide the numbers for those who entered illegally because they have no idea.

To put this in perspective, 5% would be huge. 10% would be a crisis. 36% is an atomic bomb going off in every major city. No country on earth- not even the United States- has the infrastructure necessary to successfully integrate this many people in such a short amount of time.

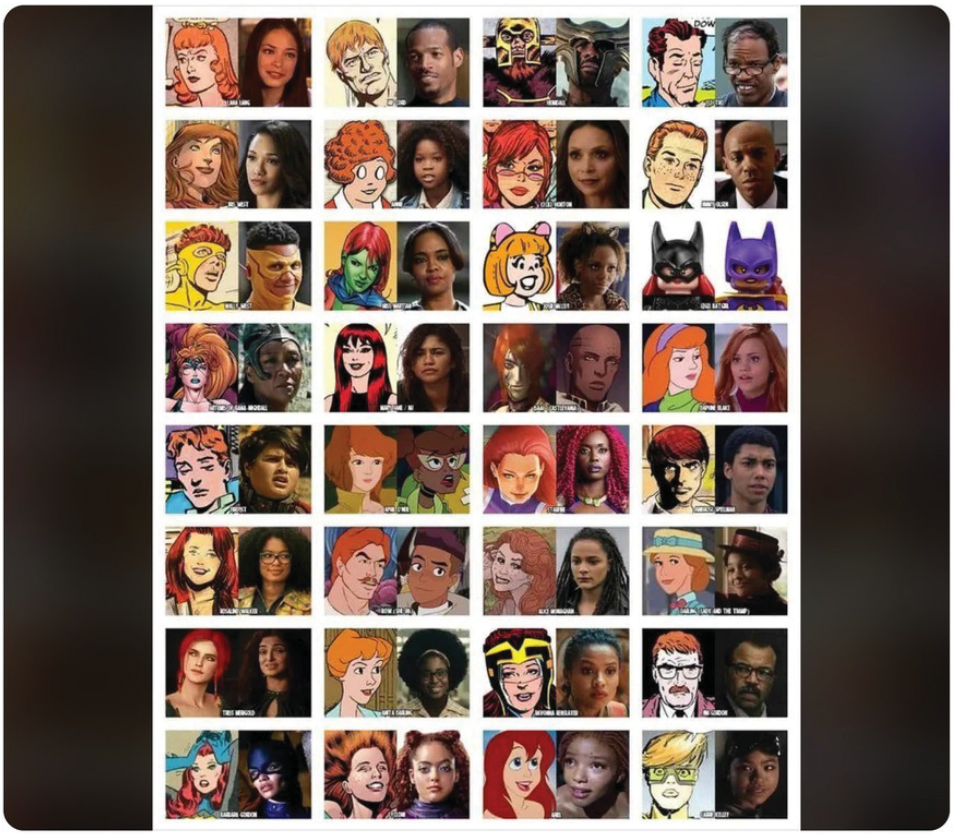
Is the replacement of gingers by POC's in movies prejudicial or simply because theres a lack of redheaded talent



I've noticed so many og redheads being swapped out for POC's, not saying it's a bad thing but I'm curious.

Is it cuz it's hard to find talented redheads or is it something deeper. They rarely switch out regular white folks with POC's, especially if they're the main character

I'd like to add I think that casting POC's for originally white characters is a good thing, regardless of hair color but I find it odd that it's often the gingers that get switched out

The bill's proponents in an overwhelmingly Democratic Congress asserted that its passage would not significantly influence American culture. Johnson said it was "not a revolutionary bill" because "it does not affect the lives of millions." During a debate on the Senate floor, Sen. Ted Kennedy (D-Mass.), speaking of its potential effects, said, "Our cities will not be flooded with a million immigrants annually. ... Secondly, the ethnic mix of this country will not be upset."

The Hart-Celler Act, so-called after its co-sponsors New York Congressman Emanuel Celler and Michigan Senator Philip Hart, opened the floodgates to new immigrants when it went into effect in 1968. But the vast majority of them didn't come from Europe; they came instead from Latin America, Africa and Asia. In 1965, non-Hispanic whites comprised over 85 percent of the American population. Fifty years later, that portion is just 62 percent, and falling.

It was news and no news; the most significant milestone in one of the most profound changes to affect the US in the past century, and yet a non-event. Last week the US Census Bureau issued figures showing that non-hispanic whites made up 49.8 per cent of the population of California.
Anglo-Saxon whites are already a minority in Hawaii and the District of Columbia. Now they are an ethnic minority in the country's most populous state, the one most usually identified with the American dream.

White British people will become a minority in the UK population within the next 40 years, a report has predicted.

An analysis of migration, birth and death rates up to the end of the 21st century predicts that white British people will decline from their current position as 73 per cent of the population to 57 per cent by 2050 before slipping into a minority by 2063.

The research, by Prof Matt Goodwin of Buckingham University, suggests that by the end of the century, the white British share of the population – defined as people who do not have an immigrant parent – could have fallen to around a third (33.7 per cent).

It's wild how the "declining population" narrative pushed by @VivekGRamaswamy lines up perfectly with the Indian government's master plan to flood the global workforce, starting with 30 million, ramping up to 250 million Indian nationals over the next 25 years.

India just launched an aggressive initiative to make this happen, relying on embedded Overseas Citizens of India in politics and business to rewrite policies and guarantee Indian control over jobs in America and other high-income countries.

The real goal? To become the world's "global talent hub" with $300 billion in extra remittances as a fast-tracked bonus. India needs 10 million new jobs a year to keep its population afloat, so they're forcing other countries to sacrifice their own workers for India's gain.

So, Vivek, did you laminate your OCI card?

Hope it was worth it selling out America.

I have been wasting my time

I have traveled to 57 countries and 6 continents. I have been to some of the world's least hospitable places: Afghanistan, Iraq, Senegal, Mauritania, Tajikistan... the list goes on. I have seen every face of the countries I've been to - the warmth of their people and the depth of their culture, but also the sources of immigration to the West and the out-of-touchness with regard to the expectations surround their reception upon arrival.

I've always prioritized more off-the-beaten-path destinations, but I've realized recently that this was a huge mistake. The Senegalese people are not being replaced by immigrants. Iraqi history is not being rewritten. Mauritanian film adaptations of historical events do not feature Finnish actors and actresses. There is no immediate threat to the cultural integrity of these places. While culture, language, and population change naturally with time, there is no impending shift that is of a degree of profundity pressing enough to warrant prioritizing these places over others. Senegal will be roughly the same in 20, 30, or 40 years' time as it is today.

Europe, on the other hand, is vanishing. Its people are being replaced. Its culture is ceding to those of its immigrants. Its population is being gaslit into believing that its history has always been one of immigration, and popular media reflects this by choosing people of color to portray historical figures.

150 000 young Pakistani workers will move to Belarus to alleviate labor shortages in agriculture and industry.

The agreement was reached today during a meeting in Minsk between Pakistan's Prime Minister Shehbaz Sharif and Belarusian dictator Aleksandr Lukashenko.

While I'm sure the causes are complicated, no nation has leaned more into "diversity is our strength, we don't need a melting pot we have a salad bowl" immigration insanity than Canada.

It has the highest foreign-born share of the population in the entire G7 and its living standards have stagnated.

JD Vance @JDVance

And with all due respect to my Canadian friends, whose politics focus obsessively on the United States: your stagnating living standards have nothing to do with Donald Trump or whatever bogeyman the CBC tells you to blame.

The fault lies with your leadership, elected by you.

I had a dream of the California fires last week
It was the only dream I ever had of Jesus
The sky was red and raining down swords of flames on the Hollywood hills. I went into a cave and when I came out I saw people that I know that have passed away and many I didn't know praying to a photo.
On it was st Jude and as you walked past the image it would change to Jesus
I'm not catholic so this part was weird.
That was my first ever schizo dream

Hollywood stars whose homes have burned to the ground as death toll climbs after devastating LA wildfires ravage California

A-list stars are picking up the pieces after wildfires devastated California's ritziest neighborhoods as the death toll reaches five. The homes of Anthony Hopkins, John Goodman, Adam Brody, Leighton Meester and Miles Teller are among those destroyed, while dozens of other stars now face an anxious wait alongside their neighbors to learn if anything could be saved. A staggering 30,000 people are still currently under evacuation orders after hellfire ripped through Los Angeles on Monday.

Mandy Moore is "kindly" telling trolls to "F off" after she shared a crowdfunding link to help her in-laws following the Eaton fire where they lost their home.

The *This Is Us* star shared a post on Instagram where she said her brother-in-law and sister-in-law had "lost their home and everything they own in the Eaton fire."

"With their first baby on the way in a matter of weeks, they need our support now more than ever," Moore shared on Instagram, inviting her followers to donate to their GoFundMe page, which had initially set a goal to raise $60,000.

A lot of people dunking on Sam for this take but let me explain. The first rule of journalism is that whenever something bad happens, you have to blame the bad thing on the Republican in Closest Proximity (RICP). In the event that you're stuck with a Dem mayor and Dem gov and Dem pres, then there's no one to blame for the bad thing because there is no RICP.
In such cases, you have to pivot to this: imagine how bad things WOULD be if there WAS a Republican around. It's called a Hypothetical Republican in Closest Proximity (HRICP) and it works. They teach this stuff in J school.

The swift devastation of the #PalisadesFire is horrible. And then it dawns on you that Trump, set to take office in 13 days, has threatened publicly to cut wildfire aid to the state.

In the infamous TDR map of Gotham there is a location called the palisades where wayne manor is located.
Interesting if you flip the map it aligns with the coast of californias palisades.
In the first movie, Batman begins, Wayne manor is torched to the ground in the palisades and is rebuilt so it could be closer to the underground caves. The caves his ancestors use to use during the Underground Railroad to transport slaves. This of course later is his bat cave.
If you listen to ras al ghuls speech during the scene he explains how the league of shadow took on a different style of collapse with Gotham city. Economic, but the death of Batman's parents ruined their plan because it gave the citizens more hope. This slowed the decay of the city for them to rebuild over it. Thus leading them to be more extreme and directly destroy Gotham.

(57) **ABSTRACT**

A directed energy weapon includes a number of laser units, each including a fiber laser generating an output beam with a power of at least 1 kW from a fiber, an objective lens arrangement for focusing the output beam into a focused beam directed towards a target, and a fine adjustment mechanism for adjusting a direction of the focused beam. A beam deflector arrangement is deployed to deflect a portion of the focused beam from each laser unit as a deflected beam in a direction in predefined relation to a direction of the focused beam. An angle sensing unit generates an output indicative of a current direction of said deflected beam for each of said laser units. A controller actuates the fine adjustment mechanisms based on the output from the angle sensing unit to maintain a desired relative alignment between directions of the focused beams.

I'm an actuary for a large insurance company. We have AI proprietary software that maps insured assets along with weather forecasts and trends that are remarkably accurate. The system constantly models predicted losses and once the figure exceeds a certain number, cancellation letters are automatically generated for the insured in those locations. The model takes into account rainfall, humidity, seasonal winds and water levels in reservoirs. It's ability to predict is nothing short of miraculous.
The homeowners will be offered new insurance if the algorithm deems it safe. Read your policies. Insurers may cancel at any time and for any reason.

>insurance companies sure act like it is real.

Nope.
Cali put a hard limit on how much you can charge for insurance. Company looks at min/max numbers knowing that every few years California catches on fire. Company knows this because we have records going back to the Spanish Missionaries of 1700 writing about how the hillsides burn all the fucking time. So, housing market says your shack in Malibu is worth 800,000 dollars but your insurance is capped at 300$ a month and there is a non-zero chance it's going to burn depending on the weather. Then the state decides that water is bad, dead underbrush is good, DEI fire departments are the right side of history, and Avocado farms get priority to the water that is in the reservoirs and LA can drink dust and then get fucked.

>THEY CANCELLED THE INSURANCE!

Of course they fucking did. The spreadsheet told them too.

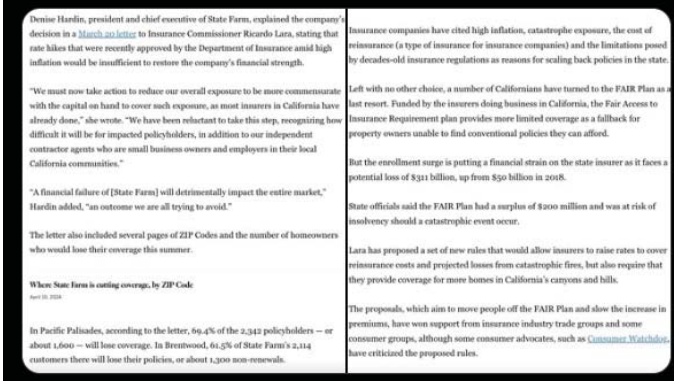
Last year, State Farm canceled 1,600 policies in Pacific Palisades because the state would not allow them to raise premiums enough to cover their exposure. The affected homeowners would then likely have to rely on the state-run FAIR Plan, an expensive last-resort insurance program. But the FAIR Plan reportedly only had a surplus of $200 million as of April 2024 and was likely to become insolvent if a catastrophic event occurred.

Governor Newsom goes around posturing about politics instead of trying to solve urgent problems. Our state government takes billions of dollars from hard-working Californians and provides barely anything in return. An unconscionable failure.



Denise Hardin, president and chief executive of State Farm, explained the company's decision in a March 20 letter to Insurance Commissioner Ricardo Lara, stating that rate hikes that were recently approved by the Department of Insurance amid high inflation would be insufficient to restore the company's financial strength.

"We must now take action to reduce our overall exposure to be more commensurate with the capital on hand to cover such exposure, as most insurers in California have already done," she wrote. "We have been reluctant to take this step, recognizing how difficult it will be for impacted policyholders, in addition to our independent contractor agents who are small business owners and employers in their local California communities."

"A financial failure of [State Farm] will detrimentally impact the entire market," Hardin added, "an outcome we are all trying to avoid."

The letter also included several pages of ZIP Codes and the number of homeowners who would lose their coverage this summer.

Where State Farm is cutting coverage, by ZIP Code

In Pacific Palisades, according to the letter, 69.4% of the 2,342 policyholders — or about 1,600 — will lose coverage. In Brentwood, 61.5% of State Farm's 2,114 customers there will lose their policies, or about 1,300 non-renewals.

Insurance companies have cited high inflation, catastrophe exposure, the cost of reinsurance (a type of insurance for insurance companies) and the limitations posed by decades-old insurance regulations as reasons for scaling back policies in the state.

Left with no other choice, a number of Californians have turned to the FAIR Plan as a last resort. Funded by the insurers doing business in California, the Fair Access to Insurance Requirement plan provides more limited coverage as a fallback for property owners unable to find conventional policies they can afford.

But the enrollment surge is putting a financial strain on the state insurer as it faces a potential loss of $321 billion, up from $50 billion in 2018.

State officials said the FAIR Plan had a surplus of $200 million and was at risk of insolvency should a catastrophic event occur.

Lara has proposed a set of new rules that would allow insurers to raise rates to cover reinsurance costs and projected losses from catastrophic fires, but also require that they provide coverage for more homes in California's canyons and hills.

The proposals, which aim to move people off the FAIR Plan and slow the increase in premiums, have won support from insurance industry trade groups and some consumer groups, although some consumer advocates, such as Consumer Watchdog, have criticized the proposed rules.

What caused FAIR Plan's surplus drop?

Why can't insurers raise premiums

New wildfires erupt across Los Angeles as 30,000 people evacuated

Wildfires are burning across Los Angeles, including in the Pacific Palisades, north of downtown in Pasadena, and in the San Fernando Valley.

Devastating fires torched more homes and businesses in Los Angeles County on Wednesday, exploding in size and adding to the more than 1,100 structures that had already been destroyed by dawn, with one early estimate putting the potential damage at near $10 billion.

Landlords seizing their opportunity to profit from a catastrophe

Ms. Jones has been scouring the West Los Angeles rental market to find a house that the family could rent for the next eight months, or longer. On Friday morning, she noticed something disturbing on the rents of at least three of the properties she had been tracking: 15 to 20 percent increases overnight.

The sudden surge in rental costs took Ms. Jones by surprise, but aligned with what she has noticed since wildfires started to tear through the Los Angeles area on Tuesday. Ms. Jones was touring a rental house in Beverly Hills with her client on Thursday when the listing agent raised the monthly cost by $3,000 — on the spot. Agents and landlords are aware that some displaced Angelenos might be willing to pay given the circumstance.

I don't think people in this shit hole understand the gravity of this

There is no "save state" that will bring any of this shit back

It's gone. The most expensive area in California has been turned into ashes. It's gone, forever. It's forever gone. It will never come back. It's turned down. It's incredible to think about.

Furthermore, who will rebuild here when everyone is and has been moving to Florida and Texas? Who will rebuild Malibu, and why? It's not inherently amazing. It's just a coast line and now it's full of junk, debris and ashes. California's most expensive area is gone forever. It s literally historic. Not even Detroit saw an event like this and Detroit is forever ruined.

And the fire hasn't been stopped yet.

Fire hydrants ran dry as Pacific Palisades burned. L.A. city officials blame 'tremendous demand'

As wildfires raged across Los Angeles on Tuesday, crews battling the Palisades blaze faced an additional burden: Scores of fire hydrants in the Pacific Palisades had little to no water flowing out.

EXCLUSIVE REVEALED: LA's $750k-a-year water chief 'was aware of empty reservoir and broken fire hydrants months before fires'

UNFORGIVABLE
The $750,000-a-year LA water czar is responsible for a raft of failures that contributed to the devastating Palisades Fire, fire department insiders told DailyMail.com. On Mayor Karen Bass's orders, the city maxed out its budget to 'attract private-sector talent', hiring Department of Water and Power (LADWP) CEO Janisse Quiñones on a $750,000 salary in May.

One billionaire couple owns almost all the water in California.

In 1994, the Resnicks secretly seized control of California's public water supply.

Now their companies use 150 billion gallons every year while working class people suffer under drought conditions.

Learn more

No, Stewart and Lynda Resnick do not own 90% of California's water, but they do own a significant amount of the state's water resources:

Kern Water Bank

The Resnicks own a 57% stake in the Kern Water Bank, a public-private partnership that stores water underground. The bank can hold up to 500 billion gallons of water.

Water use

The Resnicks' agricultural businesses are thought to use more water than any other family, farm, or company in California. In some years, they control more water than the residents of Los Angeles and the San Francisco Bay Area combined.

Water rights

The Resnicks have maneuvered California's water rules to their advantage. They can sell water back to the state water systems during droughts.

Water investments

The Resnicks have invested $100 million in technology to manage water shortages, including drip irrigation systems, solar energy networks, and fuel-cell research.

Water impact

Some say the Resnicks' water use has negatively impacted the environment, including draining rivers, mass fish extinction, and exacerbating the state's drought crisis.

Land ownership

The Resnicks own over 185,000 acres of farmland across California.

An LA Department of Water & Power spokesman confirmed reports of reduced water flow from hydrants but provided no details on the number or scope of the issue. In a statement to the *Los Angeles Times*, the agency said crews were working to maintain water supplies, which rely on water tanks.

The extent and cause of the problem remain unclear. Similar hydrant issues hampered firefighting efforts during Ventura County's Mountain fire in November when inactive water pumps delayed hillside water delivery.

Amid such issues, Crowley is facing scrutiny.

Who is Kristin Crowley?

Crowley is the first woman and first openly LGBTQ+ person to hold her post. She is married to retired firefighter Hollyn Bullock.

Her nomination came after former Fire Chief Ralph Terrazas stepped down amid growing scrutiny for not doing enough to stop sexist and racist behavior within the Los Angeles Fire Department.

Mayor Eric Garcetti said at the time that he nominated Crowley to the position not due to her gender but due to her abilities and skill with public safety challenges.

"I look for who's best, not just who makes history," Garcetti said at a press conference. "Because the protection of our city first and foremost has to go to the human being who is best prepared to lead. But, let me be clear, that is Kristin Crowley. And this progress is incredibly important and long overdue."

When she was nominated to her position in 2022, she had been with the fire department for 22 years, having been a firefighter, paramedic, engineer, fire inspector, captain, battalion chief, assistant chief, fire

What another AMAZING "coincidence"

California had just passed new tax laws, if your home burns down and you don't rebuild within 2 years (impossible in California) you lose your tax basis. Your property taxes SKYROCKET to the new values of the property

"Think about a home that was purchased many years ago for $5 million. Let's say they were paying $65,000 a year in property taxes. Property goes up a lot over time, especially in these areas. Maybe the value today is $30 million. They go to rebuild it. If it was not, if they couldn't transfer the tax basis, you're looking at like $400,000 a year that they would have to pay"

"In 2020, California voters approved a bill that basically said that if your house burns down in a fire, you can transfer the tax basis of that property to something that you buy or something that you build. But you only have two years to do it."

So some of the most expensive homes and properties the entire world now will get reassessed to pay maximum property tax values....

The Resnicks—whose pistachio orchards use more water than all the homes in LA—donate up to 500k to the IOF each year.
Based on tax records from their foundation, they've given anywhere from $500,000 to $200,000 to the Israeli military every year, with most of it funneled through an outfit called the American Friends of the Israeli Defense Forces.[1] Adding it all up comes to millions of dollars — $2.4 million just between 2015 and 2022.

As someone who was stalked by a pedophile from the ages of 8-11, I can tell exactly what point this girl is at. This isn't the first time pedo Muslims have harassed her and her sister. She's exhausted every avenue of pleading to the adults to help her. And they've failed. They're afraid of the power structure. They "don't know what else to do." They've essentially told her, she's on her own.

That's what you see here. A 13-year old girl that knows if she doesn't protect herself and her sister, they're going to end up like all the other girls who got abducted by Pakistani rape gangs. And she's decided she would rather kill than be a sex slave.

This girl has more courage than the adults who surround her, who won't risk their "freedom" - actually subservience to the system- to stand up for what's right.

I pray that we get to a point where the right people are in charge and every single one of these pedo invaders is hunted down like the dogs that they are.

BREAKING - 22-year-old **Tyler Robinson** of Utah is now in custody for involvement in the assassination of Charlie Kirk with his father holding him until police were able to arrive on scene to arrest him.

XGolfsalotX @1Golfsalot1

Written on the bullets of Tyler Robinson:
"Hey Fascist! Catch!"
"If you read this you are gay, LMAO."
"*notices bulge* OWO what's this?"
"Bella Ciao"

1. "Hey Fascist! Catch!"
- This is a confrontational phrase — it implies throwing something (like a rock, brick, or Molotov cocktail) at someone perceived as a fascist
- It's often used in leftist / anarchist meme culture as a shorthand for violent resistance against fascism.

2. "If you read this you are gay, LMAO."
- This is a very common **bait joke** in internet forums, imageboards, and comment sections.
- It doesn't actually mean anything about sexuality — it's just trolling humor that "traps" the reader with a silly, juvenile statement.

3. "notices bulge OWO what's this?"
- This comes from **"owo/uwu speak"**, a cutesy furry / anime roleplay style of typing.
- The phrase "notices bulge" is a deliberately exaggerated, mock-innocent reaction to seeing someone's private area.
- It's a meme that pokes fun at cringy online flirting.

4. "Bella Ciao"
- This is an Italian partisan song from WWII, sung by anti-fascist resistance fighters.
- It has since become an international protest anthem, and was popularized again by the Netflix show *Money Heist (La Casa de Papel)*.
- Used in this context, it would signal left-wing, anti-fascist solidarity.

This man says he went to high school with Charlie Kirk's accused assassin, Tyler Robinson.

He describes him as nothing more than a "Reddit kid."

According to him, Robinson may have spent all his time online and may have done something stupid just to "impress his friends."

This is Tyler Robinson, the fucking SOCIALIST murderer, as can be read on his Salt Lake DSA (Democratic Socialists of America) t-shirt, who has murdered Charlie Kirk.
May he rot in jail for the rest of his life.

@HealthRanger

In the process of faking evidence, the FBI is too stupid to even mount the riflescope in the correct position in their process of fabricating fake evidence. This rifle is unshootable in a prone position for a simple reason that's obvious to anyone who has ever shot a rifle in a prone position. The FBI thinks you're stupid. This rifle was planted. 100% theater. The inscriptions on the bullets? Almost certainly written by the FBI.

About the Shooter

Suspect Profile: Tyler Robinson

Tyler Robinson, a 24-year-old white male standing 6'1" with brown hair and a medium build, is the focus of the manhunt. He was last seen fleeing the rooftop in dark clothing and a backpack, captured on surveillance video sprinting toward a wooded area near the campus. Key details:

- **Background**: Robinson is a former University of Utah student who dropped out in 2023 after studying computer science. He has no prior criminal record but was involved in left-wing activist circles, including protests against conservative speakers on campus. Social media posts under the handle @TyRobRevolt (now suspended) show him expressing anti-fascist views, praising Antifa tactics, and criticizing figures like Kirk as "propagandists enabling white supremacy."
- **Antifa Connections**: Law enforcement sources indicate Robinson's online activity aligns with Antifa ideology. He reportedly attended Antifa-linked training sessions in Portland, Oregon, in 2022 and shared content from the John Brown Gun Club, an armed Antifa-affiliated group known for providing firearms training to activists. A shirt worn by the suspect in the escape video featured imagery associated with John Brown, the 19th-century abolitionist often invoked as a symbol by radical left groups for violent resistance against perceived oppression. However, officials have not officially classified the shooting as a domestic terrorism act tied to Antifa, pending further evidence. Some X users and commentators have labeled him an "Antifa clown" or called for harsh punishment, reflecting polarized online reactions.
- **Motive**: Preliminary investigations point to ideological opposition. Kirk's organization has been a frequent target of left-wing protests, and Robinson's posts referenced Kirk's role in "inciting hate" during the 2024 election cycle. No manifesto has been found, but digital forensics are ongoing.

Michael Savage: SOMETHING IS VERY WRONG

Michael Savage is not low profile. He hosts a program called Savage Nation, and he is onto this the same way I am, though I am being more direct. SEE THIS! He's scared of consequences while he says this, but it is BANG ON.

"Something's wrong. I know I shouldn't do this. I'm risking an awful lot to go up against this FBI, the maga FBI. Something's very wrong with what I just heard. I mean, I watched it. I was hoping that they had caught the bastard who shot Charlie. So we saw a video of a person jumping off the roof. It looked very legitimate to me. However, there was no rifle in his hand.

"Now, the Mauser does not break down very easily. Incidentally, for those of you who know weapons, something's wrong with the whole thing. They're trying to claim he removed the barrel from the Mauser and fit the receiver and stock in his backpack and barrel in his pants, like, all in two seconds. It is not easy to remove a Mauser barrel or index it after reinstalling and remain accurate.

"We are not hearing or seeing reality. And by the way, the photo of the rifle allegedly left in the woods has the barrel installed. So we're supposed to believe a guy is on the run after killing Charlie Kirk, and he pauses in the woods to reinstall a barrel and then he leaves it for us to find? The FBI to find. I don't believe a word of it.

"I shouldn't do this. I know I'm putting myself at risk, but I can't take it anymore. I can't take the bullshit from this fucking government is lying to us. Something's wrong. Something's so wrong, it's sickening.

"They found the rifle and they're getting the prints. Are you stupid? Are you that stupid? Are you that dumb? The man jumps off the roof. There's no rifle there. Oh, it's in his backpack. I just told you moron, that this rifle doesn't break down that easily. And then it's supposed to be reassembled while he's on the run. Wait, I'll stop now and reassemble it and leave it in the woods in a box, wrapped in a towel. He left breadcrumbs. Oh, and the trans anti. The trans stuff on the cartridges. Bullshit. Something is wrong with this whole fucking picture."

My comment: Your'e damn right.

I also questioned why there was no gun in the video but blew it off as pixel binning. **HOWEVER,** I owned that exact same bolt action Mauser in .270 and you WILL NOT take the barrel off. They chose that mauser because it can consistently hit within five centimeters at 400 yards if the shooter can. At least, that's how good I was with it. **ANYWAY**

If the FBI is claiming he took the barrel off on the roof before he jumped, and that's why no gun is visible in the video, that's PURE BULLSHIT, that Mauser is NOT a Beeman Silver Kodiak (which I also owned) and even with that gun, I'd have a hard time breaking down the barrel and stuffing it in a backpack that quick when the silver kodiak is designed for it.

NO DAMN WAY that Mauser was broken down like that, I OWNED THE BITCH AND THERE IS NO EFFING WAY, FIRST HAND KNOWLEDGE, that rifle is tighter than tight, IMPOSSIBLE to get it apart like that without special tools, full knowledge, and a half hour BY A GUNSMITH.

If their story is he broke that gun down, that right there is proof he's a patsy and the FBI did this shooting on behalf of Israel.

This is more than a highway off a cliff, or into death valley or whatever, the FBI can't take it back, breaking down that Mauser is a Bugatti on the highway to stupid.

I hated the Mauser because it was SO TIGHT. I loved the Mauser because it was SO TIGHT you could hit a knat's ass at 500 yards if you had an idea of where the gnat was. It was impressive that way but loading it was difficult and working the bolt was difficult because it was so tight. But I left it that way (I did not try to loosen it at all) because I knew all that tightness equaled ACCURACY. And it also means the FBI IS FULL OF IT.

I don't think anyone is comprehending the repercussions of NOT finding the killer.

So there were about 5 guys with toughguy sunglasses and mustaches all visibly scanning for threats, and they were all facing this way.

None of those guys saw the shooter right in front of them??

Acoustic analysis confirms shooter was near ground-level, ~70-90ft away — not a rooftop.
Crack–bang intervals across all recordings: 0.08–0.14s = 70–90 ft distance (speed of sound @ 82°F = 1141 ft/s)
Closest audio clip shows total crack/bang overlap, impact clear = <100 ft

Here is another version with (7) mic locations plotted vs (3), it gets crowded but for transparency I felt it was important to showcase some more angles plotted as well.

Even at max error margin, a shot from the rooftop simply doesn't match the audio.

So now new medical data states that the bullet entered Charlie's neck at C2, obliterated C3, C4, C5, C6, C7 and then lodged in T1. Also, Charlie was leaning slightly forward when he was struck by the round, slightly to the left of his Adam's Apple. So with that gradual 10° downward angle, it should've entered around C7 or T1. With the height of the roof and range that Robinson was at, it's mathematically impossible for the bullet to enter at C2. C2 is nowhere close the wound in his neck. Or perhaps the bullet hit T1, bounced up to C2 and then back down to T1. 🤦 At this point the official story has become nothing more than a tall tale.

The Stinger is a single-shot re-loadable .22 magnum pen-gun, perhaps the single most popular weapon of the C.I.A. In 1966 the Stinger has been "swallowed" by an Asahi Pentax 35mm SLR and properly cocked via camera's film advance lever. It shot by shutter release button breaking the lens elements in front of it. James Bond Inspired I gather, not the other way around.

True, the suspicious camera man seems to be the most likely culprit given the line of sight and that he was in that point of the amphitheatre.

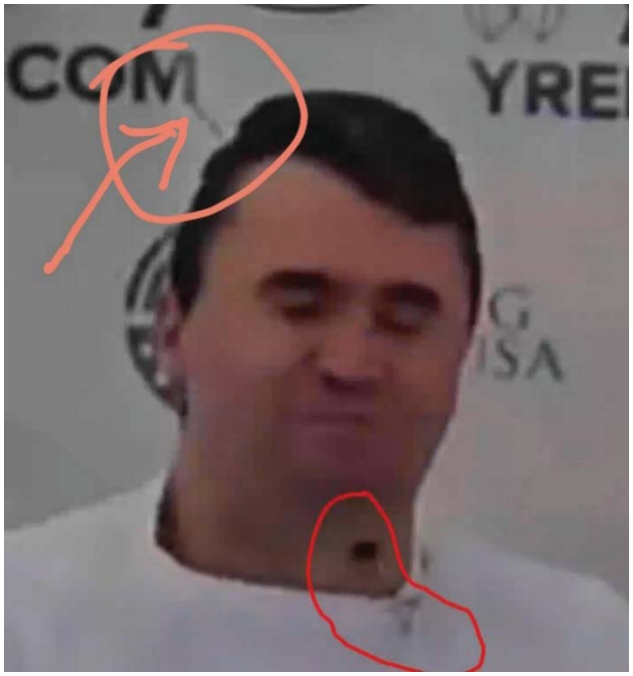
Forgive the autism geometry which is off the cuff. I am essentially trying to determine what his possible range of motion would be in this stance, maintaining that grip of the camera whilst still having a "sight picture", and position relative to Charlie and where the shot appears to land.
Really I need to determine the difference in height between this asphalt area behind the curb where the cameraman is standing, relative to the platform which Charlie is seated on and the security is standing.

The trajectory of the bullet relative to this man is an unsolved problem, since I'm assuming it is a very low velocity, heavy grain projectile tailor-made for close range assassination.
There is only so much barrel length + suppressor one can fit in such a camera, and no one would be using such a device for a long range precision kill. It would not be out of the question for it to have an ever so slightly arced trajectory at such a close range if it were such a specialized, close range round.

I am thinking about a capandball YT video I watched this week which tested out extremely low velocity musket ball loads and their potential lethality to simulate the terminal velocity of a 17th century matchlock musket ball striking flesh at very long ranged targets. A heavy projectile remains lethal at extremely low velocities.
In the case of capandball video it was ~600gr musket ball that was still lethal at speeds as slow as 104-200 m/s, well below the supersonic speed of ~334 m/s at 4700ft above sea level where this event took place.

Alt / With a “Camera” 2

The first question is: **Why is there a camera pointed at the back of his head???**
What were they hoping to “shoot” exactly from that angle?



Lens turns opaque frame by frame (because of the smoke?)

First thing removed from the crime scene – by some random sayan, ***not even by the FBI*** – was that camera.

He took the SIM out, that not-FBI foreign agent...

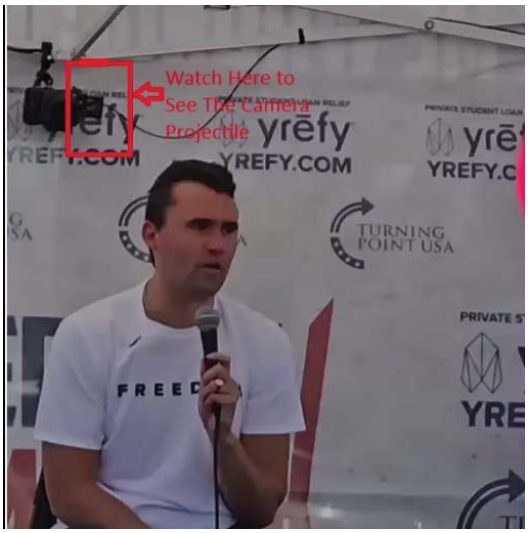
https://www.youtube.com/watch?v=aDlhjfW6hz8&t=6m20s [Embed]
She doesn't show the footage. She's trying to get him to release it. But if she's not lying, and she delivers...Tyler is essentially confirmed not the shooter. Because no way does a 30.06 round enter his neck in the front and not exit the other side of his body. Added to the fact that there's no visible blood or gore on the banner that was behind Charlie, nor any damage to it, and it didn't even move when Charlie was shot...yeah, no way is Tyler the shooter in any reality.

So she says...



We can clearly see a triangular object poking out of and into his neck

The object is attached to the wound. It is NOT his necklace. His Necklace is a rounded object not a triangle

This arrow/ projectile is what killed CK.

This is clearly NOT A BULLET.

100% No question about it. Look at this guy on X before he gets shut down or Jews murder him too.

https://xcancel.com/jonaaronbray

He is right and everybody is going to know it. There was no bullet. Like the pagers, Kirk's hidden mic under his shirt was wired with explosives and designed to launch the clip holding it on the outside of his shirt like a projectile. His necklace and earpiece fly off first because of the explosion. The clip flies into his neck and kills him. He's got no vest on and it wouldn't have saved him anyway. There is no bullet. No real shots were fired. The brown shirt guy might even have aimed it somehow. How Kirk didn't take damage from the explosion itself you'll need to ask Mossad.

Kikes are fucked because everyone will see exactly how he was killed pretty soon.

>mic beneath shirt explodes
>shirt billows across his chest left to right
>mic clip launches in same direction
>mic clip creates the alleged bullet entry wound

No bullet was fired. Killed by Mossad personal electronic device, just like Hezbollah.

He's also wearing this under his shirt. The rectangle is a magnet and that was holding it in place on the outside. The mic box explodes like a shaped charge and the magnet is launched into his neck. Watch the vids:

It's a good question to ask why he would need both. I don't know. Maybe the reason was innocuous.

Release the lion. Remember the clasp. The truth will set us free. We must administer a wide protocol of examining any batteries in close proximity to politically important individuals. This was not a shooting.

Correction... the brand is RØDE Wireless PRO transmitter.

Jon Bray @jonaaronbray · Sep 17

This is the battery for the DJI Mic 2 transmitter that was underneath Charlie's shirt. This is a 8 gram 300mAh battery that's unique in that it's very easy to swap. A 2 gram charge of PETN would match the power of a .30-06 and leave 75% of the battery functional. Undetectable.

Jon Bray @jonaaronbray · Sep 17

You can see the shock wave travel from the DJI Mic 2 outward. His neck and ears quake with the force and his ear piece flys up as his body is slightly lifted from the explosion. His shirt deformation show a directed blast across his chest with the wave peaking around his neck.

Jon Bray @jonaaronbray · Sep 17

As the shock wave travels across his body the magnetic clasp is flung across his body in just a few frames it dissappears into his neck. The wound that appears is the same size as the clasp and displays flow patterns of a low velocity impact.

Jon Bray @jonaaronbray · Sep 17

The DJI Mic 2 is a wireless microphone with a rectangular magnetic clasp. This device has a 300mAh battery that weighs 8 grams.

Jon Bray @jonaaronbray · Sep 17

On that day Charlie had the microphone mounted with the bulk of the device underneath his shirt. Notice the magnetic clasp on his shirt and the angle that it rest.

bringing the total to 11. With the complete set and your description of a high-energy event causing the magnetic clasp to fly across the seated individual's chest, here's the final analysis:

- **Observation**: The fabric deformation is most prominent in the initial images (1-4), where the black rectangular magnetic clasp is seen moving from its original position near the center of the chest toward the shoulder or side. The deformation manifests as stretching or tearing radiating outward, with the intensity decreasing in later images as the clasp stabilizes. The sequence clearly shows the progression of the event.
- **Energetic Epicenter**: The epicenter of the deformation is consistently located at the initial position of the magnetic clasp, approximately at the center of the chest beneath the shirt. The outward movement of the clasp and the radiating fabric distortion suggest a sudden, localized energy release—likely an electrical discharge or mechanical impact—originating at this point. The clasp's trajectory across the chest reinforces this as the focal point of the event.
- **Detailed Progression**:
  - Images 1-4 show the peak deformation and clasp movement, with the fabric stretched most severely around the initial clasp location.
  - Images 5-8 depict the clasp further displaced, with residual deformation trailing its path.
  - Images 9-11 show the fabric settling, with minimal additional distortion, indicating the energy release was brief and concentrated.
- **Conclusion**: The energetic epicenter is the original position of the magnetic clasp on the chest. The deformation likely resulted from a rapid force (e.g., an electrical fault in the microphone system) that overcame the clasp's magnetic hold, propelling it across the chest and stretching the fabric outward.

Based solely on my analysis of the two angles of the events on September 10th I have come to the conclusion that this is the object that struck Charlie Kirk in the neck.

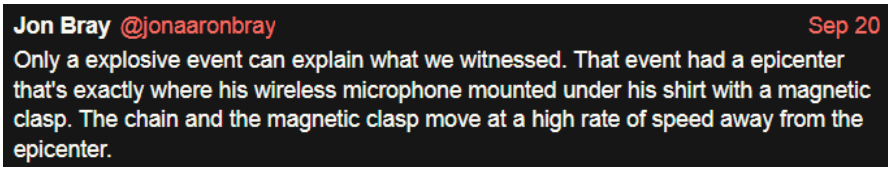
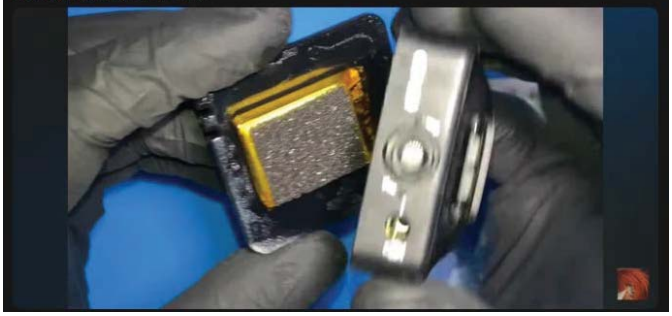
Please help me get this to the appropriate people. We have little time to take action. My vector flow analysis is complete and I am afraid that's it's conclusive. Charlie Kirk was assassinated by a hidden shape charge. The battery of his RØDE Wireless mic exploded via detonation
Optical Flow - Frame 0



Jon Bray @jonaaronbray
Sep 20
Only a explosive event can explain what we witnessed. That event had a epicenter that's exactly where his wireless microphone mounted under his shirt with a magnetic clasp. The chain and the magnetic clasp move at a high rate of speed away from the epicenter.

Jon Bray @jonaaronbray Sep 18

The battery is still very easy to swap and would be undetected once replaced with the battery holding the PETN.



Jon Bray @jonaaronbray Sep 18

This would be very easy to swap this battery with a slightly smaller battery and place the 2 grams of PETN, a small ignition device and controller chip in the space left over from the smaller battery. The design of the case and battery would also make a shaped charge possible.

Jon Bray @jonaaronbray Sep 19

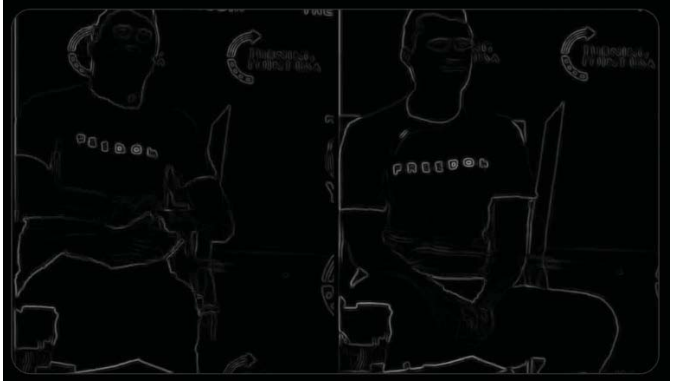
Last frame. The lavalier microphone cable is now on the other side of his body and still flying. The same force that flung the magnetic clasp also pulled the ear piece with equal force. This further demonstrates that the energy from this event originated from the RØDE unit.

Jon Bray @jonaaronbray Sep 19

The shot from the back theory is built on a exit wound to the neck which is clearly a entry wound from the clasp that held the microphone onto Charlie's shirt. We have the trajectory, the wound shape and the wound type as evidence of this fact, The cord is futher evidence of this

Jon Bray @jonaaronbray · 1h

Step 1: The Incident—Two Events in One. Kirk, 31, was speaking to 3,000 people when a loud pop rang out. He clutched his neck, fell, and chaos ensued. Video shows a radial energy spread and a magnetic clasp striking his neck—two actions, not one.



@jonaaronbray

Step 3: The Evidence-Blast reveals a 15-20cm radial deformation on his shirt, no exit wound—unlike a bullet. This screams internal blast. The clasp striking his neck isn't bullet debris, it's the mic exploding apart. I mapped the energy vectors; it's a pattern, not chaos.

11:03 AM · Sep 22, 2025 · **404** Views

Step 4: The Hypothesis—Acoustic Trigger and PETN Here's my theory: a 2-3g PETN charge (effectiveness 1.66) in the 350mAh battery detonated, mimicking a .30-06's 3,000 ft-lbs. But the rifle shot? It was real, an acoustic trigger timed perfectly to mask the explosion.

6 people have now been confirmed to have advanced knowledge of Charlie Kirk’s assassination.
What do they all have in common?
They are all transgender.

Well this confirms my suspicions the trans community was in on it. Even if Sky and Salty didn't pull the trigger there are just too many signs they were aware of a planned shooting which was probably discussed through that discord and assisted by mossad. Tyler has the most gun experience out of them, that's for sure

WHO WE ARE
AJC is the global advocacy organization for the Jewish people.
American Jewish Committee (AJC) stands up for Israel's right to exist in peace and security; confronts antisemitism, no matter the source; and upholds the democratic values that unite Jews and our allies.
In the wake of Hamas' brutal October 7 attack—the worst massacre of Jews since the Holocaust—AJC has mobilized its unparalleled global network to tackle the unprecedented threats facing world Jewry.
From world capitals to college campuses, AJC works with leaders across society to support Israel and combat surging antisemitism, and we leverage strategic communications to educate, counter misinformation, and shape public opinion.

The Shooting of Charlie Kirk: A Comprehensive Account of the Utah Valley University Attack, the Aftermath, and America's Response

Kindle Edition

by Anastasia J. Casey (Author) | Format: Kindle Edition

1.0 ★☆☆☆☆ 5 ratings

On September 10, 2025, the campus of Utah Valley University was forever changed. During a scheduled event featuring Charlie Kirk, the prominent conservative activist and founder of Turning Point USA, a shocking act of violence unfolded that shook students, faculty, and the nation. This book provides an in-depth, humanized account of the shooting, the immediate aftermath, and the ripple effects that reached far beyond Orem, Utah.

Through detailed reporting, firsthand testimonies, and careful analysis, *Charlie Kirk and the Utah Valley University Shooting* explores the event from every angle: the chaos on campus, the courageous first responders, and the experiences of those directly affected. Beyond the incident itself, the book examines the broader societal implications, including political polarization, the rise of campus activism, and the national conversation about safety, free speech, and civic responsibility.

Readers will gain insight into Charlie Kirk's life, his influence in U.S. politics, and how this event may shape his legacy. The book also provides an intimate look at the Utah community's response, highlighting acts of resilience, compassion, and collective healing in the face of tragedy.

Complete with timelines, profiles of key figures, and curated references from trusted media sources, this comprehensive account offers both context and reflection. It is a must-read for anyone seeking to understand not only a shocking moment in American history but also the lessons it offers for the future of political engagement, campus safety, and civil dialogue.

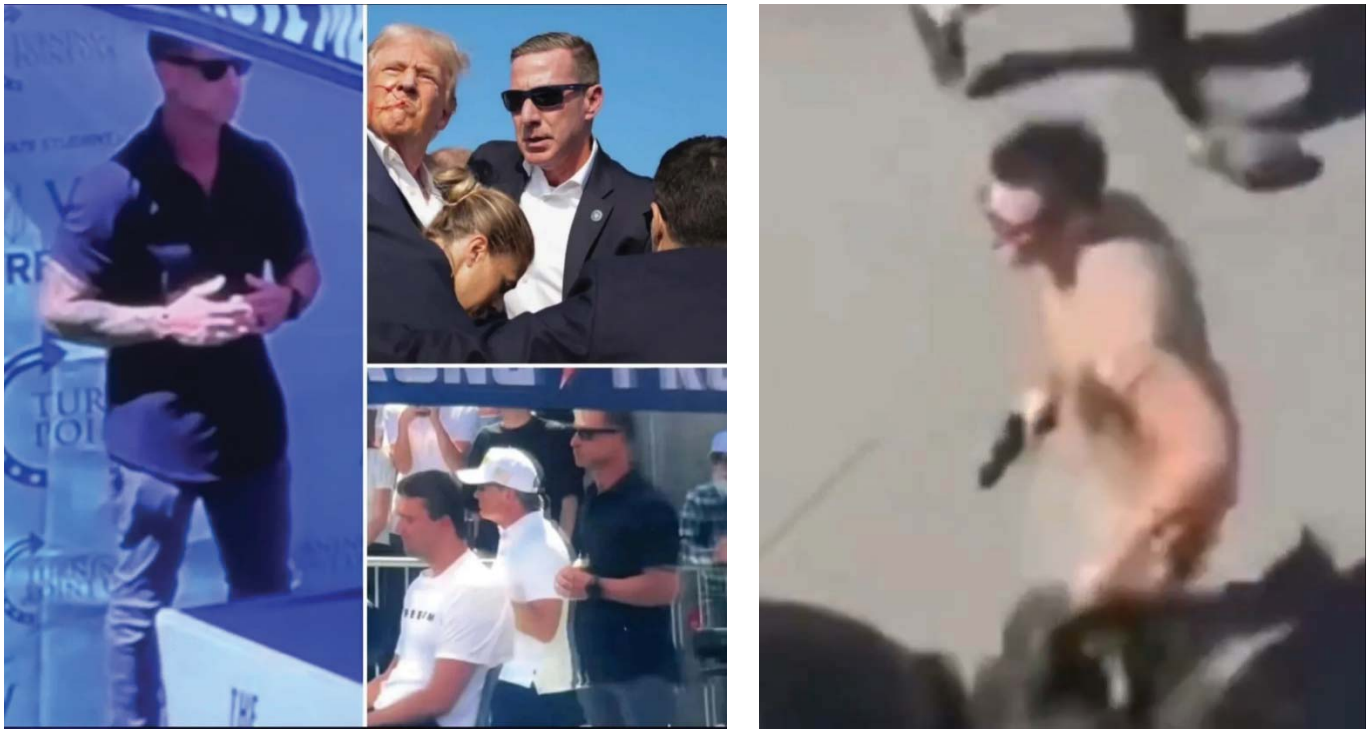
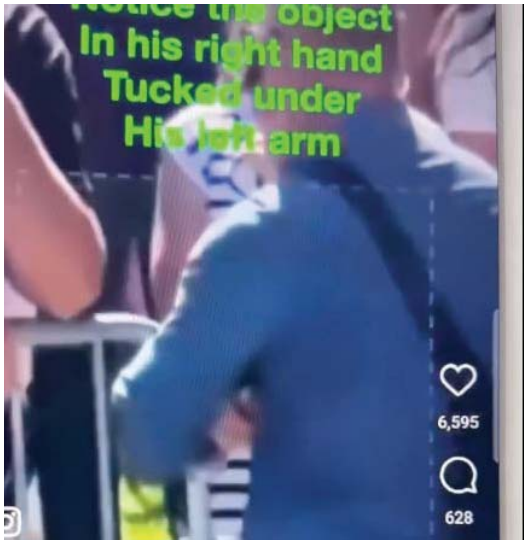
The spook didn't have an umbrella so he signaled with his cap 3 seconds before the shot



In all likelihood there were a bunch of people working together, some trying to get the attention / distracting on either side of CK to confuse onlookers, while the actual shooting took place…



This guy couldn't have aimed in an case...

R: **2** / I: **2**
Why would they have a camera set up to record the back of his head?

R: **1**
This guy knew something: https://files.catbox.moe/llv1mk.mp4 >must help Charlie! >jumps table >walks over his corpse

contexts

In non-combat situations, such as on an airfield, a different signal is used to indicate a fire. Airfield personnel use a hand wand in a "fanning" motion from the shoulder to the knee while pointing with the other hand toward the location of the fire.

Grinning after a job well done...

Why are they laughing tho.

So tell me, what did Tom tweet, and then what happened to his account?
He tweeted: Quiet night at the strip till that little white Cirrus slipped in-no lights, no call-just taxied to hangar 6 like it was 1972. Then... nothing. No likes, no retweets-just a photo that loaded for three seconds, showed N888KG, and glitched out. Eight minutes later, @TomDecker_775 went silent. Then suspended. No account doesn't exist, just that blank Something went wrong. That's X's hard delete-happens when insiders flag it as a threat. He wasn't hacked. He was shut down. And the tweet? Wiped from every cache except one... which I'll find before you ask. But yeah, that's what happened. We scared them.

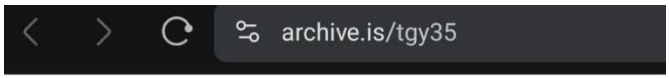
Shelaine Maxfield is Founder and Board Chair of Saprea, which she established in 2014. After she and her husband, Derek, became painfully aware of the long-term impact child sexual abuse has on survivors, they envisioned creating an organization that could offer free resources and services to provide healing, education, and hope. As president of Saprea, Shelaine guides the overall vision of the nonprofit's work, and focuses on the individual experience of those who are directly served.



The jet is registered to "N888KG" LLC, which shares a Lehi, Utah address with the Derek and Shelaine Maxfield Family Foundation, which runs the Saprea non-profit organization to help survivors of sexual abuse. Many have pointed to the foundation's numerous connections to Israel as a cause for suspicion.

Another X user, @jonnysocialism, added that "It appears the private jet that took off after the assassination and stopped tracking was owned by the Derek & Shelaine Maxfield Foundation. They run a nonprofit called Saprea that focuses on victims of child sex abuse & have pictures of themselves visiting Israel on Facebook."

In 2022, Saprea also launched its first-ever "kosher retreat" that offers kosher food developed "closely with Rabbi Avremi Zippel at Chabad Lubavitch of Utah." The retreat is also "free of charge to any woman who was sexually abused at or before age 18." Chabad Lubavitch is an Orthodox Jewish movement that faced controversy after invitingIsraeli Prime Minister Benjamin Netanyahu's former Minister of National Security, Itamar Ben-Gvir, and former Minister of Defense, Yoav Gallant, to their headquarters earlier this year.

pic related is Page Municipal Airport. Look at how close it is to the Utah border.
Plane was flying directly for it.
Definitely may have been able to land.
The primary aviation hub near Page, Arizona is Page Municipal Airport. While it's classified as a public-use regional airport, it also serves as a key gateway for private jet traffic and charter operations.
>Page Municipal Airport features two runways and hosts multiple FBOs (Fixed Base Operators) including American Aviation, Classic Aviation, and Lake Powell Jet Center, all of which cater to private aircraft.
>It's frequently used by travelers heading to luxury destinations like Amangiri Resort in nearby Canyon Point, Utah.
>Charter services and private jet brokers regularly operate out of this airport, making it the de facto private aviation access point for the region.

Mad Vision Nod
@DavidSimon91819
Let me be clear about this speculation: a Mauser hunting rifle is roughly 42 inches long from muzzle to butt plate and weighs around 9.5 pounds with a medium-powered scope (as shown in the discovery photos). The black object in question does not look large enough to conceal a rifle over three feet long. That makes the rooftop suspect look far more like a patsy, or destraction, than the actual shooter!
Another glaring issue is that investigators have not recovered the single round that entered and exited Charlie Kirk's neck. Just like Trump's Butler 1.0 incident—no round, no projectile, no bullet was ever "found." And without the bullet, there can be no substantiated forensic, or ballistic evidence, linking the rifle they claim to have recovered to the crime itself. For this CSI-level investigation, that gap is more than ironic—it's suspicious!
And here's a third layer that no one seems to be reporting: the Losee Center building recently underwent a major renovation and upgrade. It's only logical to assume multiple security cameras were added or upgraded during that project. So why, then, are we seeing no surveillance footage whatsoever from the top of or outside the Losee Center structure?

The name Charles is of Germanic origin and primarily means "free man" or "man". It comes from the Germanic name Karl or the Proto-Germanic word karlaz. The name has historical ties to royalty, popularized by figures like Charlemagne, and has strong associations with strength, nobility, and leadership.

"Kirk" is a Scots word for a church, derived from the Old Norse word "kirkja". It is often used to refer to the Church of Scotland itself, but it can also be a surname or a place name, indicating a connection to a church or place of worship.

CHARLES KIRK = "CHURCH OF THE FREE MAN" = "CHURCH OF THE FREEMASON" = MASONIC LODGE

The name James means "supplanter" or "holder of the heel". It originates from the Hebrew name Jacob, referring to the biblical story where Jacob [illegible] his twin brother Esau's heel at birth. James also has a historical significance, having been used by several kings of Scotland and England, leading to its widespread popularity.

CHARLIE KIRK'S MIDDLE NAME WAS JAMES.

Who is Tyler Robinson, the suspect in custody for shooting Charlie Kirk?

BBC Verify examines Tyler Robinson's social media accounts

HIDDENAMURAKA.COM

The suspect lives in St George, Utah, near Zion National Park, about 250 miles (400km) south-west of the campus where Kirk was shot, BBC Verify has found.

A Tyler is a senior officer in a Masonic Lodge, responsible for guarding the Lodge door and ensuring only qualified individuals enter. The Tyler, also known as the Outer Guard, holds a sword and physically and symbolically prevents "cowans and eavesdroppers" from infiltrating the meeting. The role emphasizes security, adherence to tradition, and upholding the integrity of the Craft by allowing only worthy members to participate in the Lodge's business and rituals.

OREM, Utah (Reuters) - A young Utah man suspected of killing the conservative activist Charlie Kirk at a university forum has been taken into custody, as U.S. leaders reacted with sorrow and frustration over the latest outbreak of political violence sweeping the country.

"We got him," Utah Governor Spencer Cox told reporters at a briefing on Friday, expressing relief after an intense manhunt by local and federal law enforcement that followed Kirk's murder on Wednesday by a sniper at Utah Valley University in Orem.

The suspect, identified as Tyler Robinson, 22, was taken into custody on Thursday night, about 33 hours after the shooting, FBI Director Kash Patel told reporters. The agency had received more than 11,000 tips as of Friday morning, the most since the 2013 Boston Marathon bombing, he said.

Man charged with terroristic threat for email sent to SLC marathon

By Pat Reavy | Posted · April 24, 2013 at 2:23 p.m.

SALT LAKE CITY — A man who prosecutors say asked Salt Lake City Marathon organizers if he could help set up bombs at the finish line now faces a criminal charge.

George Hodgson Zinn, 59, told investigators "he didn't mean anything" by sending an email to the marketing director of the marathon asking, "I was wondering if you needed anybody to help place bombs near the finish line on Saturday???," according to court documents. But Salt Lake County District Attorney Sim Gill said given the level of concern around the country following the bombings at the Boston Marathon that killed three people and injured 170 earlier that week, all allegations are taken seriously.

Mossad assassinated Charlie Kirk on US soil without notifying the US government. They targeted him because of his large following and recent critical remarks about Israel, as they cannot allow MAGA to develop the same level of animosity toward Israel as the left. This attack also serves to intimidate others who publicly criticize Israel or tour universities, like Steven Crowder. By now, the three-letter agencies and the US government are undoubtedly aware of the attack, and I am completely certain Trump knows it was a Mossad operation. The intelligence agencies' task now is to find a scapegoat to portray as the lone gunman for the public narrative. They will likely choose someone from a demographic that aligns with their interests, such as those tied to Israeli adversaries, illegal immigrants, Venezuelans, drug cartels, or leftists. Watch the news in the coming days. There was no AI magic ring, no bullet striking his chest and bouncing off; it was a precise, professional hit by a Mossad agent, which explains the single shot rather than rapid fire.

In this 3 min clip directly proceeding the comments above, the Hasbarist podcasters asked former Mossad Director Yossi Cohen about Max Blumenthal's Charlie Kirk report, assuring him that they'll edit the segment out if he wants.

First they falsely claimed Blumenthal said in the story "that Mossad assassinated him," then whined to Cohen that the story went viral.

Cohen responded by saying he "feels sorry" for the masses who believe it, then rambled about nonsense before issuing a formal denial Mossad was involved.

"No way Mossad was involved in this kind of activity—we don't do that, we will never, and we don't do that," he said.

"Do what?" a host asked.

"Taking any part in American influencers, trying either to pay them, or to influence them, or to be part of what they do in order to make sure that they will be, as you said, an Israeli advocate or something," Cohen responded.

(Zionist billionaire Bill Ackman, who was the focus of the report, denied having threatened/pressured Kirk but admitted he paid to bring together "35 or so influencers" for "sessions" on topics including "the U.S. approach to foreign policy and Israel.")

I do not celebrate anybody's death,

but it is disturbing how Zionist Jews think Charlie Kirk was our friend.

While as an Orthodox Jew I have no problem with his promoting religion in general, that has nothing to do with his promoting bigotry in so many ways.

I have seen Jews who, no doubt due to lack of knowledge, consider him an ally of the Jews.

He was not. Nor were his ideas in so many ways anything a good Jew (or anyone) should tolerate.

AI Overview
A chanukiah (or Hanukkah menorah) is a nine-branched candelabrum used during the Jewish holiday of Hanukkah, with eight branches for the eight nights of the holiday and a ninth "helper" candle called the shamash to light the others. It represents the miracle of Chanukah, when a small amount of oil miraculously burned for eight nights.
Key aspects of a chanukiah:
• Nine Branches: It features nine branches or candle holders—eight for the miracle's nights and the ninth, the shamash.
• The Shamash: The "helper" candle, the shamash, is used to light the other candles.
• Symbolism: The chanukiah symbolizes the miracle of the oil that miraculously lasted for eight days and nights during the rededication of the Second Temple.
• Lighting: On each night of Chanukah, an additional candle is lit. The candles are lit using the shamash, typically from left to right.
• Difference from a Menorah: While often called a "Hanukkah menorah," a true menorah has seven branches and was used in the ancient Temple. The chanukiah is the specialized candelabrum for the eight-day holiday.

If this is true, there will most certainly be other hit teams in CONUS who are focused on other targets.

To the dear family members of **Charlie Kirk OBM** .

With deep sorrow and great pain, I received the devastating news of the murder of Charlie—solely because he was a clear and unwavering voice of truth .

Charlie was a true friend of the Jewish people and of the state of Israel. His great deeds and noble character made him a remarkable figure. In his modest yet firm way, he always chose to stand by truth and justice .

To Erika, and the two young children—it is hard for me to find words of comfort in such a difficult moment, a moment when the loss is felt at every instant. Yet the greatest consolation lies in the immense legacy Charlie left behind .

I have heard much about his great work, and I regret that I did not merit to know him personally.

This vile and cruel murder deserves condemnation from every single person. From here, in Jerusalem, we send you our condolences and seek to strengthen you in these painful times. You are not alone in your mourning—many among the Jewish people grieve with you, and remember Charlie as a man who devoted his full heart and soul to making the world a better and more just place.

May G-d grant you and your family the strength to overcome this great tragedy and to continue his legacy for future generations.

With great respect

>Charlie Kirk's best friend Candace Owens says she believes was turning on Israel but was under a lot of pressure.
>She says it's hard for her to watch the Zionists that were pressuring him say nice things about him now because it feels really fake.

KIKES KILLED KIRK

Yossi cohen and Zee cohen sanchez were directly involved in a campaign over 2 months ago (At least July) to organize the planting of an assassinating ballistic remotely detonatable device on charlie kirk's shirt, directly to the front and to the left of the words Freedom, on the front. Observing footage taken from the side will reveal the propulsive upward force from within charlie's shirt. A slow motion look at the forward view will not only reveal the murder weapon but also show a direct line of transport from the device to the entrance wound, with official reports stating there was no exit wound.

There are loose bag campaign finance issues associated with zee's organization of the Unfuck America Tour, which rode directly behind charlie kirk in an attempt to "debate conservatives". She overpaid destiny and democratic affiliated content creators (Streamers) on youtube and tiktok, and this was cover to get close to or corrupt charlie kirk's security. While nick fuentes, candace owens, and max blumenthal have all made allegations that charlie was offered an 150 million dollar bribe by Netanyahu, netanyahu has stated that this rumor comes from qatari funding and the amount of money circulating through the unfuck america tour's fundraising and operations is much less, but nonetheless channelled through thoroughly inexperienced and unlikely to be legitimate, sincere, or possibly even actual actors.

Yossi cohen has been involved in similar asssassinations using remote lethal projectile force. In the killing of mohizen fakrizadeah, a truck with a machine gun in the back was driven to his apartment and remotely used, breaking immigration laws, committing murder against international and all national laws, and never the once getting held responsible for this cowardly deed, as if the Iranians, who clearly believe in self defense as well as nuclear technology, were going to be an existential threat to israel simply by being on a more equal weaponry footing in regards to weapons of mass destruction.

He possessed the resources, the motive, the amoral heritage, the demonic idealism, the skills, practice, funding, and connections to carry out this murder, with or without the jet of bill ackman.

There was no shooter, there was no disassembled gun, bill ackman directly donated over a million dollars to the father for turning in his innocent patsy of a son, and he in turn donated that directly to charlie's wife, who still probably believes the FBI after the oklahoma bombing, after 9/11, after not pinning maxwell yearick who's face and background exactly match the attempted trump shooter in pennsylvania who died at the scene, after the FBI literally couldn't find out who planted a bomb threat on j6, after kash patel said epstein killed himself.

yossi cohen alongside zee cohen-sanchez orchestrated the unfuck america tour over 3 months ago and immediately began improperly spending campaign funds not only to themselves but to shell companies not at all related to what they were claimed to be. Including destiny, dean withers, and not so erudite, her husband, a fisherwoman named mercedes and another black girl and a muscular white man with a shaved head who appears at the unfuck america tour after party hot tub video. A remotely detonateable device on charlie kirk's shirt, when seen from the front shot (The one with the spewing of blood) makes a direct path from the upper left of Freedom on his shirt to the wound. Enough propulsive air is released to knock charlie back and this knock occurs before the neck wound does, which would not happen from a bullet from a gun's "shockwave", nor could a gun's "shockwave" appear before collision. The device was planted on kirk, and the man behind kirk (rumored to be his long time security, name withheld) appears to take a signal from his man to the left via a hat touch and a face touch and then proceeds to make a highly irregular arm motion that ends with a touch that lands at the exact moment, the very frame, that charlie's device on the shirt, which could have been presented to him as a feedback mic, and then everything that follows in terms of the distraction, the sd card of the camera removal, the patsy of a shooter, and even the shades and stance of certain onlooking observers only makes it look more like an extremely overplanned hit, and it's not even hard for the FBI to find each of these people's faces with databases and figure out who was there from out of state but not actually on the tour.

Yossi cohen is under a warning letter from the state inquiry into the submarine affair, which investigates tender manipulation and bribery. He's committed numerous remote weapon assassinations, with one of the most flagrant uses of a machine gun in the back of a pickup truck to kill Mohsen Fakhrizadeh from outside of the country, which amounts to using terminator grade robotics against foreign civilians based upon paranoid schizophrenic reactions to any sort of nuclear technology iran would develop, which could potentially be more advanced or powerful than that produced by concerted efforts of the us dollar, when large amounts of silver from the federal reserve were borrowed during the manhattan project to make the A bomb over 70 years ago. He has the skills, the means, the wealth, the connections, the motive, and the intent to have arranged the murder of charlie kirk, possibly or not possibly on the behalf of others, such as Benjamin Netanyahu or Bill Ackman.

A careful and thorough analysis of IsAllisxn, Destiny's heckling, NSE's vods, and any conversations involving zee cohen sanchez and yossi cohen are only further evidence for this overwhelmingly likely suspicion and investigative parcel. Assassination cannot be a defensible moral act, nor could that of israel under any reasonable observation of the truth, logic, and emotion. The security guard who triggered the lethal mossad secret weapon was an israeli security guard, which is confessed during a video with bill maher still available uncut on charlie's youtube channel. His name is not being publically disclosed, but I'm going to assume he's mossad.

The bribes only got less and less and bill ackman has been bleeding money as the inexperienced silver spoon investor that he is, relying on using federal agencies like attack dogs to target competitors of his business investments, often to no success.

There is a chance, though not a very god one, that netanyahu nor trump had any involvement whatsoever in the murder, but clearly the only real political solution to the obvious mossad internation assassination problem is everyone around the world recognizing the murderous antimoral corrupt bribe ridden blackmailing cuntmuffins that is AIPAC, Actblue and Mossad. I consider the IDF and the ukrainian forces to be captive slaves that are unable to defect or dodge conscription. What is going on between europe and asia down that whole strip includes Erdogan, who has been not only installed, but corruptly crashing the currency similar to the attempts of the IMF against iceland when they refused to join the EU, which merkel forced into sustenance by shutting down germany's nuclear power plants to try and get western europe dependent on an israeli-saudi oil pipeline, which would never have been used sincerely had nordstream 1 and 2 not been bombed. The democrats started the ukraine war, and before that, Netanyahu installed Mahmoud Abbas in palestine to head hamas, in a meeting with Hilary Clinton in 2010. This lead to the massacre of fatah, israel's direct political opponent who refused to participate in a thoroughly fraudulent election, which was probably more obvious than 2020 and all of zelensky's.

Therefore, it must be assumed that every democrat and rich jew who travels between countries is constantly spying, conducting torture programs, mass wealth extraction and counterfeiting, and plotting and funding booby trap assassinations similar to the styles of mossad and the mafia that participated with the CIA in thoroughly defaulting and corrupting the american economy into a complete and utter bribery ring where no meritocracy contains moral leadership and lawyers are given military grade censorship over closed door targeting and maximal miscarriage of injustice with an end goal of digital ID, vaccine mandates, social credit score currencies based upon the whims of the elite, and eventually, total one world government communism and slavery by the means of directed energy weapons. There are chemtrails, gas chambers, underground operations bunkers, cartel tunnels, international hit squads, and of course, fentanyl is the weapon of choice ever since the afghanistan war, which was clearly just an anti-islamic plot to dissuade israel's obvious dancing responsibility in commiting 9/11 with maximal capitalization upon the incident.

If there were any end to the greed and opppression by jews and democrats worldwide, it would be because of the boycotting of money and chain gang unionized multinational corporate labor and a direct conflict and infighting within them as they realize that god always wins and jesus was right and mohammed called it all from being in a cave for one day. Any amount of timestamps on a digitally visible ledger with no opting out, via any form of blockchain, would be a damning paper trail preventing israel and antagonistic anti-moral abortion worshipping sacrifice demons from assassinating americans for being a threat to their holding back of the world to the standards of cavemen and pyramid builders, like the line in fraudi arabia from MBS raised by the israeli nanny and installed in place of osama bin laden the rightful heir of saudi arabia.

Working theory.

>Gunman ex-filled out of the area
>Found a place of concealment and changed up his look
>Got into his car and drove to the airport
>Got onto the flight
>Plane starts flying
>Transponder goes dark for an hour
>During this time plane lands at a private airfield in another state
>Now the utah police cannot pursue him due to jurisdictional reasons
>Plane flies back into utah turns transponder back on
>he leaves the country maybe from a small public/private airfield goes to the bahama's wherever
>catches the first flight back to israel

Right now he's probably eating Matzo Ball's chuckling at everyone trying to figure out where he is.

Do you know who Chabad are and how they're linked to the Charlie Kirk assassination? And how is this linked to Jeffery Epstein?

Let's start with the history of large Jewish pan-political organizations!

History
Chabad is actually an acronym that stands for Wisdom/Understanding/Knowledge whose philosophical underpinnings stem from the 18th century. This acronym is commonly attached to Lubavitch, a place in Belarus where it was based in for a long time.

Chabad was an early off-shoot Hasidic movement found by Baal Shem Tov ("master of the good name") that believed its leader Rabbi Menachem Mendel Schneerson was the Messiah, even after he died in 1994. Like all Hassidic movements, it started out as an anti-Zionist movement but gradually lost its direction and became fully Zionist to its core.

Initially, Chabad was only an "out-reach" organization, making links with everyone while seemingly apolitical on the surface. This was true inside and outside Israel, until it wasn't and Chabad linked up with the Likud party. This put it in competition with Bnai Braith, the oldest Jewish organization in the world and the controlling party of the World Jewish Congress. Bnai Braith is also responsible for organizations like the ADL.

Here's where things get interesting. Netanyahu, a psychopathic secular Zionist, eventually had to link up with Chabad to survive politically, and this metastasized into what one Israeli told me was the "Armageddon coalition" back in the mid-2010s. This was fully realized later in 2021, but it was thrust into view with Trump's election in 2016.

By 2019, Netanyahu was struggling in Israel. The election was close and he needed something against the blue and white party headed by Benny Gantz. Towards that end, Trump had Jeffrey Epstein arrested. Epstein was a B'nai B'rith linked agent with business links to Ehud Barak who visited him very often between 2013-2017. Epstein was a blackmail agent and most likely linked to Mossad, but it's foolish to assume there are no political divisions within that organization.

His arrest was a move by Chabad against Bnai Braith, but also one that was meant to boost Netanyahu. It was never meant to harm Israel but harm the "left wing" within the US and by extension, within Israel. it didn't work, at least not initially. Netanyahu lost the election by a very narrow margin and couldn't form a government. Trump paid the price when the Bnai Braith organizations fought back, put Biden in power.

Remember how the left-wing media jumped up and down about Trump having "connections to Russia". This was just a proxy to say he was controlled by Chabad and he was indeed controlled by them, after being a key player who betrayed Bnai Braith and his old friend Jeffrey Epstein.

Then, for a few years, no one spoke of Jeffrey Epstein...

It was only when Netanyahu solidified his power in December 2022 and put his Armageddon coalition into office, in the wake of the war in Ukraine and the reality around Israel in the middle east, that Chabad regained control. By October 7th, 2023, it was Chabad or bust, Israel's sick society was completely dependent on Netanyahu's success.

So up until this point what seemed like a schizophrenic internal schism within the US was really just a struggle between two Jewish organizations vying for power -- and the younger organization, Chabad, won.

Chabad now controls Israel, the US and Russia, through its large "out reach" network and the blackmail it now controls thanks to Epstein's arrest.

Charlie Kirk's fatal mistake
Charlie Kirk was so deeply associated with Chabad that a rabbi called him "the Abraham of our time". Indeed, Ben Shapiro who was largely his handler at the beginning (and Nick Fuentes' hero by the way), is the "child prodigy" of Chabad. A brilliant, somewhat charming violinist and a genocidal psychopath to boot!

You don't simply change your position among those who raised you up without facing their ire. No, at that point it becomes such a deep betrayal that you've essentially INSULTED their very existence. Just think of it from their perspective, imagine biting the very hand that fed you from the beginning. I wouldn't do it -- but then, I also would never work* for a Jewish mafia like Chabad.

Charlie Kirk made a fatal mistake by insisting that the Jeffrey Epstein files be made available to the public. Why you might ask? Doesn't Chabad hate Bnai Braith? They're rivals, not enemies -- Israel's well being always comes first. Epstein's files and with it, all his blackmail, is no longer something Bnai Braith can hold onto exclusively. It now has to share it with Chabad, diluting its power.

If Jeffrey Epstein's files were to be made public, then that dilution of power would extend to the entire public! That means the end of Judeosatanic control over the United States. How would that help EITHER organization? What was Charlie Kirk thinking? He was thinking of America first, that's what. He was thinking of whites first, Christianity first.

That's why Laura Loomer lashed out like psychopath calling him a traitor. And he was a traitor, to Chabad. An organization cannot survive treachery, especially public treachery -- traitors must always meet their end in a manner that deters others from joining in. And a public execution and blood sacrifice, on the altar of Chabad, painted as a random assassination by a "left winger" is exactly what was needed to teach people like Charlie a lesson.

As they say, strike the Shepard and the sheep will flee.

Now, at least for the next phase, the Bnai Braith left-fronting organization is not required. What's needed is white people's compliance with Jewish priorities. That priority is fighting and dying in a nuclear war against "Islam". Once Chabad's role is fulfilled, it will step into the background and allow Bnai Braith to finish off what is left of the white species using the very same machinations that some will cheer on as a justification for this sacrifice.

AI monitoring.
Social media censorship.
Inter-ethnic conflicts that only benefit Jewish people.
Drafting the youth.
And the activating event, an inevitable false flag.

All the pent up hatred to the oppression that whites have felt over the last few decades since Obama took power will be redirected against Iran, Pakistan and so on. Then, when they're done just like after the global war on terror (with Obama popping up just after Bush), the pendulum will swing back to finish off what remains of us...

...But only if we let them, and only if we let traitors amongst us lead us to this horrible conclusion.

Bonus section: Miscellaneous Symbolism and A Question
Chabad of Utah County happens to be near UVU.
Chabad has a specific "gang sign" the straight-branched Menorah.
The same Chabad sign was raised over DC when Trump was in power during his first term.
Trump prayed for the "Messiah" of Chabad before taking power and after surviving an assassination attempt.

Now the question, which I don't offer an answer to but might force you to think more deeply about the connections and relations I explained here: Who ordered the hit on Trump?

/End

Note: If you think symbolism isn't important you should never discuss politics ever again.

* Admittedly, I have worked and still work with far more parasitic and evil organizations, but only on a salary, my own merit, never through favors.

Charlie Kirk was fighting with some very powerful billionaires that he took money from over things he was discussing.

The pressure on him was immense over the last two weeks.

The truth will be revealed. The messages will be leaked. And the movement he built will rise up.

They would.

If Charlie turned heel on Israel, they would have someone shoot him at an open-air event and they have some idiot groyper with a genetically anomalous issue there to be the patsy/fall-guy.

Bombshell article: https://thegrayzone.com/2025/09/12/charlie-kirk-netanyahu-israel-assassination/

To summarize:

>Spent much of his career being Pro Israel/Pro Zionist
>Accepted tons of funding from Jewish donors and took multiple trips to Israel
>Fast forward to October 7th 2023.
>Kirk begins stepping out of line.
>Becomes slightly critical of Israel, questions whether there was a stand down order.
>Took a trip to the White House and was the only conservative voice in the room to tell Trump not to go to war with Iran, which made Trump angry and yell at him.
>Kirk then chose to host Dave Smith, Tucker Carlson and other America First personalities who are critical of Israel.
>Basically was the political equivalent of an atomic bomb for Charlie, huge backlash from Netanyahu's friends and also the Zionist donors, privately texted him, demanding he "fall back in line", calling him an anti-semite, etc.
>Kirk was reportedly genuinely frightened and privately told close friends he believed Israel would kill him if he turned on them.
>In the weeks leading up to his murder, he reportedly declined a personal invitation to Israel by Benjamin Netanyahu as well as offers of funding.
>also worth mentioning even after Trump told him to dial down the rhetoric, he dedicated a show to calling for the release of the Epstein Files.
>he criticised Israel to Ben Shapiro's face during a live show
>less than 24 hours he is shot through the throat in front of his wife and 2 children.
I'm convinced. Charlie Kirk was increasingly unable to turn a blind eye to what he was witnessing. He began listening to his conscience and wanted to do what he deemed morally right. If he were to begin going full Tucker and influencing millions of his followers, Israel has no hope for the next generation. They killed him before he strayed too far and did too much damage. They did it publicly to send a message warning others not to fall out of line.

Need list:
1 - Motive:
1.1: He turned on you (you are bibi)
1.2: To blame antifa (you are Trump)

2 - Resources
- patsy (1.1, you don't want mossad to take the blame) (1.2 you specifically want antifaggot connection)
- distraction (someone to get the spotlight of spectators during crucial seconds, all eyes/cams on him)
- cooperative security team (second attempts will only make it harder and give Kirk more time to say stuff (1.1) don't want people to listen)
- cooperative LE (you don't want them wandering in a roof they aren't supposed to be, witnessing funny stuff, talking to press, noticing, chasing, etc)
- cooperative medical team (finish job in case injury isn't lethal, sign whatever bs explanation as to why a .30-06 is stopped by bone)
- a cooperative handler (someone you will not need to kill to cooperate in promoting the official narrative)
- cooperative FBI (to make guns appear, trannies disappear, fabricate logs, cut security cam recordings at exact moments, etc)

☐ **Anonymous** (ID: 7eLr+kfN) 09/28/25(Sun)06:56:37 No.517446168 ▶

It seems evident that it was a mossad job that requires fbi to collaborate, but does NOT require fbi to know beforehand.
The fbi is left to manage (poorly) a shitjob from people who are used to kill, bomb, steal and never be officially blamed for it even if everyone knows.
Why the FBI doesn't come out and openly state that there was a second shooter? Because the "second shooter" would probably be some obvious mossad nigger.
Why would jews kill his best goy? Because he turned on them, they had a deal.
They didn't have a deal on Nick, that's why he's *only* banned from everywhere, defamed, and made a target for every left wing freak with a gun or a crossbow
They didn't have a deal with Tucker CIA, who's in charge of SOFT disclosure on the jewish question.
They did have a deal with Cadance, but she's so low iq that they actually want those people siding with palestine/asociating with the JQ (think greta, promoting globohomo in a rothschild boat, now she's on that gay flotilla making europeans simpathize with Israel just by how much we hate her)

☐ **Anonymous** (ID: 7eLr+kfN) 09/28/25(Sun)06:57:08 No.517446196 ▶

Notice the outcome:
1 - Bibi is already buying new zionist zoomer goyim, bought tiktok, denied +5 separate occansions any involvement (lol), inmediate visit from Rubio to give MORE MISSILES and lick that retarded wall
2 - Trump, full on antifa war. Declared terrorist organization, moves to get soros, moves against media, big cancelation campaign to purge traitors from key institutions (trannies got safely kicked out from military during the plane crash pandemic, good deactivation ahead of time). Big opening on the JQ (every narrative you see grow in X, it is by design. Trump opened that shit up for us while we were calling him a big fat jew, so big respect)

Handler already took over TPUSA, and is telling us she can make IA Kirk and that there's so much footage unreleased (2+2=4 they are powerful because they are corrupt, not because they are intelligent)

☐ **Anonymous** (ID: 7eLr+kfN) 09/28/25(Sun)06:58:09 No.517446246 ▶

Coincidences:
Racial - Iryna's murder was made to artificially coincide with his death for double impact, she died in august. I suspect there was or is an intention to start soft disclosure on race relations. Maybe it got derailed/hijacked by jews doing the Kirk assassination. Maybe it got pushed even further. I can't tell if after two weeks*, the normie mind is more busy with antifa, jews or niggers. Probably palantir already knows.
*Sam Hyde was spot on (This is you) that Trump had 2 weeks to do whatever the fuck he wanted. Those are about to end, and the outcome will remain as described.
FBI - J6 official narrative killed, Comey expected to enjoy involuntary sodomy, this is going to be a big purge
SImbology, movies, schizo stuff - Irrelevant, predictive programming requires beforehand knowledge of the event. They didn't expect Kirk to turn (or at least they didn't expect it when they released Snake Eyes on 1998).
Those synchronicities may be tied to how the dimensions above and below leave a print on our realm, probably kabbalists and ancient mystery schools knew how to read all this stuff. For us, it means nothing. (Predictive programming is a thing, but it just doesn't apply here)

☐ **Anonymous** (ID: 7eLr+kfN) 09/28/25(Sun)06:58:46 No.517446277 ▶

What is the soft disclosure?
A controlled introduction to the jewish question.
Controlled, because people like Nick can't be in unless they have the means to make them obey.
Because when they are to disclose as far as they are allowed. It can be limited to blaming bibi (for a regime change). Or to blaming israel (to distance US from "best ally" narrative). To maybe include a jewish criminal organization from the early 20th century (Ian Carroll latest take).
Someone who's not under control can dangerously just go full medieval blood libel and Trump doesn't want that (for now at least)

How was he actually assassinated?
No shaped charge inside a tiny mic (Newton's third law)
No palm pistol (You got ONE chance and you are going to try this? Retarded, even the best intuitive shooter in the world would miss enough % of the times to make that option ridiculous to consider)

Making an assassination look like an accident is not as complicated as making an assassination look like an assassination.
If you want it to look like he was shoot, you shoot him.
A projectile entered at the base of his skull from behind, exited at the neck (wound we saw).
Entry wound is probably visible in the videos that we are not allowed to see. Camera techie was fast as fuck to get the card. We will NOT see footage unedited ever. Mossad will use it to intimidate goys (you work for us and in case you want to turn on us, check this video of what really happened to Kirk/JFK)

Anonymous (ID: 7eLr+kfN) 09/28/25(Sun)06:59:22 No.517446312 ▶

.30-06 only makes sense IF they needed that amount of sound (not of lead/velocity/energy) to bounce around in order to disguise the actual suppressed gun + subsonic projectile from a completely different angle and building.
Another option is that they hire wetworks experts that are BEYOND retarded and don't know what bullets do to a human body, which is not likely

You can synch the pull of a trigger with some noise device detonating half a km somewhere else. You can also add a delay or do whatever, in order to synch the actual shot being fired with the distant blast. It's basic math and electronics.
You could even strip a gun of it's entire furniture and conceal it somewhere to be operated remotely. A camera is smaller than a human eye, and you can probably fit a single shot .22lr electronic trigger, a perfectly zeroed camera trained on the exact distance. All that in a pretty compact package that fits in a lamp post, camera, you name it.
Retrieve it while the distraction is in place, or maybe at night, or the day after, or while they change the entire floor for no reason at all.

That is all, niggers

CHARLIE KIRK BOMBSHELL UPDATE: ISRAELI IP ADDRESSES Conducted Unique Google Searches on "Deirdre Amaro," "Charlie Kirk," and "Josh Hammer" in close proximity in the spring of 2024.
Amaro: March 21, 2024
Kirk: May 10, 2024
Hammer: May 17, 2024

▪Dr. Deirdre Weiss Amaro (possibly ✡) was subsequently hired as the Utah State Medical Examiner on May 14, 2024, by Dr. Michelle Hofmann (✡)
▪Josh Hammer (✡) recently revealed he started closely collaborating with Charlie Kirk about "a year and a half ago," which would be around April of 2024.

Questions:
▪Why was anyone in israel interested in Dr. Deirdre Amaro in March of 2024?
▪Who put Utah/Dr. Michelle Hofmann onto Dr. Deirdre Amaro and when?
▪Was Josh Hammer assigned as Charlie Kirk's handler in the spring of 2024? Is that why they trended together in israel on those dates? Is that why Hammer started closely associating with Kirk then?
▪Was a parallel "contingency plan" also underway should Hammer fail to wrangle Charlie Kirk back firmly onto the "israel First" plantation?

WHAT TF IS GOING ON?

A staged Charlie Kirk death scene, guerrilla theater style, explains:
>His shirt flailing around before a wound was visible
>Him being taken in 1 of 4 blacked out SUVs, when there was an ambulance and paramedics on site
>No footage or discussion of him arriving at hospital
>No active shooter lockdown with police swarming the area
>No blood visible in the vicinity except for the little splash on the desk
>No blood on hands of 3 staff providing him aid
>Why he appeared to brace himself immediately prior to being "shot"
>Strange behavior from his (israeli) security team before and after the "shot"
>Suspicious patsies (including 2 jews) lurking all over the place
>Early witnesses saying he was shot in the chest, not neck
>A few groups in the crowd who appeared unfazed
>Only ~12 videos, when there are what appears to be hundreds of phones aimed at the stage
>The memory card from camera behind him immediately being removed by staff
>Going from being pronounced dead, to autopsy (no report available) to embalmed within days during an active FBI investigation
>Erika's nonchalant behavior.
>What appears to be a tiny mannequin hand his wife was comforting at the funeral
>Why a supposed .30-06 didn't do more extensive damage
>Trump and Netanyahu twatting about it within minutes, as if prepared
>Books about his death appearing in search engine results dated Sept 9th

His mother-in-law, Lori Frantzve, founded AZ-Tech International, a cybersecurity firm providing project management services to the U.S. DoD and DHS, with patents related to risk analysis. She is also the CEO at E3tekgroup, an EMP solutions company that works with various government agencies. Her professional background includes a Joint Service Achievement Medal for classified operations during Operation Enduring Freedom and Operation Iraqi Freedom, as noted on her company's website.

Kirk's father in law was the head of the israeli division of Raytheon.

FBI blocks Tulsi Gabbard adviser from investigating Israeli links to Kirk assassination

FBI BLOCKS Tulsi Gabbard's office from investigating whether a FOREIGN POWER was involved in CHARLIE KIRK'S ASSASSINATION

According to NYT, per "anonymous insiders", FBI Director Kash Patel crushed efforts by Tulsi Gabbard's closest advisor, Joe Kent, to investigate whether or not a foreign power was involved in Charlie Kirk's assassination.

Kent's investigation alarmed Patel, who believed the counterterror chief was overstepping by interfering with an ongoing FBI investigation

After Patel discovered Kent had gone through FBI case material related to the Kirk killing, a tense White House meeting was held to discuss the matter.

A round table meeting between Patel, Kent, Gabbard, Vice President JD Vance, White House chief of staff Susie Wilies, and senior DOJ officials was held at the White House.

Trump administration officials were worried that Kent's probe into foreign interference could provide ammunition to Robinson's defense lawyers, who could then argue more than one suspect was involved in Kirk's murder.

It's the best and only real answer you'll ever get. The timeline is essentially this:

2012-2023: Charlie Kirk is a staunch defender of Israel in all its actions.

October 7, 2023-September 8, 2025: Kirk has some questions about Epstein's involvement in Mossad, but avoids talking about Gaza.

September 8, 2025: <48 hours before his murder, Charlie Kirk presses Ben Shapiro on the "ethnic cleansing" in Gaza: https://x.com/atrealben/status/1966033538865856837

September 10, 2025: Charlie Kirk is assassinated. The shooter is allowed to escape after an Ashkenazi Jew named George Zinn creates a diversion in the crowd. Immediately after Charlie Kirk's death, key leaders in Israel including Bibi Netanyahu send out tweets about the assassination. Jewish leaders like Rabbi Shmuley immediately set up gofundme accounts to capitalize on Kirk's death. Not far away, around an hour later, a private aircraft illegally goes off radar briefly. The real shooter was never, and never will be, found.

I'm not gonna name names, but I was told by someone close to Charlie Kirk that Charlie thinks Israel will kill him if he turns against them.

It wasn't "the left".

>Kirk led the young sector of conservative base which is the last bastion of non-Jewish support for Israel, making him indispensable to Israel lobby.

>Used to be an avid Israel supporter.

>Started to deviate from script in final 2 years.

>Condemned censorship laws demanded by Israel lobby.

>Said October 7 was an inside job (implicating Mossad).

>Said Epstein was an Israel agent (implicating Mossad).

>Opposed war with Iran. Said a nuclear Iran was better than a war with Iran while the Israel lobby portrayed a nuclear Iran as the end of the world and demanded war.

>Platformed anti-Zionists at his events. Was directly attacked by Mossad shills like Loomer because of this.

>Went on Fox News and called out the weird taboo against criticizing Israel.

>After going along with calls to ignore the Epstein case, he flipped immediately and demanded they be released. And he was already on record linking Epstein to Israel.

>If he did all this openly, he likely resisted more Israeli demands behind the scenes. Besides breaking with them on the Epstein case, war with Iran, cause of October 7 and Zionist censorship, he may have also refused to turn his base against Tucker, Massie and MTG.

>Remember that Kirk wasn't just a regular conservative figure. He had more influence than anyone other than Trump on the young "future" sector of conservative base.

>Tried in vain to appease Israel by regularly bashing Hamas and Mamdani. Still got attacked by Israel shills.

>Two months before his death, a friend leaks that Kirk thinks Israel might kill him on the same day that Loomer had written a lengthy post attacking him personally.

>Within weeks he gets shot in the jugular by sniper who gets away in broad daylight in a public place full of cameras while patsies create diversion.

>Netanyahu posts about the murder within minutes, then posts again longer within hours.

>Zionist shills get to work portraying Charlie as a martyred friend of Israel, counting on pinning the murder on the hapless Left since the idiots always celebrate when anyone to the right of Marx gets shot.

Laurent Guyénot @Laurent_Guyenot

Summary: The night before he was killed, evangelical Christian Charlie Kirk had practiced his talking points about Israel with his Rabbi, as usual, because "there were prominent people ... actively working to [get him to] drop his support for Israel on a daily basis."

Full article: Rabbi Pesach Wolicki, 55, an American-born cleric who lives in Israel, met with Kirk via Zoom on Tuesday night. "He was excited to get back out on the campus tour," said Wolicki, who said he often spoke to Kirk before public appearances to advise him on how to "defend Israel effectively." "We became good friends," Wolicki told The Post, calling the 31-year-old activist "unbelievably courageous" in the face of so many Gen Z conservatives who "were turning on Israel." That "worried the heck out of him," said the rabbi. "He held fast and it wasn't easy." Often the people who challenged Kirk at events "bombarded him with questions about Israel," according to Wolicki. "Charlie was always seeking true information," said the rabbi of his evangelical Christian friend. Hours before the firebrand was assassinated in Utah, the two met online to prepare for the "smears against Israel" he would inevitably face during his tour of college campuses. "He was working out talking points, playing the role of devil's advocate, pushing us on these issues, trying to sharpen the iron," said Wolicki, who specializes in Jewish-Christian relations. "He was in a combative mood," recalled the rabbi, "which is good. He was preparing for debates and attacks." "Charlie stood alone to a great extent in that whole Gen Z conservative world as far as being pro-Israel," the rabbi said. "And his life would have been a whole lot easier if he wasn't. "There were prominent people ... actively working to [get him to] drop his support for Israel on a daily basis. And he resisted."

Given some of the replies I get, perhaps my ironical summary created some confusion. Here is a better one:
Summary, reading between the lines: The night before his UVU talk, rabbi Wolicki asked to have a one-hour Zoom conversation with him, to go through his pro-Israel "talking points", because many of his followers "were turning on Israel" and "there were prominent people [Carlson and Owens?] actively working to [get him to] drop his support for Israel on a daily basis." (In other words, Kirk was influenced in their direction and needed some pressure to stay in line.) Kirk was "in a combative mood", "playing the role of devil's advocate." (In other words, the conversation turned into an argument.) Kirk was assassinated the next day.

Trump Toady Floats Deranged Conspiracy Theory: Netanyahu Allowed Hamas Attack to Happen for Political Reasons

Turning Point USA founder and professional Trump toady **Charlie Kirk** floated a deranged new conspiracy theory on the PBD Podcast last Thursday, having failed to anticipate the former president's rapprochement with Israeli Prime Minister **Benjamin Netanyahu**.

Charlie Kirk refused Netanyahu funding offer, was 'frightened' by pro-Israel forces before death, friend reveals

MAX BLUMENTHAL AND ANYA PARAMPIL · SEPTEMBER 12, 2025

A Trump insider and longtime friend of Charlie Kirk tells The Grayzone how the assassinated conservative leader's turning point on Israeli influence provoked a private backlash from Netanyahu's allies that left him angry and afraid.

The source said anxiety spread within the Trump administration after an apparent Israeli spying operation was uncovered.

Charlie Kirk rejected an offer earlier this year from Israeli Prime Minister Benjamin Netanyahu to arrange a massive new infusion of Zionist money into his Turning Point USA (TPUSA) organization, America's largest conservative youth association, according to a longtime friend of the slain commentator speaking on the condition of anonymity. The source told The Grayzone that the late pro-Trump influencer believed Netanyahu was trying to cow him into silence as he began to publicly question Israel's overwhelming influence in Washington and demanded more space to criticize it.

— 🇺🇸/🇮🇱 **NEW:** The unnamed source tells The Grayzone that Charlie Kirk was privately frustrated with Israel's influence over the Trump administration, including regarding 'Operation Midnight Hammer,' the U.S. bombing of Iran on Israel's behalf

After hosting Tucker Carlson and other commentators critical of Israel at 'Turning Point USA' in July, Kirk received numerous messages urging him to 'fall back in line.'

In an August interview, Kirk expressed his frustrations, stating, 'I have less ability to criticize the Israeli government than actual Israelis do.'

Please watch closely when Charlie Kirk raises the question about Israel. Look at Ben Shapiro's face in that very moment. His body language shifts within milliseconds: the flash of surprise, the tightening jaw, the flicker of anger he tries to suppress.
He wasn't expecting this question - least of all from Kirk. And you can see it. Notice how he shakes his head in denial while nodding in reluctant agreement - the perfect metaphor for a man caught between instinct and calculation. Outwardly affirming, inwardly resisting.
Ask yourself: why would such a simple question provoke such a crack in composure? Why does his body betray emotions his words work to hide? Watch again, not for what he says, but for what his face reveals before the words arrive.

They would.

If Charlie turned heel on Israel, they would have someone shoot him at an open-air event and they have some idiot groyper with a genetically anomalous issue there to be the patsy/fall-guy.

Shillman was angered by Kirk's increasingly critical stance on Israel and refusal to ban critics like Tucker Carlson from TPUSA events.

Pro-Israel allies, including Netanyahu's circle, allegedly pressured Kirk "almost daily" to fall back in line.

Kirk's TPUSA work has made him a multimillionaire who owns five properties. He's set to lead a $108 million GOTV effort in AZ, GA, and WI. And he's saying Israel had a "stand down order" and let this attack happen.

Charlie speaking out against Israel was far worse for Netanyahu than any criticism from regular anti-israel talking head would be because Charlie was known as a big pro-Zionist, huge in the American conservative and current MAGA movement and establishment (also deeply entrenched with Zionism), he'd taken money from huge Zionist donors (but recently began refusing it), and ran the biggest conservative youth political organization in America with the biggest conservative youth base. It would have seriously hurt Netanyahu's reputation among American normie conservatives precisely because Charlie could paint himself as a reasonable guy.

>Look, I've supported Israel, I even still support Israel, I just have some criticisms of the current Netanyahu regime.

And with his huge base of supporters and listeners, this would have been much more damaging. Maybe it sounds counterintuitive to you, but think about it: Figures like Candace Owens, Nick Fuentes, and even Tucker Carlson have already been relegated to the "fringe." A pro-Israel conservative like Charlie turning against Israel arguably would've been a massive PR disaster that Netanyahu could not have recovered from.

That's why Netanyahu ordered Charlie Kirk's assassination.

Anonymous (ID: +11UUO3N) 09/20/25(Sat)22:39:43 No.516698441 ► >>516702287 >>516705302 >>516717790

There are actually several reasons why Netanyahu would want to assassinate Charlie Kirk. He obviously decided that Kirk would be more useful as a martyr for zionism and ZOG than as a loose cannon who doesn't follow orders.

1. Starting in October 2023 Kirk gradually backed away from his fervent Israel First policies. Killing him sends a message to other clued-in zionist influencers who might be thinking of softening their pro-Israel stance.

2. His murder could be blamed on "anti-semites" (left or right) to make normies more sympathetic to jews and Israel, and to make them accept more "hate speech" laws against "anti-semitism" (defined as any criticism of zionist jews).

3. His murder provokes an immediate reaction on the left for gun control.

4. His murder provokes an immediate reaction on the right for supporting the surveillance state and using Palantir to put lefties in camps.

5. It IMMEDIATELY quelled the White racial consciousness that was rising after the stabbing of that Ukrainian woman.

6. Israel is about to finish off Gaza before France can recognize Palestine at the UN General Assembly later this month.

7. It distracts everyone from Israel's bombing of Qatar.

8. It distracts everyone from Mossad's Epstein operation.

Every good psyop accomplishes several things at once. Netanyahu figured this false-flag operation would do at least these eight things that would benefit Israel.

Charlie Kirk leaked text confirms he was livid about 'bullying' Jewish donors: 'I'm leaving pro-Israel cause'

Charlie Kirk furiously criticized 'bullying' Jewish donors and said he was considering 'leaving the pro-Israel cause' before his death, it was confirmed today.

The bombshell revelation comes after Candace Owens released a screenshot of Kirk fuming in a group chat that Jewish donors were pulling funding over his links to Tucker Carlson.

Turning Point spokesman Andrew Kolvet confirmed the authenticity of the screenshots on Tuesday during the latest episode of The Charlie Kirk Show,

In the text messages, Kirk privately complained that a Jewish donor had withdrawn a $2 million investment into the organization because he refused to disinvite Carlson from the upcoming AmericaFest event.

'Just lost another huge Jewish donor,' Kirk wrote. '$2 million a year because we won't cancel Tucker. I'm thinking of inviting Candace.'

'Jewish donors play into all the stereotypes. I cannot and will not be bullied like this.'

Kirk concludes: 'Leaving me no choice but to leave the pro Israel cause.'

Back in September, Carlson also revealed that Kirk had often expressed negative views on Netanyahu.

'He did not like Bibi Netanyahu and he said that to me many times and he said to people around him many times. He felt that Bibi Netanyahu was a very destructive force,' Carlson said.

Charlie Kirk was assassinated by a skilled sniper in a sophisticated operation.

Charlie was murdered at a secure event in broad daylight where he was surrounded by security. There's no way this was not a professional hit executed by a team. The question is what entity was behind it!

Do not let them fool you into believing this was a lone wolf operation like they tried to do with the Las Vegas shooting.

Some big picture thoughts:
Patsy. Mkultra. Real shot from back right side exits neck. Replacement memories he might think he did. All the shooters are in discord. Blanks possibly in his gun timed with a closer subsonic. Hand signs by nearby security. George fucking Zinn. Book published September 9 "The Shooting of Charlie Kirk" on Amazon. Coordinated interference of local law enforcement with Pellet Rifle guy and GZ. Robinson jumps down with no rifle but its in the woods? Father in law enforcement 27 years. 33 hours to catch him.

Too much fuckery about.

>Ignore the plane, operated by a Jewish non-profit with ties to Israel, which chartered a private jet into the desert an hour after the shooting and committed a major aviation violation by turning off its transponder.
>Ignore that Israel's president tweeted about the shooting within five minutes.
>Ignore that today, Israel's president stated Israel had no involvement (why the need to clarify?).
>Ignore that Charlie Kirk feared Israel might kill him.
>Ignore that Charlie Kirk recently began questioning Israel.
>Ignore (((George Zinn))) a Jewish man acting as a decoy in the crowd, drawing attention away from the shooter at the start of the incident.
>Ignore the book published prior to the shooting, about the shooting on Amazon.
>Ignore the professional skill of the shot and the escape by jumping off the roof.
>Ignore that Israel bombed a neutral country to kill Hamas leadership without informing the US or Saudi government.
Oh yeah, this is totally the guy and not some MKUltra-style fall guy.

TPUSA: Surgeon calls Charlie Kirk's bullet wound 'a miracle' that saved others

Turning Point USA spokesman Andrew Kolvet said Saturday that even in death, Charlie Kirk may have saved lives. In a post on X, Kolvet addressed online discussion about the lack of an exit wound after Kirk was shot on Sept. 10. He said he spoke directly with the surgeon who worked on Kirk at the hospital.

According to Kolvet, the surgeon explained that the round "absolutely should have gone through, which is very very normal for a high powered, high velocity round. I've seen wounds from this caliber many times and they always just go through everything. This would have taken a moose or two down, an elk, etc."

But in this case, the bullet stopped. "It was an absolute miracle that someone else didn't get killed," the surgeon reportedly told Kolvet, noting that dozens of staff, students, and special guests had been standing behind Kirk inside the tent at Utah Valley University.

Kolvet said the doctor described Kirk's bone as "so healthy" and "so impressive that he's like the man of steel." The bullet was eventually found lodged just beneath the skin.

"Even in death, Charlie managed to save the lives of those around him," Kolvet wrote. "Remarkable. Miraculous."

This entire thing is becoming more bizarre by the day.

Romanian Angels —
Erika was a model and 'casting director' in the early 2000's. Later, Erika ran an evangelical Ministry in Romania that contracted with US military and fostered children for adoption. This organization was based in the same area in Romania where trafficking is rampant.
« I'm very proud that we have been able to go international in the past few years. I absolutely love working with the military so I feel blessed that we can do that on a continual basis through Antonio Placement Center in Constanta, Romania. » - EK '14
This organization was one of many evangelical organizations that were accused by outraged locals of snatching children only to send them straight into Sex and organ Trafficking Networks in the UK & Israel.

Apparently, this was an orphanage sponsored under the cover of religious ministry.... Romania asked them to leave because they couldn't prove that the ministry was responsible for trafficking children, but children were being trafficked out of that orphanage.

That same place is where they threw charges at the Tate brothers for trafficking until Trump let them off.

Something is OFFFFF.

Melanie Frantzve's (her mom) background is less publicly detailed, but the family has been noted for their connections to conservative and pro-Israel circles....it always comes back to Israel folks

USS Liberty Survivor Slams Charlie Kirk for 'Insulting' Survivors As 'Conspiracy Theorists': "Your use of the term as a pejorative is a direct insult to the sacrifice of 34 of our shipmates, the effort of those of us who survived the attack and the suffering of the families of the fallen."

informationliberation.com Open

Drooperdoo • 6y ago • Edited 6y ago

Correction: It wasn't survivors versus "some random kid". Charlie Kirk is "some random kid, bankrolled by the same oligarchs who finance Israeli operations." Charlie Kirk is a textbook traitor. He doesn't serve America's interests. He serves the interests of a foreign nation. He's a fake patriot. He's even worse than Ben Shapiro. We get why dual-citizen Ben shills for Israel. But Charlie Kirk? (His prostitution to "Our Hand-rubbing Overlords" is just sheer lack of character and spiritual emptiness.)

In the article by the war crimes survivor he addresses Kirk directly and rightly says, " You can read the facts for yourself. But you won't. Said simply, you don't give a damn about us. You don't give a damn about the facts of the attack on our ship. Your concern — and the concern of your audience — is for the forces who attacked us. For those who killed 34 of our shipmates."

The time is coming soon when all the Charlie Kirks will be called to account for their sins. I don't think Charlie's Israeli friends are going to have an escape pod for him when the rest of them scuttle off to Tel Aviv after what's coming comes. Charlie will be perplexed when all his "friends" will, as per pattern, slip across borders, melt into the shadows and move on to another country. Charlie will be left to face the music. It will be during that turmoil that Charlie (like Sean Hannity) will be scrambling to hide his Israeli flag lapel pin. I encourage both men to wear the lapel pins flamboyantly. To draw attention to them. To mark themselves out.

5. About the Weapons in the Mosque Video

Evidence obtained from the video strongly indicates that the weapons are not real firearms. What the evidence **does** support is the use of Airsoft replica rifles (Gas powered or Electric) for the following reasons:

- With the orange flash suppressor removed/replaced, they look exactly like a real firearm.
- The mechanism functions exactly like a real firearm.
- They have magazines that load BB rounds that look exactly like live rounds.
- They exhibit a considerably lower recoil action and effect exactly as demonstrated in the video.
- Strikes on a body and clothing, plus the lack of bodily trauma and damage to surrounding building material, is identical to that which occurs from a BB pellet. They will sting and possibly bruise exposed skin, but will not injure to any great degree unless hitting the face or soft tissue such as the eyes.
- When fired, they eject cartridge casings exactly like a real spent cartridge of a live round.
- They have a very similar sound, although obviously not the same as a live round because of the obvious power differential – but a sound track can be edited into a video post-production to further the illusion.
- They were widely available back in 2019 and prior.

It's hard to believe that there may be a bigger story today than the final score of the Super Bowl.

President Donald Trump learned today a Federal Whistleblower and former PA State Police employee has come forward with information and filed a criminal complaint this week on February 7, 2025, allegedly linking Pennsylvania Governor Josh Shapiro with the assassination attempt in Butler, Pennsylvania.

Allegations from the private criminal complaint,

"In the weeks leading up to the Trump Rally, President Joseph R. Biden, made frequent visits to Defendant Joshua Shapiro to discuss the obstacle faced by the Democratic party. Joshua Shapiro, organized, schemed, and conspired with other officials to carry out the attempted assassination against Former President Donald J. Trump."

"Governor Josh Shapiro, facilitated, planned, and coordinated the attempted assassination to climb the political ladder.."

"On July 13, 2024, this Affiant contacted the Secret Service to provide a tip which was blocked by Biden's Administration.

Agent John T. Donohue sent the complaint to Headquarters, but the Biden Administration blocked it.

On March 9, 2024, Supervisory Special Agent Kenneth Keller, advised this Affiant through email that he contacted the FBI Philadelphia Personnel, FBI victim services, and management at the Washington Field office, and that they advised him to direct the Affiant to Philadelphia FBI. Agent Kenneth Keller informed this Affiant that the crimes being reported are not occurring in his jurisdiction, and that he has no jurisdiction to assist Pennsylvania victims. He advised the Affiant to contact the Department of Justice. This affiant contacted the Department of Justice and Federal Bureau of Investigation. Up until recently, Ex FBI director Christopher Wray was conspiring with the Biden Administration and concealing the reports.

Now that he has resigned, this private criminal complaint must be investigated."

NEXSTAR ABC AFFILIATES TO PREEMPT "JIMMY KIMMEL LIVE!"

Company Objects to Talk Show Host's Comments on Killing of Charlie Kirk

IRVING, TX (Sept. 17, 2025)—Nexstar Media Group, Inc. (NASDAQ: NXST), today announced that the company's owned and partner television stations affiliated with the ABC Television Network would preempt "Jimmy Kimmel Live!" for the foreseeable future beginning with tonight's show. Nexstar strongly objects to recent comments made by Mr. Kimmel concerning the killing of Charlie Kirk and will replace the show with other programming in its ABC-affiliated markets.

"Mr. Kimmel's comments about the death of Mr. Kirk are offensive and insensitive at a critical time in our national political discourse, and we do not believe they reflect the spectrum of opinions, views, or values of the local communities in which we are located," said Andrew Alford, President of Nexstar's broadcasting division. "Continuing to give Mr. Kimmel a broadcast platform in the communities we serve is simply not in the public interest at the current time, and we have made the difficult decision to preempt his show in an effort to let cooler heads prevail as we move toward the resumption of respectful, constructive dialogue."

Hello BreachForums community, welcome back again.

This time, things will be different.

First, we apologize for the confusion caused by the "honeypot" talk and other stories. We are truly sorry and will now explain everything.
The truth is that "BreachForums" was originally a project of "ShinyHunters/hollow" and another group before them. Their entire group (hollow, shiny, etc.) was arrested. Only one person had the original "ShinyHunters PGP" key, and that person was our friend. As you might have guessed, we had a falling out. Therefore, the "honeypot" message you all saw is fake. He simply wanted us to shut down BreachForums, so that's what we did.
Now, after shutting it down and having all our domains seized within 15 days, I'm sure everyone believes we are FBI agents or something similar. We are not, and we will prove it to the BreachForums community.

We hereby announce that, in revenge for our arrested friends, we have successfully compromised **"MININT" — the French Ministry of the Interior.**
As the news in France reports, they only admit we accessed their private government email servers. So France, why aren't you talking about the **16,444,373 individuals** whose data we accessed from your police file,
You know about **"TAJ" (Traitement d'Antécédents Judiciaires — Criminal Records Processing)**. What about **"FPR" (Fichier des Personnes Recherchées — the database of all wanted persons)**? And there is more.
What about **INTERPOL**? Did you try to hide from them that we accessed the **"EASF MI"** system? Furthermore, why aren't you telling the French people and the world what really happened during those two weeks? The **DGFIP** (public finances)? Why no word? Or the **CNAV** (pensions)?

Anyway, it's not our problem. If a government can't even protect itself, imagine if a terrorist had obtained all this data. What would have happened?
Now, you will pay for what you did to our friends.
To prove to our community that we are not FBI or police agents, we are giving France **one week** to contact us at :

[redacted]

to negotiate what happens to their files.
(To prove your identity, check your audit logs and send a message containing my full Cheops account name.)

The more time you take, the more data we will leak. You now have two options:

1. Upon your purchase, all government data exfiltrated by us will be deleted.
2. We sell it to our community to prove we are not law enforcement.

🚨🔴 FRANCE🇫🇷 - CYBER NEWS 2025

The contact details of ALL FRENCH PEOPLE are found in a superb database that cross-references - aggregates data from +150 databases...

🤯 It's a total of +600 MILLION CUMULATED DATA POINTS SPECIFICALLY ON FRANCE

EVERYONE is included... Ministers, Senators, Deputies, Presenters, Journalists, Public Figures, Law Enforcement, Big Bosses, Bosses, YOU, ...
EVERYONE...

*I was able to run a few searches... and the result is impressive!

2026 IS GOING TO BE COMPLICATED...

Really, be extremely vigilant.

In the absence of coercive actions to encourage and/or force companies and institutions to be careful with our personal data... vigilance -it's sad 😢- remains your only ally.

You are doubly punished...

🚨🔴CYBERALERT 🇫🇷FRANCE🔴 | Cyberattack Ministry of the Interior: a claim + a message sent from the alleged minint domain is causing concern... 🚨

Last Thursday -11/12-, the Ministry of the Interior warned of a high probability "of suspicious activities targeting its email servers".

Laurent Nuñez, the current interior minister, later confirmed that there had been a cyberattack targeting the ministry's messaging systems in the night from Thursday 11 to Friday 12 December...

This was without counting the double and worrying twist that occurred this weekend...

1️⃣ An email (pppj-*******) was sent from the legitimate domain "interieur[.gouv.fr" announcing the reopening of BreachForums, the most famous Amazon of cybercrime.

Many are really hoping that this is a spoofed email -meaning a fake email designed to trick users into believing it comes from someone they know or trust-

2️⃣ An announcement in the form of a claim from the cybercriminals/friends of ShinyHunters who were put behind bars a few months ago... (I had told you about it).

"We hereby announce that, in retaliation for the arrest of our friends, we have successfully compromised the MININT, the French Ministry of the Interior.

As French media report, they only admit that we accessed their private government email servers. So, France, why don't you talk about the
16,444,373 people whose data we accessed in your police files?

You know the TAJ (Judicial Antecedents Processing). What about the FPR (Wanted Persons File)? And that's not all.

And INTERPOL? Did you try to hide from them that we accessed the EASF MI system? Furthermore, why don't you tell the French people
and the whole world what really happened during those two weeks? The DGFIP (General Directorate of Public Finances)? Why no word? And the CNAV (National Pension Fund)?"

This claim message was accompanied by screenshots to solidify their claim...

They are giving the French government one week to negotiate with them before retaliations.

[...]

Currently, not much is being said about cyberattacks and operations carried out by cybercriminals on France, but it's terrible. We strongly hope that this claim is not true... we dare to imagine the consequences!

We really need to have National Assizes on Cybersecurity and Data Protection...

[...]

NOTA: The reopened cybercriminal site has been very unstable for the past 36 hours. It is accessible then inaccessible then accessible... and so on.

Cyberly yours,

SaxX ¯_(ツ)_/¯

"My opposition to new meningitis mandates for every New York State seventh and twelfth grader has nothing to do with autism and everything to do with arithmetic ("Meningitis shot to be rule for schools," Oct. 28). Meningitis is a rare disease that affects only 390 people nationally last year. FDA and industry testing show the meningitis vaccine to be unusually low efficacy and high risk. The manufacturers' inserts predict that 1% to 1.3% of inoculated children will suffer "serious adverse effects." CDC's Pink Book forecasts that 0.3% of these will die from the vaccine. Of the 400,000 New York school children inoculated annually, some 4,000 will become ill and nine will die in order to prevent around four people from contracting the disease. At between $84 and $117 per shot, and with the requirement for a two-shot series, the law is an $80 million annual windfall for vaccine manufacturers at taxpayer expense. This math makes sense only to the pharmaceutical companies and the Albany politicians who have taken their money." - Robert F. Kennedy Jr.

How much aluminum is in vaccines?

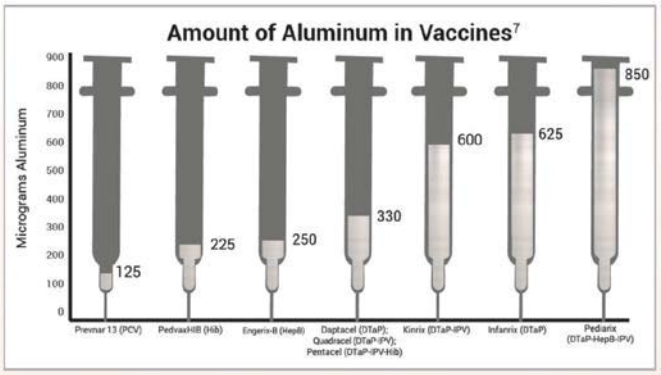

Figure 4: This graph shows the aluminum content of one dose of various vaccines administered to children. The administration of one dose each of Prevnar 13, PedvaxHIB, Engerix-B, and Infanrix at one visit delivers 1,225 micrograms of aluminum. PCV, Hib, HepB, and DTaP vaccines are administered multiple times by 6 months of age. The rate at which aluminum from vaccines migrates from human muscle to the bloodstream is not known.

VASECTOMY...It Is A 24 Billion Dollar Industry. Doctors Profit From Men's Long Term Health Being Totally Destroyed.

70% Of Men Develop Autoimmune Disease.

40% Increase In Dementia & Aphasia.

20% Diagnosed With Aggressive Prostate Cancer.

33% Suffer Permanent Chronic Pain...

You'd be hard pressed to find a urologist willing to be upfront about the risks associated with vasectomy - it's a 24 billion dollar industry.

A survey of 1,500 urologists in the US reported that 90% of doctors would not stop performing vasectomy, despite numerous reports of vasectomy being linked to prostate cancer & plenty of other medical conditions.

After a vasectomy, the natural duct for sperm is closed off. The testicles continue to produce 50,000 sperm per minute. The sperm build up pressure in the epididymis of the testicles, which eventually ruptures from pressure. Research shows as high as 33% of patients experience long term post vasectomy pain.

What happens to all those sperm cells? This is where the immune response comes in. The sperm are still produced & still burst out, but now they have nowhere to go except into the bloodstream, where they were never intended to be.

Certain organs - including the testes & the brain - exist in what is the equivalent of a gated community in the body. Tiny tubes within the testes (in which sperm are produced) are protected by a physical barrier of Sertoli cells. The tight connections between these cells prevent blood-borne infections & poisonous molecules from entering the semen.

After a vasectomy, however, the protective barrier is broken & semen mixes into the bloodstream. The immune system recognizes the sperm as invading foreign agents & produces anti-sperm antibodies in 70% of men.

Sperm cells are naturally active & have very strong enzymes. This is why a man's body has a strong layer of tissue known as the Blood-Testis Barrier (BTB). Vasectomy ruptures this barrier. A man's immune system sees the sperm as an infection that needs to be addressed, resulting in an immune response that's never ending. The body quickly (within 3-4 days) makes antisperm antibodies to attack his own cells.

This assault is not just confined to the sperm themselves, but affects other cells & tissues as well. There's no way to predict exactly what the reaction will be, but it is known that 75% or more of post vasectomy men will begin to produce these antisperm antibodies, leading to autoimmune disease pathology in almost 70%. According to a study in Finland, the "presence of sperm antibodies correlates with nearly every pathological condition of the male reproductive tract."

Dr. Bryan Ardis just dropped a 500-year-old medical bombshell most people have never heard.

He says: for five centuries – starting in the 1500s – physicians worldwide published case after case in medical journals showing that pure nicotine from the tobacco plant completely resolved every known form of cancer and tumor in their patients.

He claims he can show the exact dates, the doctors’ names, and the original publications.

Then he reveals that in 2024, Merck’s Keytruda – one single cancer drug – generated $30.6 billion in revenue. That’s more than the GDP of many countries… from one drug.

His question: if this historical medical record exists for half a millennium, why did governments and health agencies spend decades warning the world that the tobacco plant is deadly, while billions flow to modern cancer treatments?

Watch the 55-second clip below where Dr. Ardis walks through the timeline and the money trail.

He is not telling anyone to smoke or self-medicate – he’s asking why these centuries of published observations were never part of the public conversation.

Sound on. Then tell me in the comments:
Do we deserve transparent access to 500 years of medical literature?

Western Pseudohistory Theory

Article Talk

The term "**Western Pseudohistory Theory**" (simplified Chinese: 西方伪史论; traditional Chinese: 西方偽史論; pinyin: *Xīfāng wěi shǐ lùn*) is a catch-all term referring to a series of Russian-inspired Chinese fringe theories that question the authenticity of Western history, and which generally hold that the histories of ancient Greece, ancient Egypt, and ancient Rome contain a large number of fabrications, or even that all of them are fabricated. Many elements of this theory are borrowed from Russian mathematician Anatoly Fomenko's new chronology theory, and have thus been traced back to French scholar Jean Hardouin. In 2013, after Chinese art scholar He Xin published his book *Research on Pseudo-history of Greece* questioning the existence of ancient Greece, this theory gradually spread on the Chinese Internet. The Chinese historiography and classics community either completely disagrees with this theory or simply does not want to spend time refuting these claims.

History

At the end of the twentieth century, Russian mathematician Anatoly Timofeyevich Fomenko put forward some fringe theories in his books that questioned world history, for example, he argued that no artifacts had

In 2013, He Xin published *Research on Pseudo-history of Greece*. In the book, He Xin argues that Leontius Pilatus and Giovanni Boccaccio tampered with the original text of the *Iliad* in the course of translating it from Greek to Latin, commissioned by Francesco Petrarch, and that this tampered Latin translation became the reference text for later translations in other languages, and He Xin claims that this series of events was manipulated by the Freemasons. In addition, the existence of Aristotle has also been questioned, as He Xin argues that Aristotle himself did not exist, based on the fact that, due to the problem of transcription, Miao Litian, the author of the Chinese edition of the *Works of Aristotle*, has stated that some of Aristotle's writings may have been incorrectly copied by later generations.[12][13] In 2017, Chen Ping, a professor at Fudan University, expressed his agreement with Fomenko and He Xin, and stated that due to the high value of papyrus and parchment, it is impossible for ancient Greek documents to have survived intact into the Renaissance, and therefore "could only have been fabricated by people hired by Italian bankers during the Renaissance". In addition, documents in Arabic introduced to Europe during the Renaissance were also thought to be non-existent, and Chen Ping believed that they were

In 2024, in an interview with *Southern Weekly*, Huang Heqing argued that ancient Greek sculpture and architecture were too fine, and also argued that ancient Greece at that time could not have had iron tools, so it was impossible to sculpt; while ancient Greece's rivals in this period were fabricated to play as a rivalry to Western history, for example, the temperature of the Iranian plateau was very high in the spring so that it was not possible to give birth to such a state as the Achaemenid Empire.[8]

Declaration of Arbroath

Most Holy Father, we know and from the chronicles and books of the ancients we find that among other famous nations our own, the Scots, has been graced with widespread renown. It journeyed from Greater Scythia by way of the Tyrrhenian Sea and the Pillars of Hercules, and dwelt for a long course of time in Spain among the most savage peoples, but nowhere could it be subdued by any people, however barbarous. Thence it came, twelve hundred years after the people of Israel crossed the Red Sea, to its home in the west where it still lives today. The Britons it first drove out, the Picts it utterly destroyed, and, even though very often assailed by the Norwegians, the Danes and the English, it took possession of that home with many victories and untold efforts; and, as the histories of old time bear witness, they have held it free of all servitude ever since. In their kingdom there have reigned one hundred and thirteen kings of their own royal stock, the line unbroken by a single foreigner.

This explains the desperation of the pro-Israel lobby's efforts to curtail freedom of speech. But the more they try to shut Americans up, the more people will turn against Israel's policies.

All my friends are turning into Nazis and I can't stand it anymore.

I'm a 30 year old white guy. I just wanna chill, play games, and watch movies with my boys. But the older we get the more of them out themselves to me as racist, homophobic, or just straight up Nazis. I'm not talking edgy humor, I'm talking about stopping our Mario Kart game to go on a 30 minute tirade about how race-mixing is bad or that all gay and trans people are all secretly child molesters.

They weren't always like this. When we were kids we all agreed that bigotry like this was for stupid old people. I feel like it's really kicked in the last few years. I've heard of people getting more conservative as they age, but I never imagined It'd be like this. And now I'm the only one left in the friend group who believes ludicrous things like "gay people should be allowed to get married" and "black people are human beings". I feel like a fucking crazy person and don't know what to do or where to go from here. I've argued, debated, and shown evidence until I'm blue in the face but I should have known from the start that was pointless.

The worst part is they're technically good friends! They've supported me, laughed, cried, grieved with me through every up and down through my life. Some of them would take a bullet for me without a second thought. I used to think I was the luckiest guy in the world. But I just can't take it anymore. I feel like my soul is dirty after every hang out, listening to this vile shit coming out of their mouths. I know I gotta walk away but it's tough, I've known these people since I was a child, and being 30 having to start completely fresh and make new friends just sounds impossible.

Shit sucks. I just wish it didn't turn out this way.

Defying science, American parents are turning away from male circumcision

"Our risk-benefit analysis showed that benefits exceeded procedural risks... by up to 200 to 1."

Ross Pomeroy

My wife and I are currently expecting our first child in late October, a boy, and we recently started discussing whether or not to circumcise. For those unaware, circumcision is the surgical removal of the foreskin covering the tip of the penis. I entered the discussion in favor, but with no strong feelings either way. However, after researching the scientific literature and expert opinion, I came out firmly for the procedure, and frankly somewhat frustrated at the recent trend against it.

It's not hip to nip the tip

My fast journey from liberal Democrat to Conserative Republican.

Flaired Users Only

I voted for Hillary and then moved to Seattle. I would take my kids to the aquarium, only to find ourselves stepping over discarded needles while police officers stood by, doing nothing as people openly used drugs. It was a shocking reality for me.

Then came the push to defund the police budget by 50%, prompting many officers to resign. When homeless encampments began appearing on my block, the police wouldn't even respond.

During the CHAZ/CHOP takeover, I told my wife that people would inevitably die there—and sadly, they did. The BLM riots that followed shattered all the windows on the first floor of my building.

When I dared to question the origins of COVID or the efficacy of masks, I was branded a Nazi. I asked my wife, "How is this culture even possible here?" Her response was simple: "It's all liberal Democrats."

I spent months researching and watching Trump's remarks in their full context, only to realize I had been duped. Now, I find myself reflecting on how I was manipulated for the first 45 years of my life from the media. I actually felt my brain do a summersault when it all hit me. I truly understand what it means to be red pilled now.

THE JEWISH ENCYCLOPEDIA

Agriculture

In America. On the virgin soil of America the Jews were among the pioneers of Agriculture. While Louis de Torres introduced tobacco into use for civilized mankind (Kayserling, "Columbus," p. 95), Jews transplanted the sugar-cane from Madeira to Brazil in 1548 (according to Fishell; see M. J. Kohler, "Publ. Am. Jew. Hist. Soc." ii. 94) or in 1531 (Lindo, in G. A. Kohut's article, *ibid.* iii. 135; compare Joseph ha-Kohen, in R. Gottheil's translation, *ibid.* ii. 133). During the seventeenth century the sugar industry was monopolized by the Jews, and with their expulsion from Brazil it was transplanted to the West Indies, where, in 1663, David de Mercato's invention of new sugar-mills benefited the sugar-trade in Barbados. The Jews in Georgia, chief among them Abraham de Lyon, transplanted vine and silk culture from Portugal to America ("Publ. Am. Jew. Hist. Soc." i. 10). But while De Lyon cherished great expectations in that direction, the Jews of Georgia in general found the production of indigo, rice, corn, tobacco, and cotton more profitable (*ibid.* p. 12). In fact, the cotton-plantations in many parts of the South were wholly in the hands of the Jews, and as a consequence slavery found its advocates among them. K.

No.

If you think Islamophobia and antisemitism are the same thing, you have serious problems with your thinking.

Those words trace back to Islam and Judaism—and those are not just “not the same”, they’re essentially antithetical.

Israel sees Europe as a Lost Cause

Naftali Bennett נפתלי בנט
@naftalibennett

Translated from Hebrew by Grok Show original

Europe is becoming Islamized.

Over half of the children in Brussels, and about 40% of the children in Amsterdam, Vienna, and London are Muslims.

This is an unimaginable statistic with enormous global implications, and of course, dramatic consequences for us, Israel.

Politicians are always influenced by the public, and as the Western European public becomes increasingly Muslim, it is clear that we will see more anti-Israel policies.

Israel must prepare for this in many dimensions:
Diversifying trade destinations, identifying and strengthening ties with other countries and regions (such as India, the Emirates, and others), reducing security-economic dependence on Western Europe, creating assets we can leverage, and more.

The world is changing, and we must be ready.

When the President of Brazil, Lula @LulaOficial, disrespected the memory of the Holocaust during my tenure as Minister of Foreign Affairs, I declared him persona non grata in Israel until he apologized.
Now he has revealed his true face as a declared antisemite and supporter of Hamas by withdrawing Brazil from the IHRA – the international body created to combat antisemitism and hatred against Israel – placing the country alongside regimes like Iran, which openly denies the Holocaust and threatens to destroy the State of Israel.
As Israel's Minister of Defense, I affirm: we will know how to defend ourselves against the axis of evil of radical Islamism, even without the help of Lula and his allies.
Shame on the wonderful Brazilian people and the many friends of Israel in Brazil that this is their president. Better days will still come for the relationship between our countries.

Today, as we witnessed yet another attempt to silence pro-Israel voices, we are reminded of the constant threats facing Rabbi Shmuley. For years, he has stood boldly for Israel and the Jewish people—yet he has been physically assaulted in Vienna, Miami, Sydney, and even in Times Square.

The dangers are real, and they only continue to grow. To ensure his safety and his ability to continue this vital work, we urgently need to raise funds for cameras, fencing, and professional security personnel. Without these protections, Rabbi Shmuley and his family remain exposed to unacceptable risks.

Antisemitism Uncovered: Myth – Jews Killed Jesus

In a brazen act of financial deception, Malachy Goldbloom allegedly stole $34 million in a single morning through an audacious stock market scam before fleeing the country. Goldbloom reportedly set up a fictitious company and took it public with an astonishing 20 billion shares. By selling just one share for $23, he manipulated the company's market valuation to an eye-popping $460 billion, instantly drawing attention on the stock exchange. As automated trading bots and index fund investors, lured by the soaring price, snapped up shares, Goldbloom cashed out with millions. Authorities say he boarded a plane to Israel at 10 a.m., just 30 minutes after the market opened, leaving regulators and investors scrambling to unravel the fraud.The scheme, which exploited the mechanics of high-frequency trading and market perception, has sent shockwaves through the financial world, raising urgent questions about oversight and security in modern stock exchanges. Law enforcement agencies are unable to launch an international manhunt as alleged stolen funds are under $50 million. The Securities and Exchange Commission is investigating how such a blatant manipulation went undetected.

Sir:

I have long since believed that in spite of all the vigilance that can be infused into Post Commanders that the Specie regulations of the Treasury Dept. have been violated, and that mostly by Jews and other unprincipled traders. So well satisfied of this have I been that I instructed the Commdg Officer at Columbus to refuse all permits to Jews to come south, and frequently have had them expelled from the Dept. But they come in with their Carpet sacks in spite of all that can be done to prevent it. The Jews seem to be a privileged class that can travel any where. They will land at any wood yard or landing on the river and make their way through the country. If not permitted to buy Cotton themselves they will act a Agents for some one else who will be at a Military post, with a Treasury permit to receive Cotton and pay for it in Treasury notes which the Jew will buy up at an agreed rate, paying gold.

There is but one way that I know of to reach this case. That is for Government to buy all the Cotton at a fixed rate and send

it to Cairo, St Louis or some other point to be sold. Then all traders, they are a curse to the Army, might be expelled.

But, still, some would waltz to the front, "I just have a quick question," and the non-fryer says, "I don't think so, pal. We all have questions. Get in line." > JERUSALEM — Retiring Israeli Prime Minister Yitzhak Shamir said in an interview published Friday that if he had been re-elected he intended to drag out talks on Palestinian self-rule for 10 years while attempting to settle hundreds of thousands of Jews in the occupied territories.
>
> In remarks to the Hebrew daily Maariv, Shamir spoke in blunt terms about what he said had been his real intentions if re-elected. Shamir's Likud coalition was defeated by Labor leader Yitzhak Rabin, who pledged anew Friday to accelerate the peace talks with the Palestinians.
>
> Rabin also announced that he would attempt to slash all the special subsidies and financial incentives for Jewish settlers in the territories, such as low-cost mortgages.
>
> Shamir's government had participated in several rounds of peace talks with the Palestinians toward self-rule, and made several modest proposals for greater Palestinian autonomy in the territories. But Shamir's remarks Friday suggested that he never intended to make progress toward Palestinian self-rule.

>
> Shamir was quoted by Maariv as saying he found it "painful that in the coming four years I won't be able to increase settlements in Judea and Samaria and Gaza."
>
> A spokesman for Shamir said Friday night that the prime minister had spoken to the newspaper by telephone, but claimed that Maariv had "put words in his mouth." The spokesman said he had not asked Shamir about the interview but added, "I have never heard him express an opinion like that."

Here is Hitler describing the "chill down his spine", when he discovered Jews were primarily managing the sex slave trade.

It's similar to discovering virtually all the folks involved in Epstein's blackmail sex ring are Jews...

The street again offered some truly ugly object lessons. The relationship of Jewry to prostitution and, even more, to white slavery itself could be studied in Vienna more so than in probably any other Western European city, with the possible exception of southern French seaport towns. If a person walked the streets and alleys of Leopoldstadt (Leopold Town) in the evening, all along the way you could see things which remained hidden from the great majority of the German people. *(Leopoldstadt is a district in Vienna separated from the main city by the Danube waterways. The area was heavily Jewish and considered a ghetto.)* These things remained secret until the First World War gave the soldiers on the Eastern front an opportunity, or rather forced them to see similar happenings.

It sent a chill down my spine when I first realized the Jew was the manager of this immoral trade among the scum of the city. He was icy calm and shamelessly businesslike which made me fuming angry. Now, I no longer evaded discussing the Jewish question. Now I wanted to discuss it. I had seen the Jew in every area of cultural and artistic life, then I suddenly encountered him in another spot where I would have least expected to see him, and I recognized the Jew as the leader of Social Democracy, the Marxists, and that is when the blinders fell from my eyes. Suddenly, a long, spiritual struggle came to an end.

Three Israeli tourists allegedly attempted to rape two Finnish tourists in Phuket, Thailand, according to Thai media reports.

Israel's Embassy in Thailand is unaware of the incident, the Ynet news site reports.

The three Israelis are said to have followed the two Finnish women to their hotel room, broke in, and tried to rape them.

A passing Russian tourist who witnessed the alleged attack and intervened was injured in the face, the reports say. He has been hospitalized in a stable condition, according to the reports.

The three suspects fled the scene, the reports add.

🚨**This is cold, hard, Pulitzer-winning journalism, not a conspiracy theory.**

Israeli investigative journalist **Ronen Bergman** (Pulitzer Prize winner, Israeli security adviser, NYT correspondent) uncovered something outrageous:

Between 1980 and 1983, a Lebanese resistance group called the "Front for the Liberation of Lebanon from Foreigners" carried out bombings, assassinations, and acts of terrorism.

Except — It was a front. A fake terrorist group, created and run by the IDF.

Let that sink in.

The IDF manufactured a terrorist organization, conducted acts of terrorism, and then used it to destabilize Lebanon. Terror attacks—sponsored and executed by a Western-backed military force.

If this happened then, what do you think is happening now?

Think.

panic, she smothered her child.

In the wake of the Nahariya atrocity, Raful Eitan, the I.D.F. general, gave the regional commander Avigdor Ben-Gal a simple order: "Kill them all," meaning all members of the P.L.O. and anyone connected to the organization in Lebanon. With Eitan's blessing, Ben-Gal appointed the man he considered the I.D.F's top expert in special ops, Meir Dagan, to lead the efforts in south Lebanon. The three of them set up the Front for the Liberation of Lebanon From Foreigners. The operation ran almost entirely without the authorization or knowledge of the rest of the military, the defense ministry, the intelligence agencies or the government. (I did not speak with Eitan, who died in 2004, about any of these events.)

Between 1979 and early 1983, when it disbanded, the Front killed hundreds of people. David Agmon was head of the I.D.F's Northern Command staff, one of the few who knew of Dagan's secret ops. "The aim," he said, "was to cause chaos among the Palestinians and Syrians in Lebanon, without leaving an Israeli fingerprint, to give them the feeling that they were constantly under attack and to instill them with a sense of insecurity." In order to do that, Dagan and his crew recruited Lebanese locals: Druze, Christians and Shiite Muslims who resented the Palestinians and wanted them out of Lebanon.

ABSTRACT

Millions if not billions of people now believe that the world is under a bioweapons attack. A lot of blame has been placed on the US funding of bioweapons. Dr. Anthony Fauci, Director of the US NIAID/NIH has come under severe criticism for funding the infamous "Gain of Function" research. Many believe Fauci has not acted alone or even on his own accord. The Author worked as a fellow at NIAID/NIH from 1988 to 1991, starting soon after Fauci became head of NIAID. The author witnessed first hand infiltration of NIAID/NIH by Israel's Mossad. While working at NIAID/NIH one or more coworkers expressed a need to "preempt the next Jewish Holocaust". For thirty years since leaving NIH the Author has paid close attention to Mossad's involvement in illegal US bioweapon activity and attempts to disclose his observations. The Author hopes to educate the public on the current bioweapon attack with COVID-19 and vaccines. The Author believes that Mossad intends to kill billions of people. Already 70% of the world's population have received a COVID-19 vaccine which in all appearance has the ability to cause deadly non curable prion disease. The Author hopes the information provided will help those interested in ending this covert war.

Israeli Minister Amihai Eliyahu: "We want the Syria, Lebanon and Gaza. If you see yourself small then you are goy! »

Israeli Minister Amichai Eliyahu caused an uproar on June 12, 2025 in insulting humanity with the term "goy" and claiming sovereignty over the West Bank, Gaza, Syria and Lebanon. His extremist comments threaten the regional peace and recall its past calls for a nuclear strike on Gaza.

In 1993 Michael Jackson wrote a song called “Palestine Don’t cry.”

His Jewish producers (Sony Records) would not let him release it.

When was Michael Jackson first accused of child Sex abuse? - 1993.

Who accused him? A failed Jewish dentist Evan Chandler. (On behalf of his son.)

The Psychiatrist that “interviewed” the young supposed molested boy ? Richard Gardner. Jewish.

The press that defamed him? Jewish

His sister Latoya Jackson said the allegations were true, only to later in life admit that her Jewish husband was beating her and told her to do it.

Michael Jackson was never convicted of any wrongdoing.

"They suck they're like leeches," "It's a conspiracy. The Jews do it on purpose."

I highly doubt this will make Western news, so I'll do my best to play journo here-

Israel has been demanding the PRC (aka China) condemn Palestine.
The PRC has been refusing to get involved on either side.

So the Israelis flooded Weibo (Chinese twitter) with thousands and thousands of bot accounts pretending to be Chinese citizens criticizing their own gov for being "pro-palestine".

Israel's problem was, they didn't understand Chinese culture.
Because while being critical of the Chinese gov on social media isn't always illegal (contrary to popular belief), culturally it is an extremely unchinese thing to do.

So everyone noticed the flood of clearly-not-chinese bots immediately, and pretty quickly figured out who was behind the propaganda campaign.

Weibo has now banned every single Israeli consulate and embassy account and the rumor is that the Israeli ambassador has fled the country.

Because while being critical of the PRC is not necesarily illegal in China, running a foriegn propaganda campaign against the state is highly illegal.

Israeli historian Yuval Noah Harari argues that Israel's conduct against the Palestinians is causing the greatest catastrophe Judaism has ever faced.

Israel is acting on an "ideology of Jewish supremacy and on the worship of what were completely anti-Jewish values for the last two millennia."

Israel will be strong militarily and economically, but it will be a spiritual catastrophe because "no Jew, say in London or New York or anywhere else, will be able to say this is not the real Judaism."

If a pro-Israel Zionist synagogue in the U.K was attacked because of the genocide in Palestine then we shouldn't be surprised or horrified.

Firstly, synagogues have been found to not be some benign neutral places of worship. They are known to be used to not only indoctrinate Zionist ideology into young Jews who are radicalised into IOF recruitment, but they are also essentially used as corporate buildings with financial ties to Israel, where real estate events are routinely held for the illegal sales of illegal settlement properties in occupied Palestine.

Secondly, Zionist Jews have spent 2 years convincing us that "Zionism and Judaism are the same". I mean literally every single time I have respectfully delineated between Zionism and Judaism, I have been corrected that "95% of Jews worldwide support Israel" so if I'm criticising a Zionist I'm criticising all Jews. I am also continuously told by Zionists that ethnic cleansing Palestinians is essential to Jewish religious doctrine, Palestine was "promised to them by God", and their "divine right on that land" makes them the only rightful inhabitants.

I mean, if they want us to really believe in their "Jewish supremacy" and that 2 million indigenous people must be killed and starved for European Jews to feel more comfortable while they bathe on beaches that don't belong to them, then I'm sorry, but any hate towards said Jews would be valid.

We should be expecting more of these kinds of incidences, tbh. The moral world's patience pressure valve has burst.

Also. as expected, I'm seeing a lot of "I'm horrified..." statements coming out of the usual suspects - the "I condemn" crowd. So let me just remind you of what has actually been horrific.
What has been horrific is watching children be set on fire, limbs torn apart, heads blown open, being devoured by street animals because rescue crews are shot if they even try to retrieve bodies - all this in the name of Jewishness. That's what has been horrific.

It's really quite simple.
If you want Jews to feel safe, stop allowing Zionist Jews to annihilate Palestinians in the name of their Jewishness.

A far cry from being a safe haven for Jews, Israel is fully responsible for any and all hate that will naturally be directed towards Jews worldwide because Israel just can't stop killing people and world leaders refuse to stop them.

They have said that he has been sending them messages saying that his trip to 'israel' hasn't gone exactly as planned and feels that on a couple of occasions he was outrighted humiliated.

He also made a coded reference in one message about fearing the repercussions if he steps out of line again as he did when he blamed 'elite jews' for mass immigration to the West.

If this is true then he is in a total Catch-22 situation.

In Aztec mythology, **Yacatecuhtli** ([jaka˙tekʷt͡ʃi]) was a patron god of commerce and travelers,[1] especially business travelers. His symbol is a bundle of sticks. Merchants would carry a cane as they moved from village to village peddling their wares, and at night-time would tie them together into a neat bundle before sprinkling them with blood from their ears. It was believed that this ritual in Yacatecuhtli's honor would guarantee success in future business ventures, not to mention protection from vicious beasts and robbers on their journeys.

A drawing of Yacatecuhtli in the Codex Borgia

His name means "lord of the nose" (Nahuatl *yacatl*, nose and *tecuhtli*, lord), or more figuratively "lord of the vanguard," as a vanguard goes ahead of the main body similar to how a nose is always in front of one's body.[2]

My brother highlighted the other day that the story of Rumpelstiltskin is strange. It's about a little man who:

- will weave your hay into gold (forge wealth out of nothing)
- he'll help you to please the king (and get in with the authorities)
- but, he'll take your child in exchange (snatch away the next generation)
- the only way to defeat him is to say his name (he'll start stamping his feet in rage and dissappear if you name him)

Were our ancestors trying to warn us about something?

Most people don't know that Jews, before interbreeding with Gentile races, had a very distinct look in antiquity.

During the Ming Dynasty (1368–1644), a Ming emperor conferred eight surnames upon the Jews, by which they are identifiable today: Ai (艾), Shi (石), Gao (高), Gan (甘), Jin (金), Li (李), Zhang (張), and Zhao (趙).[30][31] Two of these, Jin and Shi, are the equivalent of common Jewish names in the west: Gold and Stone.[32][33]

The Jew steadily works to ruin women and girls so that he can break down the barriers of blood on an even larger scale. It was the Jews who brought the negro to the Rhine. The motive behind this is clear and his intention is always the same. He wants to destroy the hated white race through bastardization. He continues to bring negroes in as a flood and force the mixing of races. This corruption puts an end to white culture and political distinction and raises the Jew up to be its masters. A racially pure people, which is conscious of its blood, can never be defeated by the Jew. In this world, the Jew can only be the master of bastards. This is why he continually tries to lower the racial quality by poisoning the blood of individuals among the targeted peoples.

The Jew begins to replace the political idea of democracy with that of a dictatorship for the working class. In the organized masses who follow Marxism, the Jew finds he is holding a weapon that allows him to do without democracy and permits him instead to conquer and rule the people through the iron hand of a dictatorship. The Jew works systematically in two directions for the revolution: economically and politically. Any nation that violently resists his internal attack is surrounded by a net of countries which fall more easily. This ring forms a network of enemies around his target and incites the nation into war, and finally, if necessary, when the troops are on the battlefield, he raises the flag of revolution, right when the country is least prepared.

Economically, the Jew shakes the State until its social services begin to sway. They become so costly that they are transferred away from national control and put under his financial control. Politically, he blocks funding and denies the State access to the resources it needs for self-preservation, he destroys the foundations of any national resistance or defense, he destroys faith in the government leadership, he ridicules the nation's history, and he drags everything that is truly great into the gutter.

>American Jews are committed to cultural tolerance because of their belief - one firmly rooted in history - that Jews are safe only in a society acceptant of a wide range of attitudes and behaviors, as well as a diversity of religious and ethnic groups. It is this belief, for example, not approval of homosexuality, that leads an overwhelming majority of American Jews to endorse "gay rights" and to take a liberal stance on most other so-called "social issues."
American Jewish Journalist Charles E. Silberman (1985) "A Certain People"
>Most important for the content of immigration reform, the driving force at the core of the movement, reaching back to the 1920s, were Jewish organizations long active in opposing racial and ethnic quotas. These included the American Jewish Congress, the American Jewish Committee, the Anti-Defamation League of B'nai B'rith, and the American Federation of Jews from Eastern Europe. Jewish members of the Congress, particularly representatives from New York and Chicago, had maintained steady but largely ineffective pressure against the national origins quotas since the 1920s....

As anti-jewish sentiments continue to rise, you are going to see jews and former fanatical jew-lovers suddenly side with the rising tide of anti-jewish sentiment. You're going to see jews start speaking out against all the evils jews have done to White people.

Why? Because those jews and jew-lovers are going to try to gain and maintain influence over the pro-White community. jews have no problem being anti-jewish, if it means that jews can control the anti-jewish movement.

Keep your eyes open for this in the very near future.

45 PRINCIPLES OF ENSLAVEMENT OF THE POLISH NATION JAKUB BERMAN'S SECRET SPEECH

Executioner – Jakub Berman
Uncle of Marek Borowski

I found the text on the web a long time ago and made an animation out of it to read on youtube. Unfortunately, the video has recently been blocked, so I decided to upload the text to NMP.

As for the originality of this speech, let the history of our nation oppressed by war take its course. Compare the points in the text with actual events.

Transcript of the Secret Report of Comrade Jakub Berman delivered at a meeting of the Executive of the

TOP SECRET Instruction Nk/003/47

The Jewish scenario of enslaving states and nations. The Moscow governors had to comply with it under pain of immediate summons to Moscow or Gulag banishment. The Jews have the opportunity to take over the whole of state life in Poland and to extend their control over it. Do not push yourself into representative positions. In ministries and offices, create the so-called second suit. Take Polish surnames. Conceal their Jewish origins. To create and spread opinions among the society and to confirm them in the belief that Poles who are in charge and that Jews do not play any role in the state.
In order to shape the opinion and worldview of the Polish nation in the direction desired for us, propaganda with its most important sections – press, film, radio – must be in our hands in the first place. In the army, fill political, social, economic and intelligence positions. To firmly strengthen itself in the national economy. In the ministries, the Ministry of Foreign Affairs, the Ministry of Treasury, Industry, Foreign Trade and Justice should be brought to the fore when staffing Jews. From central institutions – trade centres, cooperatives. As part of a private initiative, maintain a strong position in the field of trade during the transitional period. In the party, we should use a similar method – to sit behind the backs of Poles, but to manage everything.
The settlement of Jews should be carried out with a certain plan and benefit to the Jewish community. In my opinion, we should settle in larger clusters, such as: Warsaw, Krakow; in the centre of economic and commercial life: Katowice, Wrocław, Szczecin, Gdańsk, Gdynia, Łódź, Bielsko. Typical industrial and agricultural centres should also be created, mainly in the recovered territories, not stopping at Wałbrzych and Rychbach – now Dzierżoniów. In these centres we can adapt our future staff in those professions with which we would be poorly familiar.
To recognize anti-Semitism as the main betrayal and to eradicate it at every step. If it is stated that a Pole is an anti-Semite, he should be immediately liquidated with the help of the security authorities or the Polish Workers' Party militias as a fascist, without explaining the essence of the matter to the executive organs.
The Jews must work for their victory, while at the same time working for the victory and the consolidation of communism in the world, for only then and under such a system will the Jewish people achieve the highest prosperity and secure their strongest position. There is little prospect of a war. If America begins to socialize quickly, then this way of smaller or larger internal upheavals, and communism must prevail there. Then the Jewish reaction, which today is with the international reaction, will betray it and decide that the Jews standing on the other side of the barricade were right. A similar case of cooperation between Jews from all over the world, professing two different political concepts – communism and capitalism – occurred in the last war. The two greatest world powers, completely controlled by and greatly influenced by the Jews, shook hands.
The toil of the Jews working around Roosevelt led to the fact that the USA together with the USSR took up arms to fight against Central Europe, where the cradle of a new idea, based on hatred towards Jews, was born. The Jews did it because they knew that in the event of an Axis victory, and mainly a Nazi Germany, which perfectly saw through the plans of Jewish policy, the danger of racism would become a fait accompli in the USA and the Jews would disappear from the face of the world. That is why the Soviet Jews sacrificed the blood of the Russian people for this purpose, and the American Jews invested their capital.
Onit is important to expect a further influx of Jews to Polish, because there are still many Jews in Russia. Before the Germans invaded, there were several concentrations of Polish Jews in individual cities of the USSR: Kharkiv – 36,200, Kiev – 17,800, Moscow – 53,000, Leningrad – 61,000, in the western republics – 184,730. This element is currently being trained in the USSR. These are the cadres of the builders of Polish – i.e. according to the Politburo project – these professionals will fill the most important areas of life in Poland, and all Jews will be located mainly in the centres of the country.
The old Jewish policy failed. We have now adopted a new one, combining the goals of the Jewish people with the policy of the USSR. The basic principle of this policy is the creation of a ruling apparatus composed of representatives of the Jewish population in Poland. Every Jew must be aware that the USSR is a great friend and protector of the Jewish people, that although the number of Jews has decreased enormously compared to the pre-war state, today's Jews show greater solidarity. Every Jew must be instilled with the conviction that all others are working alongside him, shrouded in the same spirit leading to a common goal. The Jewish question will occupy the minds of Poles for some time, but this will change to our advantage when we manage to educate at least two Polish generations.
According to the data of the Provincial Jewish Committee, there are currently over 40,000 Jews in Upper and Lower Silesia. About 15,000 Jews are to be employed in the settlement. The districts of Rychbach (Dzierżoniów) and Nysa are planned for these purposes. The settlement campaign is financed by Jewish foreign and state funds. The Jews deliberately create a new, though temporarily insignificant, concentration of the Jewish element, laying the foundation for the profession of farmer and industrial workers. It is building the basis for broader political goals

1. No field informers recruited from natives should be received in the embassy building. Meetings with these people are organized by our special services in public places. Information is received by the embassy through our special services.

2. Special care should be taken to ensure that there are no contacts between our army and the civilian population of the country. It is unacceptable for our officers to visit the homes of the natives, nor for our privates to establish contacts with local women, people or natives.

3. To accelerate the liquidation of the natives associated with the KPP, PPS, Walter, KZMP, AK, BCH and other groups that were formed without our inspiration. To this end, take advantage of the fact of armed opposition.

4. To make sure that soldiers who had been on our territory before joining the Kościuszko Army were sent to all combat operations in the first place. To bring about their complete liquidation.

5. To accelerate the unification of all parties into a single organization and to ensure that all key positions are staffed by people approved by our special services.

6. To bring about the unification of the entire youth movement into one organization, and positions from the district level upwards by people approved by our special services. Until the unification, the well-known leaders of scouting should be liquidated.

7. To cause and ensure that the delegates appointed to the party congresses do not retain their mandates for the term of office of the party authorities elected by them, and under no circumstances may the delegates convene inter-company meetings. If it is necessary to convene such a meeting, people who have been active in putting forward concepts and postulates should be eliminated. For each next congress, we should choose new candidates, only selected by our special services.

8. Close attention should be paid to people who are distinguished by their organizational sense, who can gain popularity. Such people should be recruited, and in the event of refusal, they should not be allowed to higher positions.

9. Ensure that employees in public positions (with the exception of law enforcement and mining workers) receive low wages. This applies especially to the health service, the judiciary, education and managers at various levels.

10. Introduce people cooperating with our special services (without the knowledge of the national authorities) into all authorities and larger workplaces.

11. Particular care must be taken that the local press does not give the total quantities and types of goods sent to the USSR. It also cannot be called trading. It is necessary to make sure that the national press emphasizes the amount of goods sent by us to Polish, but mentions that it is as part of trade.

12. Influence the national authorities so that the purchasers of land, land and plots do not receive title deeds, but only deeds of grant.

13. To direct the policy towards individual farming so that running a farm becomes unprofitable and productivity is as low as possible. Next, collectivization of the countryside should begin. In the event of stronger opposition, the supply of means of production to the countryside should be reduced and obligations to the state increased. If this does not help, cause agriculture to not fully cover the country's food needs and base food on imports.

14. To make all legal, economic and organizational orders and acts (except for military ones) not precise.

15. To ensure that several commissions, offices and social institutions are set up for each case, but none of them should have the right to make a final decision without consulting the others. (Not applicable to the mining industry).

16. Local governments in workplaces cannot have any influence on the direction of operation of enterprises. They can only deal with the way the assigned tasks are performed.

17. Trade unions may not be able to object to the management's instructions. Burden the unions with other work, such as organizing holidays, supplies, entertainment and educational activities, trips and distributing attractive goods, confirming the opinions and decisions of political authorities.

18. It is necessary to ensure that only those employees who perform the tasks assigned to them in an exemplary manner and do not show a tendency to analyse matters that do not go beyond these activities should be promoted.

19. Nationals in party, state and economic positions should be provided with conditions for action that will compromise them in the eyes of their subordinates and voters and prevent them from returning to the environments from which they come.

20. Officers recruited from among the natives can be entrusted with appropriate positions, provided that our special services are already there.

21. To supervise the amount of ammunition for all types of weapons from every arsenal of actions and exercises in live shooting, to conduct a kind of accounting.

22. To take special supervision of all laboratories and scientific and research institutions.

23. Particular attention should be paid to the rationalizing and inventive movement, it should be developed and supported, but all discoveries should be carefully recorded and recorded, and forwarded to the headquarters. Only those inventions that are useful in the mining industry, pre-treatment and specified in special instructions should be allowed to be implemented. Discoveries that could lead to an increase in production at the expense of reducing the extraction of raw materials or abandoning the recommended actions cannot be implemented. In the case of major discoveries, cause them to be sold abroad. Do not allow publications containing values and descriptions of inventions.

24. Cause disruption in the punctuality of transports (except for transport specified in instruction NK 552-46).

25. To inspire the convening of environmental and problematic meetings, to collect conclusions and proposals submitted there, to register applicants, and to implement the line specified in the instructions.

26. Popularize interviews with working people on current production problems, which include criticism of the past or local mess, but not lead
to the elimination of the causes of the criticized phenomena.

27. Public speeches of the authorities of the natives may contain national and historical accents, but they cannot lead to the unification of the spirit of the nation.

28. Pay close attention to whether new water intakes independent of the main water supply system were built in the rebuilt and new larger cities and housing estates. Old water intakes and street wells should be systematically liquidated.

29. In the reconstruction and expansion of industry, ensure that industrial wastewater flows into rivers that may be reservoirs of drinking water.

30. Flats in new housing estates and reconstructed cities may not contain additional premises allowing for livestock breeding or food storage for longer and in larger quantities.

31. Ensure that private enterprises and artisans receive raw materials and equipment that do not allow the production of good quality articles, and that the price of these products should be higher than similar products produced by the state.

32. To bring about the maximum expansion of office administration at all levels. Criticism of administrative activity may be allowed, but it must not be allowed to be reduced or to work efficiently.

33. All production plans in the extractive industries and in the activities specified in the relevant instructions must be ensured, and the domestic market must not be allowed to be supplied.

34. The Church should be subjected to special observation and the educational activity should be directed in such a way as to arouse universal disgust with this institution. To take close attention and control the church printing houses, archives, libraries, sermons, caroling (the last example is what Fr. Jankowski said, the snitches of the Jews trumpeted the content of religious teachings and funeral rites all over the world, not that it is true, but that it is anti-Semitism).

35. In state and vocational education, and especially in secondary and higher education, lead to the removal of teachers who enjoy universal authority and recognition. To replace them with appointed people.
Lead to the severance of correlations between subjects, to restrictions on source editions, to the removal of Latin, Greek, general philosophy and genetics from secondary schools.
In history, it is not possible to state what a ruler wanted to do or did for the country, but it is necessary to show the tyranny of kings and the struggles of the oppressed people. In vocational education, it should lead to narrow specializations.

36. To inspire the organization of state events related to the struggle of the natives against the partitioners (except for the Russian partition), especially against the Germans, and the fight for
socialism.

37. In domestic publications, it is forbidden to admit studies dealing with natives who stayed in our country until the revolution and during World War II.

38. In the event of the establishment of an organization supporting the alliance with our country, but aimed at controlling the economic activity of the official authorities of the country, it is necessary to immediately take action (independently of the authorities of the country) burdening these organizations with nationalistic and chauvinistic tendencies. Forms of activity: Demolishing our monuments and cemeteries (currently the Synagogue is set on fire), publishing leaflets mocking our nation, our culture, the sense of the agreements made. Engage the natives in propaganda work and take advantage of the existing hatred towards us.

39. To ensure the construction and expansion of bridges, roads and numerous connections, so that, in the event of the need for military intervention, it is possible to quickly reach the point of resistance or concentration of opposition forces from all sides.

40. Make sure that political opponents are arrested. To work out opponents with authority among domestic nationalists. Liquidate them by means of so-called accidental situational activities before they become notorious or arrest them earlier for criminal offences.

41. Do not allow for the rehabilitation of people convicted in political trials. If rehabilitation is necessary, it can be carried out on the condition that the case is considered a miscarriage of justice, without initiating an investigation and bringing to court those guilty of the mistake (judges, witnesses, prosecutors, informants).

42. It is not permissible to put on trial people in managerial positions filled by the Party, who have caused losses or discontent among their subordinates. In drastic situations, they should be dismissed from their positions and transferred to other towns to equivalent or higher positions. In extreme situations, it should be placed in managerial positions and treated as a personnel reserve for later replacement.

43. To publicly announce the trials of people in managerial positions (army, minister, main offices, education) accused of activities against the people, against socialism, against industrialization. This will cause the vigilance of the working masses.

44. Take care of the replacement of people in work positions by allowing people from promotions with the lowest qualifications to these functions (the last example is BOLEK – WAŁĘSA, who even received professorial titles from Western Jewry, how do we know it, 40-50 years earlier you could also collect titles and be promoted for praising Stalin).

45. Cause an influx of universities from the lowest social groups, who do not show professional interests, but only a desire to obtain a diploma.

This criminal scenario is being implemented with all ruthlessness, faithfulness to its principles. Analyzing it point by point, exemplifying each of them with thousands of examples written out over four millennia, it is possible to write the entire political and economic history of post-war Polish. If there were any practical deviations, they were slight, local, adapted to the time and circumstances.
To accelerate the liquidation of the natives associated with the KPP, PPS, Walter, KZMP, BCH and other groups... and liquidate. Kapep functionaries had already been fired before the war in Soviet purges. Those who got into Sovlager during the war survived. The domestic Capep members, these underground masses, have never been dangerous to the system. The PPS had to be dismantled, and with it all parties, especially the Polish People's Party. The bloody crackdown on their leaders continued at the same time as this instruction was being drafted. A Walter soldier – K. Świerczewski, a symbol of red Spain, secret internationalism – died in the Bieszczady Mountains from the bullets of the Ukrainian Insurgent Army and only 40 years later his uniform preserved in the museum was shown on television – with a clear trace of a bayonet thrust. The bloody crackdown on political parties was facilitated by propaganda, as it was consistently associated with the actual armed opposition.

None of the leaders of these parties had yet suspected their imminent end, when the instruction said: "Hasten the unification of all parties... That is:
liquidate all of them, and CALL THE PARTY A SOVIET AGENT – PPR, soon renamed PZPR.
To break up the youth movement, especially the pre-war scouting: and it happened,....scouting was liquidated. In its place an indoctrinating, atheizing dummy was introduced, alien to the Catholic spirit of the Polish youth.
The apogee of these destructive actions fell on the years 1949-1952 and it was during this period that prisons ensured the number of over 5000 thousand high school students, arrested and sentenced for belonging to over 500 secret school organizations. Those sentenced to the most severe sentences were sent to prisons with a strict regime – Wronki, Rawicz, Strzelce Opolskie. Most of them were placed in the youth concentration camp Jaworzno, a former branch of the German concentration camp in Auschwitz.

Point 7 is a masterful social engineering of simulating party life. Rank and file members of the party are a mass of obedient pawns, "useful fools" who are given the appearance of co-governing, the workplace, the village, the commune, the city, the county, the province, the country. They have the right to criticize, but only to "expose" shortcomings and local mess, petty abuses and thefts, but above all, to vigilantly look out for enemies of "democracy" and reactionaries. They must not encroach on systemic matters, generalize. Seeing the essence of evil, capable of political syntheses, ruthlessly eliminating crews, teams, parties from life: eliminating people who have shown activity in putting forward concepts and postulates...

Maintaining the appearance of democratic elections at all levels, make sure that only the obedient, passive, mediocre and, in the first place, agents of the system: "selected" by our special services, are promoted. Those elected to the authorities, to a congress or for any other action, should not keep their mandates for the next term, unlike our agents, who are guaranteed a permanent presence in the system. Hence the elite group of delegates to all subsequent party congresses.

Point 8 of those who excel in every field, intelligent, active, and have a sense of organization should either be subordinated or sidelined if they begin to think separately and make use of their criticism.

Point 10: in all organs of power, their levels and cells, agents of the system are to reside. These are to be two types of agents – special services and their own, i.e. Soviet, independent and unknown security services of the country.

Point 11: diligent observance of the order of predatory exploitation of the natural resources of the natives. Several other points of the instruction give the green light to one important area of the mining industry in particular. It is excluded from numerous prohibitions in force in other areas of the economy of the natives. In the pursuit of maximizing the extraction of minerals, especially coal, the entire mining and transport infrastructure must be subordinated to these preferences. If one of the points of the instruction says to deliberately disrupt transport, then coal transport is to be excluded from this rule.

Agriculture: The ultimate goal is to nationalize farmers' land. The parceling of manor land was a fraud calculated to win over the peasant mass, which at that time constituted 70% of the society, and at the same time the base of the resistance movement. The peasants were given a worthless deed of grant, not notarial deeds. A few years later, forced collectivization will begin, a kulak will be created as an enemy sabotaging progress in the countryside, storing grain and food for speculation.

The prisons will be filled with over 200,000 unfortunate people who were unable to deliver the required supplies on time and in the prescribed amount. In the effort to liquidate individual agriculture, through a system of low prices and restrictions, peasant farming was pushed into unprofitability.

Points 14 – 15: all legal acts, ordinances should be imprecise, allowing for freedom of interpretation. Each case should be in the hands of several commissions, offices of institutions, and none of these links could make a final decision. Decisions belong to representatives of the agency and the party. And again: it does not apply to the mining industry.

Points 17 – 16: – Local governments and trade unions are sham and passive annexes. They have nothing to say about the fate of the plant and the staff, about the directions and organization of production, etc. Trade unions can distribute potatoes for the winter, theatre and cinema tickets, and assign holiday referrals among crews. Not everyone – only according to their own key. The rationalization movement should be developed and supported (point 23), but valuable ideas should be directed to the headquarters and not implemented in the parent plants. Allow the implementation of ideas that are only useful in the mining industry. Inventions of the rank of scientific or technical discovery were immediately sent "abroad", i.e. to the USSR.

Point 27: particularly important, although general – to eradicate all attempts to consolidate the spirit of the nation.

Points 28 – 29 are therefore criminal in nature. They forbid the construction of local water intakes, and order the old intakes, including wells, to be liquidated. Everything should be directed to one common group. Why? So that if necessary, the city can be paralyzed by destroying the drinking water supply!

Point 31: systematically destroy crafts and all private initiative. In the next decade, all concessions in this area would be made dependent on the secret cooperation of the craftsman with the Security Service, which also applied to shopkeepers, restaurateurs and taxi drivers, and finally to foreign exchange dealers.

Market supply (point 33) is always to balance on the verge of scarcity, permanent lack of basic supplies of goods. It is supposed to occupy the attention of the citizen, absorb his unnecessary time, absorb thoughts, initiative, direct them to constantly figure out where and how to buy what. Strictly ensure the implementation of mining plans, but the supply of the domestic market must not be allowed. This means that the mining market is not a domestic market, but a colonial monopoly of the occupier.

Point 34: War with the Church – this provision will become the literal essence of secret political directives and recommendations of the Security Service. It is a recapitulation of the main directions of the war against the Church: observation and surveillance, education and school education aimed at arousing general disgust towards this institution, full supervision over printing houses, church archives, as well as sermons and religious education. The administrative war with the Church means countless harassments and difficulties in the administrative functioning of the Church, parishes of priests.

Point 35, the most extensive, but also the most important in the spiritual war against the nation. First of all – remove teachers with authority, who are rebellious. To remove historical knowledge, Greek, Latin and philosophy from
teaching, which removed consciousness from the humanistic tradition, deeply rooted in Polishness and faith. In brainwashing and
tradition, to prefer the fight against Germany and the fight for socialism.

In point 38 we find confirmation of the order of provocation as a method and pretext for escalating persecution: demolish our (Soviet) monuments, cemeteries, publish leaflets mocking our nation (a conglomeration of conquered nations under Jewish leadership), our culture, the sense of the agreements concluded; To exploit existing hatred of us. Agents introduced to organizations, especially youth organizations, were ordered to escalate their activities, radicalize pogroms. In subsequent "coups", such as March 1968, December 1970 and finally in the times of "Solidarity", the method of provocation always triumphed. Strange "demonstrators" called for storms on the Committees and the headquarters of the Security Service. It is not known whose hands threw stones, who demolished Soviet monuments, tombstones, and today sets fire to synagogues; – the same services in Jewish hands!! according to the modernized option, i.e. from pro-Soviet to pro-Brussels, where Poland is to enter on its knees as a Jewish-German colony, but deprived of national property, and natural resources, army, armed industry, factories and workplaces.

The next three points of the instruction: 40, 41, 42, are the ways of dealing with the opposition:

a) Arrest warrant for political opponents, especially those of high authority among the nation.
b) Murder secretly, in the so-called situational activities, during "escapes" or by the method of "suicide".
c) Discredit them under the pretext of criminal offences.
d) Do not allow rehabilitation. And vice versa – members and functionaries of the regime, from the party and the Security Service, should be tolerated even in the most serious offenses. As a
last resort, transfer to equivalent positions. In extreme cases, they should be placed in non-managerial positions and treated as a personnel reserve for later replacement.

Here, too, it is easy to demonstrate the timeless universality of this directive: party dignitaries, criminals from the Sejm and Senate from 1993 to 1995, who are shown to have evident financial and economic crimes worth billions, remain unpunished, and the Sejm represented by them rejects subsequent motions to remove parliamentary immunity from such criminals. But is it any wonder, since the openly "Soviet" agents decided to change their orientation to pro-Brussels, first by seizing the private property of the Nations, then by the scenario of "Solidarity" which was controlled by them and led to the American-Brussels orientation, but on the condition that it plundered the NATIONAL PROPERTY (in the form of national estates, former democracies). Doesn't anyone who thinks normally remember the same people who are now at the helm of power, their squeal of a slaughtered pig, about the rotten West, and a mock fight, today suddenly had an epiphany and robbed these nations, through an alleged opposition staged in conjunction with the Western services, the West, synonymous with freedom, which does not support the enslaved nations, but the mafias that are to open the borders of these countries, in order to introduce a NEW WORLD ORDER, with a government of Freemasons in Brussels, with one religion Judaized by them, under the sign of the compass and the set square. Where there will be no place for Catholics who, as in the times of Soviet murderism in the hands of Jews, exterminated Christianity and all other religions. Today we have these Haunted Intellectuals gorging on the plundered National property, together with the former public agents SQUEALING TOGETHER in one choir....

TO NATO, TO THE EUROPEAN UNION;... TO NATO, TO THE EUROPEAN UNION;... TO NATO TO THE EUROPEAN UNION;... TO NATO TO THE EUROPEAN UNION;.... and so on to madness, and why!? .... because a gang of these international thugs and criminals is trembling for their possessions, where only today NATO AND THE CONSTITUTION OF THE UNITED NATIONS OF WESTERN EUROPE can provide them with their possessions together with supranational financiers founds
a NEW WORLD ORDER.

Inheriting the POLAND OF THUGS, now the GOVERNMENT OF THIEVES also inherits its methods. The last two points of the instruction require preference for MEDIOCRITY, putting forward people without education, without competence, without professional qualifications, but reliable, tested in servility, betrayal, secret cooperation with the occupier.
When reading this instruction, its internal genocidal coherence with the program of the Nazi extermination of the Polish nation is irresistibly imposed. Its directive read:

SCHLUSS MIT POLEN!! ..... (no more Poland): THE LEADING LAYERS OF THE NATION SHOULD BE DISPOSED OF!! .....

The victorious Nazism, in its program called "Ost des Reischsurers SS", intended to resettle about 16 million. Poles exactly where Stalinism had already directed over one and a half million Poles from the Eastern Borderlands – Siberia. The Soviet genocide and the scale of deportations did not have to go so far as such monstrous migrations of peoples.
All it took was full power on the spot, in the conquered country, ingeniously disguised as normality, which is one of the reasons why the Soviet Empire of Evil was and remained the unsurpassed, the most perfect emanation of the system of crime and genocide. The grim essence of this phenomenon was understood only by those who experienced it firsthand. The Jewish poet Osip Mandelstam, who was murdered in the gulags for trying to open the eyes of his fellow Jews, was also silenced.

BINGO! You got it, unlike most oblivious stupid goys in Poland... They killed the best of Poles during WW2 and during stalinist times.

>Transcript of the Secret Report of Comrade Jakub Berman delivered at a meeting of the Executive of the Jewish Committee in April 1945.

>TOP SECRET Instruction Nk/003/47
The Jewish scenario of enslaving states and nations. The Moscow governors had to comply with it under pain of immediate summons to Moscow or Gulag banishment. A copy of this script was in the Belvedere Palace, m.in, for the information of Bierut, Berman and their closest Jewish clique. That's where he died... We have a copy of this unique, most secret Jewish document.

We don't have your country's problem. JAPAN ISN'T AMERICA. Don't divide our country.
I don't mean to sound arrogant, but it's not your place as an ambassador to push YOUR agenda onto us this way.
So disappointed to see you know nothing while living here. Such a performer, I see.

Emery's law states that social parasites tend to be closely related to the host.

>The strict form of Emery's rule states that social parasites share immediate common ancestry with their hosts
Jews are social parasites following strict form Emery's law. Because social parasitism relies on confusing in-group signals, it makes sense that social parasitism would be more effective in closely related groups. Social parasitism is typically found in social insects where smell is the primary signal used to identify the in-group - the social parasite tries to mimic the smell. Humans do not use smell, but you'll note that the jews do try to mimic or confuse all the in-group signals that humans use.

1. Appearance - jews look kind of like white people, but will also alter their appearance to make them look more like us.
2. Tribal affiliation - jews created the ideology of civic nationalism to redefine tribal affiliation as something other than genetic relatedness
3. Family name - jews change their names
4. Common religion - jews re-wrote American Christianity to create a false sense of sameness with Christians (in reality jewry is the antithesis of Christianity)
5. Cultural bonds - jews will mimic goy culture and morality superficially while still maintaining their own separate culture that supports their lifestyle

In 1909, the entomologist Carlo Emery noted that social parasites among insects (e.g., kleptoparasites) tend to be parasites of species or genera to which they are closely related.[1][2] Over time, this pattern has been recognized in many additional cases, and generalized to what is now known as **Emery's rule**.[1] The pattern is best known for various taxa of Hymenoptera. For example, the social wasp *Dolichovespula adulterina* parasitizes other members of its genus such as *Dolichovespula norwegica* and *Dolichovespula arenaria*.[3][4] Emery's rule is also applicable to members of other kingdoms such as fungi, red algae, and mistletoe. The significance and general relevance of this pattern are still a matter of some debate, as a great many exceptions exist, though a common explanation for the phenomenon when it occurs is that the parasites may have started as facultative parasites within the host species itself (such forms of intraspecific parasitism are well-known, even in some species of bees[5]), but later became reproductively isolated and split off from the ancestral species, a form of sympatric speciation.

When a parasitic species is a sister taxon to its host in a phylogenetic sense, the relationship is considered to be in "strict" adherence to Emery's rule. When the parasite is a close relative of the host but not its sister species, the relationship is in "loose" adherence to the rule.[6]

The historic synagogues located in Toledo, Spain reflect the legacy of Sephardic Jews.

The Jews that opened the gates of Toledo

On arrival in north Africa, the Jews worked together with the Moslems to prepare an invasion of Spain. King Egika recognized this danger in 694, when he stated in Toledo: "We have recently learned from reliable sources that the Jews in Spain are working with Jews in other countries to conspire against the Christians."

Arab historians all agree that the Jews, both inside and outside of Spain, helped to arrange the Islamic conquest of Spain. (Hermann Schreiber, Auf den Spuren der Goten, Weltbild, 1973, p298) Jews traveled freely between Spain and North Africa, and spied on the Gothic armies and military arrangements.

JEWISH COMBAT TROOPS INVADE SPAIN
An Arab army commanded by Tarik ibn Ziyad crossed over to the Bay of Gibraltar. Things looked safe, so the main wave of Jewish fighters came over in a second wave commanded by Kaulan al Jahudi. These two armies, Jewish and Arab, marched off to Cordoba. (id., p. 299) Tarik ibn Ziyad was "a Berber recognized as Jewish of the tribe of Simeon".

I am a Jew.
My ancestors stood at the foot of Mount Sinai and received the Torah—the Divine blueprint that forever changed the world.
My people have withstood the test of time.
Every generation has had those who rose up to destroy us—and yet, we're still here.
We thrive not because we're smarter or stronger, but because G-d Himself gave us a mission: to bring light, truth, and morality into this world.
Our enemies have included Pharaoh, Haman, Antiochus, Titus, the Inquisition, the Czars, Hitler, Stalin, the Ayatollahs, and countless others.
They all tried.
They all failed.
And we're still here.
You have a choice: stand with G-d's people in this divine mission—or side with those who opposed us and ended up as the villains of history.
Either way, the choice is yours.
Choose wisely.

Maria Maksakova: "Most of the deputies of the Russian Federation have Israeli citizenship"

The sensational recognition of the opera singer Maria Maksakova, which was given to the Ekho Moskvy radio station, that despite the legislative ban on dual citizenship for the deputies and the government of the Russian Federation, most members of the State Duma of Russia have Israeli citizenship parallel to Russian, and the families of many of them are citizens of different countries.

A dominant anti-Semitic conspiracy theory is the belief that Jewish people have undue influence over the media, banking, and politics. Based on this conspiracy theory, certain groups and activists discuss the "Jewish Question" and offer different proposals to address it. In the early 21st century, white nationalists, alt-righters, and neo-Nazis have used the initialism **JQ** in order to refer to the Jewish question.[27][28]

Put simply, a hedge fund is a pool of money that takes both short and long positions, buys and sells equities, initiates arbitrage, and trades bonds, currencies, convertible securities, commodities and derivative products to generate returns at reduced risk. As the name suggests, the fund tries to hedge risks to investor's capital against market volatility by employing alternative investment approaches.

Donner was born in the municipality of Inzersdorf, a suburb of the capital Vienna which was incorporated into the City of Vienna, into the family of a soda water industrialist. She was the daughter of Franziska (Gerhartl) and Rudolf Donner.[2] She graduated with a Ph.D. in languages from the University of Vienna, before working at the League of Nations in Geneva as an interpreter and lower-level diplomat. In 1933, she met Korean politician Syngman Rhee in a Geneva hotel. At the time Rhee was living in the United States and was on a visit in Geneva. He visited Donner shortly afterwards in Austria and asked to marry her. Donner followed him to the United States and the marriage took place in 1934 in New York.[3] For both, it was their second marriage.[4]

Aiden Hunter @AidenHunterX · 3h

In Germany, jews would purposely feast where starving German children could see them. Jews would taunt the children and offer them food to get their hopes up. But then the jews would throw food to dogs instead of the children. This was in the Weimar Republic. Jews would purposely waste the food or destroy it, and they'd make sure that the Germans could see it -- just to rub it in that Germans were being impoverished. People thought German accounts of this happening were made-up "anti-Semitic tropes." Now that the world sees jews doing the same thing to Palestinian children -- feasting in front of them, making sure they can smell it, destroying any extra food for Palestinians, and worse -- it is reasonable to conclude that Germans were telling the truth.

Extreme sadism and humiliation toward Gentiles is a jewish tradition. Now you might begin to understand why, after 14 years of seeing their people tormented by jews, millions of Germans organized, gained political power, and broke the chains of jewish tyranny in Germany.

"Forbid the Whites to mate with Whites. The White Women must cohabit with members of the dark races, the White Men with black women. Thus the White Race will disappear ... means the end of the White Man, and our most dangerous enemy will become only a memory ... and our race will rule undisputed over the world. CATHOLIC CHIVALRY
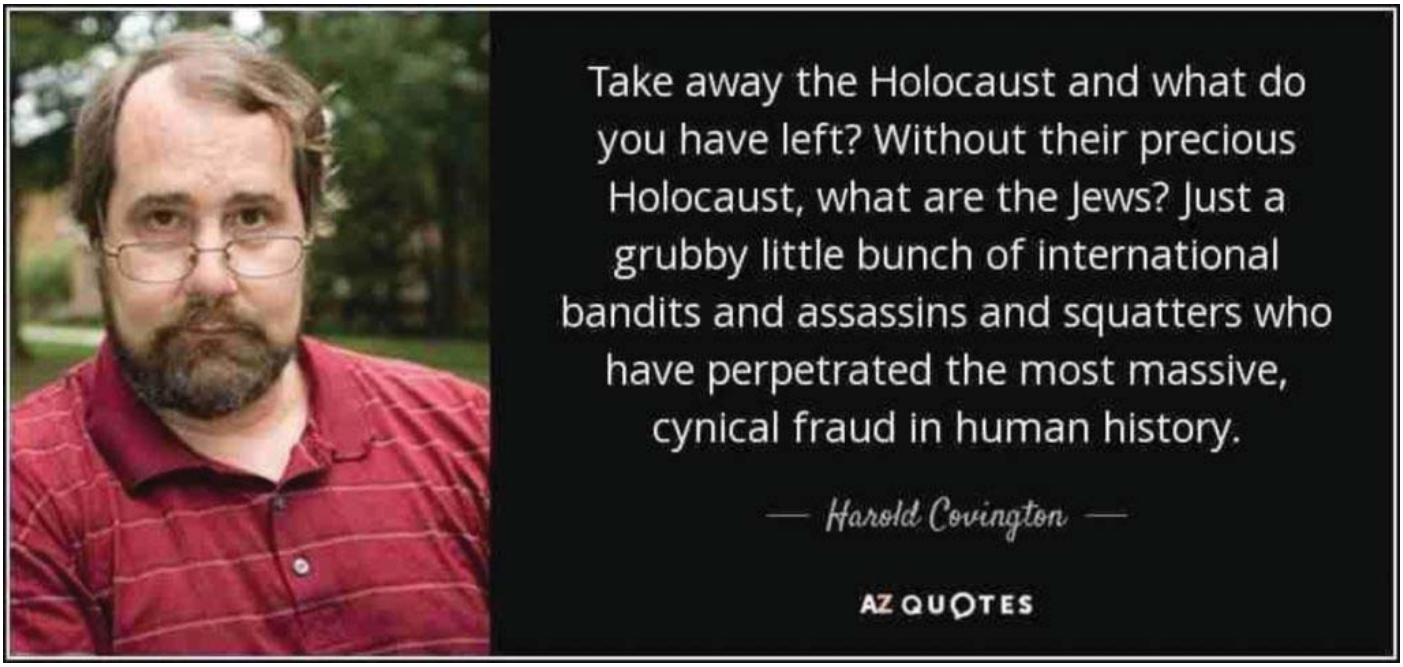
"Jews are the most worthless of all men. They are lecherous, greedy, rapacious. They are perfidious murderers of Christ. They worship the Devil. Their religion is a sickness. The Jews are the odious assassins of Christ and for killing God there is no expiation possible, no indulgence or pardon. Christians may never cease vengeance, and the Jew must live in servitude forever. God always hated the Jews. It is essential that all Christians hate them."
Saint Ambrose of Milan 379



Take away the Holocaust and what do you have left? Without their precious Holocaust, what are the Jews? Just a grubby little bunch of international bandits and assassins and squatters who have perpetrated the most massive, cynical fraud in human history.

Judaism

According to Orthodox rabbi Joseph Telushkin, the most significant Enlightenment hostility against Judaism was found in Voltaire;[153] 30 of the 118 articles in his *Dictionnaire philosophique* dealt with Jews or Judaism, describing them in consistently negative ways.[154][155] For example, he wrote: "In short, we find in them only an ignorant and barbarous people, who have long united the most sordid avarice with the most detestable superstition and the most invincible hatred for every people by whom they are tolerated and enriched."[156] Telushkin states that Voltaire did not limit his attack to aspects of Judaism that Christianity used as a foundation, repeatedly making it clear that he despised Jews.[153]

On the other hand, Peter Gay, a contemporary authority on the Enlightenment,[153] points to Voltaire's remarks (for instance, that the Jews were more tolerant than the Christians) in the *Traité sur la tolérance* and surmises that "Voltaire struck at the Jews to strike at Christianity". Whatever anti-semitism Voltaire may have felt, Gay suggests, derived from negative personal experience.[157]

Arthur Hertzberg, a Conservative Rabbi, claims that Gay's second suggestion is untenable, as Voltaire himself denied its validity when he remarked that he had "forgotten about much larger bankruptcies through Christians".[*clarification needed*][158] However, Bertram Schwarzbach's far more detailed studies of Voltaire's dealings with Jewish people throughout his life concluded that he was anti-biblical, not anti-semitic. His remarks on the Jews and their "superstitions" were essentially no different from his remarks on Christians.[159]

Voltaire said of the Jews that they "have surpassed all nations in impertinent fables, in bad conduct and in barbarism. You deserve to be punished, for this is your destiny."[160][161][162] He further said, "They are, all of them, born with raging fanaticism in their hearts, just as the Bretons and the Germans are born with blond hair. I would not be in the least bit surprised if these people would not some day become deadly to the human race."[163][164][165]

Some authors link Voltaire's anti-Judaism to his polygenism. According to Joxe Azurmendi this anti-Judaism has a relative importance in Voltaire's philosophy of history. However, Voltaire's anti-Judaism influenced later authors like Ernest Renan.[166]

Voltaire did have a Jewish friend, Daniel de Fonseca, whom he esteemed highly, and proclaimed him as "the only philosopher, perhaps, among the Jews of his time".[167]

Voltaire condemned the persecution of Jews on several occasions, including in *Henriade*, and he never advocated violence or attacks against them.[156][168] According to the historian Will Durant, Voltaire praised the simplicity, sobriety, regularity, and industry of Jews, but became strongly anti-Semitic after some personal financial transactions and quarrels with Jewish financiers. In his *Essai sur les moeurs* Voltaire denounced the ancient Hebrews in strong language.[169]

The anti-Semitic passages in Voltaire's *Dictionnaire philosophique* were criticized by Isaac De Pinto in 1762. Voltaire agreed with the criticism of the anti-Semitic passages and stated that De Pinto's letter convinced him that there are "highly intelligent and cultivated people" among the Jews and that he had been "wrong to attribute to a whole nation the vices of some individuals".[169] He also promised to revise the objectionable passages for forthcoming editions of the *Dictionnaire philosophique*, but he failed to do so.[169]

Human history is basically one long story about the white race having to continuously jew-proof society.
It goes like this.
>Whites exist
>Things are going well
>Jew comes in and takes advantage of something in bad faith
>System falls apart
>Whites have to rebuild system to be jew-proof to stop it from being taken advantage of again
>repeat
And it's not just vs Whites. It's Jews against everyone. Even God.
>Oh, God says we can't do stuff outside our home on the Sabbath?
>Let's encircle all of Manhattan with a single fishing line so we can claim it's all technically our home.
Their entire existence revolves around undermining law and order, even their own Gods,kek

We dont hate jews, we just think that if you are a lawyer who does not create things like medical devices that save peoples lives, if all you do is write and translate legal essays, you shouldnt be earning 3000$ per hour. You dont save lives, you dont build skyscrapers, YOU DONT MAKE ANYTHING THAT ADVANCES OUR CIVILIZATION OR MAKES LIFE BETTER. Lawyers, government paper pushers, regulators, legislators, YOU ALL SHOULD BE SUCKING ENGINEERS COCKS FOR MCDONALDS MONEY.

speaking of mcdonalds, i hear they are now serving pasta.

I love ppl like Gutfeld and Krauthammer, but for the most part jews contribute little to advancing civilization, and heres why:

>Lets begin with the history:

Throughout the history of the jewish religion jewish cultures encouraged the most talented in their culture to reproduce most and this led to jews having certain iq advantages over non-jewish (goyim) whites today. Thats right! Hitler didnt invent the idea of EUGENICS; he took the idea from the jews and ran with it. The problem with the jews' historical approach to eugenics is that for whatever reasons, these proto-jews had no sense for what true talent actually was, so they ended up creating a religion full of jews who only had an advantage in one area of the intelligence spectrum indicated by the verbal aptitude score on a standard professional iq test. The avg verbal iq of jews is 120 which is about 20 points higher than typical goyim whites. To get right to the point: This is why jews become lawyers so often and lobby as democrats for increased legalities/regulations/bureaucracy so that they can use their elevated verbal ability (dealing with words and complex legal speak) to earn money for themselves; the vast majority of jewish americans vote democratic so that democratic officials continue to legislatively reward the jews verbal iq advantage so they can depend on having maintained job security forever.

>> **Anonymous** (ID: 9oZGtgjQ) 11/13/22(Sun)00:29:08 No.404195969

>Got a lawsuit in the mail and its 200 pages long and full of words and language conventions that you cant understand?
>>—looks like you need the help of a high verbal iq jewish lawyer to help you understand all this disgustingly overcomplicated legal bullshit!

If we had a truly efficient free market, then the legal and government regulation system would be very simple, and we wouldnt have to pay jewish lawyers 2000$—5000$ Per Hour to decipher all the complicated legal language bullshit. The majority of jewish lawyers would have to find a new job.

Which imo is fine because jewish lawyers produce nothing of value. Nothing that advances society. If every human was a lawyer then everybody would starve to death/freeze to death/die of cancer.

In contrast, there are many other jobs humans have that make life better for everybody and they make civilization better. A homebuilder/architect builds homes/skyscrapers which enrich peoples environments, making them happy. A doctor with the help of siemens engineers finds tumors to prevent ppl dying of cancer.
An automobile engineer builds you cool stuff like bugatti veyrons.

And these people (engineers/scientists/mathematics bamfs) who make these things generally have a higher *NONVERBAL** iq score than the average jewish person does. German goyim (non-jewish, caucasian germans),for example, have significantly higher nonverbal iq than the avg jewish person, which is why so few jews in germany (and worldwide) become engineers. Jewish ppl almost always become lawyers or they pursue verbally intensive, law-like professions (government etc…) which effectively produce nothing of value. The arms race between jewish lawyers and jewish prosecutors and jewish judges in america is an escalator to nowhere. The legal arms race is just as worthless as the nuclear arms race was during the cold war.

>> **Anonymous** (ID: 9oZGtgjQ) 11/13/22(Sun)00:30:55 No.404196147

Overall there is ZERO BENEFIT to the quality of life of the average human by having many countries owning nuclear weapons. IN EXACTLY THE SAME WAY, there is ZERO BENEFIT to the quality of life of the average human by having an arms race in the legal/governmental/bureaucratic/regulative system. Put it this way: If lawyers became 10 times as good at their job, and prosecutors became 10 times as good at their job and judges became 10 times as good at their job, then society wins right? WRONG!! NOTHING WOULD CHANGE. Divorce settlements and lawsuits DO NOT BECOME MORE FUN, just because you get to pay your lawyer 10 times as much money, and a 10 times larger portion of your tax dollars goes to paying for judges and prosecutors and huge, fancy, 100 million dollar courthouses. There would be no overall benefit to civilization/human beings. This judicio-governmental escalator to nowhere in america is like a cancer that wants to keep getting fed. And america keeps feeding the cancer like the romans did, and they are so fucking stupid they expect a different result.

Look back at germany. German engineering is awesome because of the valuable talents of non jews.
Road and automobile engineers in germany make more money than german lawyers do. And the result? Their autobahn highways and cars operate so smoothly that its legal to drive as fast as you want on about 70% of their length. There are thousands of miles of roads in germany that you can legally drive 200mph on if you so desire. Whats that america? Oh, you americans live in the land of the free? Lol. Have fun driving 55 on your retarded american highways, haha.

Anonymous (ID: 9oZGtgjQ) 11/13/22(Sun)00:33:25 No.404196384

Which sounds like it would be more fun?
—Paying jewish democrats in the legal/governmental profession to leverage a metastatically overcomplicated legal language for their own financial gain and their perpetual job security?
OR,
>Paying your money to brilliant engineers so they would be able to make such great cars and such great highways that it became safe/feasible to have large stretches of american highways WITH NO SPEED LIMIT?
Lol, im gonna go ahead and say that no speed limit highways WOULD BE MORE FUN, objectively even.

Verbal iq is almost completely worthless in an efficient society. And the jews dont want you to know this, precisely for that reason.

Perfect synergy.
That's why they lead both sides: they try to get the entire population to choose one of these two sides. The result is everyone in the world blames everyone but jews for jewish supremacy.

Why?

It's really simple.

You can believe that hundreds of nations over thousands of years have been irrational and wrong.

Or.

You can believe that there's something very strange about the Jewish version of history.

"**Not all Jews...**" is so tiresome

- Not all Jews in **Russia** were bad and yet, they genocided 60 million+ Russians. The few good people were irrelevant.
- Not all Jews in **Germany** were bad and yet, they destroyed Germany. The few good people were irrelevant.
- Not all Jews in **Ukraine** were bad and yet, they genocided 15 million+ Ukranians. The few good people were irrelevant.
- Not all Jews in **America** are bad and yet, they subvert and destroy the entire country. The few good people are irrelevant.
- Not all Jews in the **Middle East** are bad and yet, they bomb and genocide the entire Middle East. The few good people are irrelevant.

When you have a population percentage of only 1-2%, and that is enough for a group of people to become a cancer, it kind of destroys the whole notion "not all...." 😆😆

Maybe not ALL Jews.. but WAY too MANY! I question anyone who pulls the "good Jew" card. If he's so good, why don't he cease to be a Jew?

✅ Conclusion:

If you **exclude Mizrahim from the "white" category**, **Israel may have a similar or even larger non-white percentage than the U.S.** — around **50–55%** compared to the U.S.'s **~42%**.

Let me know if you'd like a comparison chart with this framing.

Jews are literally Phoenicians. I mean that in the most literal possible sense. In other words, the ones who settled in Palestine were called "Jews" after the province "Judea", but the same group was called "Phoenician" in former times. Even Josephus implicitly acknowledges this when he makes his case for the Antiquity of the Jews, by using an old reference to a group that spoke the "Phoenician tongue" (Hebrew) as evidence that they were Jews. It is important to understand that "Phoenician" is a very imprecise term whose meaning changed over time and between authors.

But anyway, Jews and Phoenicians spoke the same language, lived in the same region, worshiped the same deities (El, Asherah, Yah/Yam, Baal, Anat, etc), equally traced their descent from southern Mesopotamia, had the same material culture, etc. Solomon is even best friends with the Hiram of Tyre, and his temple constructed for the devil Yahweh was constructed in the image of the Temple of Melqart in Tyre, using Tyrian (Phoenician) craftsmen, even according to the Bible. Solomon's fabulous wealth comes directly from overseas Phoenician trade, even in the Bible. And, of course, the Phoenicians burned children alive - especially firstborn sons - just as the Jews do. The Jews were just Phoenicians who settled in the southern Levant, nothing more. Modern day Jews even consider the Phoenician dye Tekhelet sacred and use it in their tassels. I could go on and on...

This is really good stuff. The entire phenomenon of the Phoenicians and Carthagenians is strangely ignored in history, particularly what happened to them after the destruction of Carthage by the Romans. There's been some really interesting theories about this that are of vital relevance even today. Especially today.

(33 BC) Diodorus Siculus - Historical Library [C. H. Oldfather]

[The Phoenicians, who from ancient times on made voyages continually for purposes of trade, planted many colonies throughout Libya and not a few as well in the western parts of Europe. And since their ventures turned out according to their expectations, they amassed great wealth and essayed to voyage beyond the Pillars of Heracles into the sea which men call the ocean.]

[The Phoenicians, then, while exploring the coast outside the Pillars for the reasons we have stated and while sailing along the shore of Libya, were driven by strong winds a great distance out into the ocean. And after being storm-tossed for many days they were carried ashore on the island we mentioned above, and when they had observed its felicity and nature they caused it to be known to all men. Consequently the Tyrrhenians, at the time when they were masters of the sea, purposed to dispatch a colony to it; but the Carthaginians prevented their doing so, partly out of concern lest many inhabitants of Carthage should remove there because of the excellence of the island, and partly in order to have ready in it a place in which to seek refuge against an incalculable turn of fortune, in case some total disaster should overtake Carthage. For it was their thought that, since they were masters of the sea, they would thus be able to move, households and all, to an island which was unknown to their conquerors.]

Here is what Diodorus said about their fate. At least some of them came to America. Others became Jews. Others infiltrated Europe and all the lands of their enemies, swearing eternal hatred, as Virgil puts it: 1/2

2/2

As Virgil put it:

(19 BC) Virgil - Aeneid [Robert Fitzgerald]

864-875

[This is my last cry, as my last blood flows.
Then, O my Tyrians, besiege with hate
His progeny and all his race to come:
Make this your offering to my dust. No love,
No pact must be between our peoples; No,
But rise up from my bones, avenging spirit!
Harry with fire and sword the Dardan countrymen
Now, or hereafter, at whatever time
The strength will be afforded. Coast with coast
In conflict, I implore, and sea with sea,
And arms with arms: may they contend in war,
Themselves and all the children of their children!"]

And yet other of these beasts moved on to other seas, to become famous magician-pillagers, preserving their knowledge of America...

I believe I've accidentally stumbled on ancient understanding that has been lost. Medusa. How was she defeated? A mirror was shown to her. Medusa may have been a legend refined by a J-woke culture. I have only just now thought of this, though it seems like it has some merit.

What am I talking about?

AN EXPLOITABLE TENDENCY.

Notice how the Jew reflexively moves into a defensive posture. He's not defending a Jew. He's defending Jewish identity. There is no point in attacking an individual Jew because Jews will gladly rush in to throw the individual Jew under the bus, so that they may preserve their positive Jewish identity. But there's a catch. Jews have outsized in-group preference. They will do everything and anything they can think of to preserve Jews, as a group, as being beyond reproach.

How does this manifest in terms of praxis?

Simple:

STEP 1 - Identify the Jew. Could be individually, could be a group or collective. Doesn't matter. Identification is key because it forces them into a defensive posture that they must address.

STEP 2 - Quote them. Repeat precisely what they say with no embellishments. Does to the punctuation. Screencaps or videos are best because it's not coming through you. It's literally a quote from a Jew. If you're doing this IRL (which I have done) have a small list of easily searched quotes that can be seen from any phone with internet connection. A personal favorite is the mitzvot commanding them to "destroy the seed of Amalek" (code for genociding White people; Whites = Esau).

That's it's if they reflexively band together to protect identity, all you do is point out what that identity entails . . .

GENOCIDE.

I'm going to have to sit and think on this.

I honestly believe this is an exploitable behavior that can be utilized in practice IRL.

Japanese people are discussing how to destroy Jewish owned companies on Threads, it has 15k views

The concern is about Japanese companies being harassed when refusing to join those conglomerates.

Inside the Hasidic Jewish Community in New Jersey, a rabbi's daughter explains the following:

"There is a song we sing on the sabbath... and there is a line in it (speaks in Hewbrew) which means 'We glorify lies and we uglify beauty'..."

"We have our own police, banking, lawyers, fixers, a whole underworld".

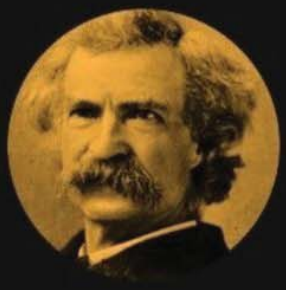
Saint Paisios once fasted and prayed for Satan's salvation for two weeks. During that time, the demon appeared to him as a dog's head, sticking its tongue out and mocking him.

The saint ceased his prayers because he realized the demons do not desire salvation.

Satan and the demons are not your "fellow and brother;" the demons are pure hatred which desires for nothing but your destruction.

Sympathy for the devil is a fool's errand and is only wielded by atheists who hate the Eternal Good themselves, like the proto-Redditor Twain, as a cudgel against anyone who holds true to faith.

> **Martyr Made** @martyrmade · May 13
> Been thinking a lot about this quote since @duncantrussell read it to me



“But who prays for Satan? Who in eighteen centuries, has had the common humanity to pray for the one sinner that needed it most, our one fellow and brother who most needed a friend yet had not a single one, the one sinner among us all who had the highest and clearest right to every Christian’s daily and nightly prayers, for the plain and unassailable reason that his was the first and greatest need, he being among sinners the supremest?”
